Report Name: Auckland Transport Update – September 2014 addendum

File No.: <<leave blank – Infocouncil will insert this when the report is saved in Trim>>

Purpose

1. Following its meeting on 2 September 2014, the Howick Local Board's Transport and Planning Portfolio team decided to refer a new proposal as detailed below to the Howick Local Board for consideration at its 8 September 2014 business meeting, and recommends that the Board consider the proposal for construction utilising the Local Board Transport Capital Fund.

Recommendations

That the Howick Local Board approves construction of a section of new footpath (including removal and replacement of an old driveway crossing mountable kerb) at the northern end of The Parade, Bucklands Beach, as indicated in the report below, to be funded from the Local Board Transport Capital Fund, based on the rough estimate of cost of \$5,800.

Discussion

Proposed new footpath, The Parade, Bucklands Beach

2. In response to a request from the public for new footpath to be extended from Musick Point Road to the beach front, the Board's Transport spokespersons propose that the Howick Local Board allocates funding from its Local Board Transport Capital Fund towards the construction of new path, including the removal and replacement of an old driveway crossing mountable kerb, at the very northern end of The Parade, Bucklands Beach, where indicated by a red line on the aerial plan below. The proposed path would generally follow the arc of the existing kerblines, between where the public footpath currently ends and the semi-circle parking bay.

3. Footpath was not previously formed in this location due to the land being privately owned. However, an area of land was purchased by Auckland Transport in 2013 and this now forms part of the road reserve.

4. New construction has recently been completed at the property immediately north of the proposed new footpath, and the property owner is required to reinstate areas of the road reserve negatively affected during construction.
5. The Board's transport spokespersons consider it beneficial that public footpath should be constructed at this location in order to improve pedestrian access to the beach front, and further consider that the new footpath should be constructed prior to the required reinstatement in order to avoid the necessity of reinstating the berm twice. The proposal has therefore been referred to the Howick Local Board for consideration at its meeting on 8 September.
6. Auckland Transport has provided a rough estimate of cost of \$5,800 for installation of new footpath at this location. This amount includes removal and replacement of an old driveway crossing mountable kerb at the same location.
