<b>Project Title:</b>	Health, Hygeine and safety for school kids at primary schools in Tamaki area
<b>Project Location</b>	Tamaki Area
<b>Project Description</b>	<p>Objectives of the trust are: (A) To promote health and hygiene awareness of all persons; (B) To provide sports training sessions open to the general public for the promotion of health; (C) To work with the community towards eradicating child poverty; (D) To provide support, conduct physical and social activities for senior citizens/aged people; (E) Involvement in school kids lunch boxes programme; (F) To work towards recognising all religions and languages; (G) To work with schools for kids with disabilities and assisting them in any way possible; (H) To conduct health and fitness workshops and physical activities for women; (I) To promote education of Hindu and Maori culture, teaching their language open to people from all cultures and races; the trust has taken up very seriously the task of teaching the value of health, hygiene &amp; safety to children from a very young age. We want to introduce a curriculum in primary schools where children will be taught how to take care of their eyes, teeth, and whole body by devolping good habits regarding hygiene. We will arrange regular visits by specialist doctors to schools so that they can do regular check-ups and also disseminate knowledge to children about the origin and causes of various diseases and the preventive measures they can take.</p> <p>* This will reduce absenteeism in school due to sickness and raise a healthier next generation.</p> <p>* Also it will reduce the burden of medical bills on parents and thus on the nation.</p> <p>* It has been seen that major cause of absenteeism in schools is due to children's sickness. The illnesses like diarrhoea and influenza rank the highest in diseases caught by kids. Diarrhoea is the main cause of children's hospitalisation too</p> <p>* Some of the virus infected situations can never be treated and hence they are the deadliest of them all.</p> <p>* Parasites such as Fungi and protozoa can cause numerous common diseases generally associated with bad hygiene. Examples of such diseases are Malaria, Amoebic dysentery, Gastro enteritis, Coccidiosis, African trypanosomiasis, various worm attacks, Athlete's foot, Elephantiasis etc.</p>

<b>Project Title</b>	Ethnic Community Centre exclusif for seniors
<b>Project Location</b>	Panmure Ellerslie
<b>Project Description</b>	<p>A dedicated exclusif recreational facility for seniors with TV, Music,wifi, health check ups, games, tea coffee, snacks, computer and english language trainin. At this exclusif centre they can visit anytime of the day to be with their fellow mates to share their lonely moments which will help them to come out of their old age depression. A full time care taker will be available at all the times to faciltate all these services to our senior citizens.</p> <p>We are choosing panmure location as it is centrally located and most of our members are from nearby areas, and they have easy access to train station and bus services.</p> <p>We are expecting this facility will be catering to approx 500 seniors in total from around the area, at least 50 seniors at a time at the venue.</p>

<b>Project Title</b>	WISE Collective Hub - Otahuhu
<b>Project Location</b>	Anglican Trust of Women and Children, Beatty Ave, Otahuhu
<b>Project Description</b>	<p>The WISE Collective is a project that was established until a partnership with the Auckland Refugee Community Coalition (ARCC), and is one of several community development projects run under that partnership. The name WISE (Women Inspired Strong and Empowered) was chosen by the founding group of women nearly 4 years ago. Underpinning all the community projects are the 5 'Es' of equity of access, education, empowerment, employment and enterprise pathways. The WISE Women Hubs bring women together mainly from refugee (but also migrant background) to meet weekly through the year, facilitated by a WISE Project Worker. At the WISE hub meetings, the omen are encouraged to share their interests, skills, talents, and aspirations for themselves and their families. At the same time, they develop friendships, gain confidence in speaking English,and share their concerns and questions. The WISE Project Worker acts as a facilitator and support person, encouraging women to take responsibility for areas of interest. The WISE Hub meetings last for 3 hours and the activities, speakers and discussions arise out of their requests, needs and interests.</p> <p>There are two other WISE Women Hubs, one in Henderson and one in Roskill. Women attending these also become involved in other activities such as the WISE Catering, Food Stalls, Craft Makers, and regular trainings are held with interpreters and childcare provided as needed.</p> <p>This proposal for a Community Partnership grant is to fund the establishment and operational costs of a WISE Women's Hub in Otahuhu, in collaboration with the Anglican Trust of Women and Children (ATWC).</p>

<b>Project Title</b>	Heritage preservice motivational Seniors Masterchef competition
<b>Project Location</b>	Mt Wellington
<b>Project Description</b>	<p>As you all will agree, Food plays a great role in any culture. Every family has a unique way of cooking their family recipes, they have been carrying over generations to generations. Preserving the traditional recipes and passing it to future generations to enjoy, is an act of preserving the rich heritage any community have with them.</p> <p>Before we loose all those rich culture, we need to motivate those seniors to pass on their talent of family cooking unique receipes with their technicalities by way of having a seniors cooking competition. To keep this culinary heritage to be cherished by our next generations, seniors from all the ethnicity are welcome, no matter which culture and country they come from.</p> <p>The various phases, stages, and changes life brings. And in this ebb and flow, there have been times when we haven't been able to live out ideal as food provider to our family. Senior Best Chef New Zealand Show is all about encouraging and motivating aging people by their cooking talent to show it to the current and next generations, before we loose this heritage of our cultural food lying with our seniors</p> <p>Life International Chartiable Trust thus planned to pass this heritage on to next generation and to motivate our seniors to show case their talent in front of our community in the form a seniors master chef competition and a book to preserve their unique traditional receipes alongwith their profiles.</p> <p>NZMA Institute of Hospitality, Mt Wellington, have very kindly agreed to give out their kitchen space for our seniors to come and show case their talent in their final round. A help from the Local Board is solicited in meeting our expenses on other logistics like printing of flyers, advertising, and giving it media coverage.</p>

