

## **Attachment A – Consultations on Roading and Parking Changes (April 2016)**

<b>Business Unit</b>	<b>Location</b>	<b>Description</b>	<b>Date</b>	<b>Comment</b>
PT Team	West Tamaki Road	<p>In August 2015 a Safety Around Schools cluster of work was sent though for consultation with the Local Board, however AT has reviewed the proposed locations of the bus and are now in consultation on an alternative location.</p> <p>In reviewing the design there seems to be buildability and PT patron access issues with the proposed bus stop opposite 226 West Tamaki Road as the hardstand area needs to be accessed by stairs.</p> <p>AT is now proposing to relocate these two new bus stops further west outside 169 and 212-214 West Tamaki Road to be able to provide an accessible concrete hardstand and bus shelter on one side of the road. Further investigation into the PT facilities for the surrounding area has also identified that the existing bus stop outside 141 – 145 West Tamaki Road is being accessed by passengers by way of a narrow traffic island - to correct this AT is also proposing to consolidate the pair of stops outside 141 – 145 and 194 West Tamaki Road with the proposed pair outside 169 and 212-214 West Tamaki Road.</p>	Circulated 9 March 2016	
Road Safety	665 Mt Wellington Highway	<p>Mt Wellington Highway Crash Barrier</p> <p>On request, AT carried out a preliminary assessment of the existing safety barrier outside 665 Mt Wellington Highway. This assessment revealed that the existing barrier was an older system barrier, and was located such that vehicles losing control on this section of road would end up in the front yard of No 665 Mt Wellington Highway. This proposal will ensure that the crash barrier is updated to safety standards and that it will effectively prevent vehicles from crashing into the front section of No. 665 Mt Wellington Highway.</p>	Circulated 14 March 2016	

Public Transport Team	Great South Road	<p>Route 322 (Otahuhu Station to Ellerslie Station) Review – AT has undertaken a comprehensive review of the arrangement, spacing and facilities of bus stops along a length of Great South Road, from Otahuhu Station to Ellerslie Station.</p> <p>The review was completed to identify opportunities to optimise bus stop spacing and upgrade facilities to improve service efficiency, safety and passenger convenience. Details were contained in the letter.</p>	Circ 21 March 2016