<b>Project Title</b>	Better Safety
<b>Project Location</b>	Panmure
<b>Project Description</b>	With 100+ paddlers in the club safety becomes more and more important that ensure we are doing as much as we can to keep our paddlers safe while out on the water. With the majority of our our paddlers being our Junior grades, that is from 6 years to 19 years we believe the purchase of Two safety, support / coach boats similar to the ones used by rowing clubs, is now of the utmost importance. With the addition of the two boats we believe we can add value to all our paddlers to help them achieve higher results in future regatta's

<b>Project Title</b>	Kia Mahi Tahī community uplift partnership
<b>Project Location</b>	Mt Wellington
<b>Project Description</b>	<p>Kia Mahi Tahī Community Uplift project</p> <p>An expression of interest from Maungarei Community Christian Trust</p> <p>About our organisation</p> <p>Incorporated in 2002, Maungarei Community Christian Trust (MCCT) facilitates improvement in the social, cultural, emotional, physical and economic lives of Mt Wellington people.</p> <p>The Trust is arguably the only social service in the area and focuses on improving outcomes for high needs communities – especially at risk youth and at risk school children, especially through its Kia Mahi Tahī programme.</p> <p>It desires to empower, assist people to recognise their abilities and educate in ways to improve their situations, while valuing differences between people. It guides “good” decision making for their futures including those of their dependents.</p> <p>Mt Wellington has significant social deprivation and associated social themes of unemployment, poverty, marital separation, economic hardship, single parent families, welfare dependency, very low decile schools and lacks community facilities. Concentrations of government housing and high Pacific and Maori population statistics prevail in the Riverside community.</p> <p>MCCT’s Kia Mahi Tahī (Walking Beside), programme contributes to healthy and stable families, and thereby enables strong and thriving communities to participate, celebrate and contribute – especially through local schools where it is currently operating.</p> <p>Through contact with children, teenagers, young adults and family situations, MCCT responds directly, and facilitates actions to stabilise families, where invited, such as mentoring, food parcels, home visits, intervention, referral to professional services, (such as counselling – which MCCT provides free to most), chaplaincy, discussion of issues with the whole Whānau, liaison with other agencies.</p> <p>MCCT has strong relationships with One Tree Hill College, Bailey Rd School, (where MCCT’s Community Worker Manager is on both boards of trustees), Panama Rd School, (where MCCT’s Community Centre Manager is on the school’s board of trustees), Tamaki Community Liaison Group on Policing and Security, Youth Justice, MSD, CAB, local food bank networks, some local playgroups, some local churches plus various other agencies and community groups.</p> <p>Each of the current MCCT operational staff has strong community development project experience in various forms.</p> <p>Partnership outline</p> <p>The success of MCCT’s work in local schools is evidenced by the references attached.</p> <p>MCCT seeks funding to extend the Kia Mahi Tahī programme into another school by</p>

the appointment of a new half time, community development project worker who will follow Kia Mahi Tahī programme principles and spend a significant amount of time embedded in the school as a mentor, coach, and support for staff and students. This work will not deliver core curriculum subjects or duplicate the work of Government social agencies.

MCCT is keenly aware of the challenges faced by Maungakiekie Tamaki ward schools in engaging with parents who are shy, struggle to express themselves in English and often do not interact with the school.

This position will address these issues and contribute towards solutions. It will incorporate an emphasis on facilitating parent/community engagement with the host school and assist parents to interact with government agencies where there is need.

It is hoped that Panama Rd School will partner with MCCT. The school serves the Riverside community within which both Pacific and Maori communities are isolated by clear geographic boundaries, and other dynamics.

Riverside - Ethnicities

MCCT does not have the budget to obtain data from Statistics NZ as to ethnic composition of local mesh blocks, however a 2008 study of the Riverside Community by Dr Mark Foreman noted the following

European 22.8%	Maori 19.7%	Pacific Island 52.6%
Asian 1.6%	Middle Eastern, Latin American, African 1.6%	

Here Housing NZ's (SHA) Special Housing Area redevelopment impacts local family accommodation, where occupancy has long exhibited a strong transient pattern affecting community stability. This feature along with cultural, economic and social influences is a strong dynamic affecting school attendance, learning and educational achievement.

The project may provide additional opportunities during school holidays to produce some practical research into these issues.

The target school will be confirmed as soon as possible. If Panama Rd School does not wish to pursue the opportunity MCCT will seek partnership with another local school.

MCCT's existing employment infrastructure can be leveraged to create a sound employment relationship and MCCT would commence the process of recruiting a skilled person upon approval of funding.

Outline of need for the project

MCCT is aware through agency networks e.g. Tamaki Community Policing and Security Liaison Group, Police, CAB, CYF, Police, youth justice, students and schools, (especially) as well as by professional counselling, of many local people needing mentoring, support and encouragement which is often lacking at home for various reasons.

Local adults often have serious emotional and psychological injuries. Risks to young people include self harm, depression, suicidal thoughts, abuse, hazardous environments and low scholastic achievement.

MCCT has commissioned formal social research previously (E.g. The Riverside Community Report – Dr Mark Foreman). This research focused on identifying community development issues of concern for Riverside residents. It was consultative with emphasis on primary data.

Dr Foreman's qualitative study examined Riverside community's desires to improve itself, with help. It found that community aspirations and the relevant importance placed on many and various perceived needs were broad.

What was abundantly clear is that residents had a profound sense of need which

	<p>embraced social, environmental, economic, recreational, health and safety issues. Also clear were desires to invigorate community spirit, collaborate, find help and to see initiative.</p> <p>How we know the community is likely to support this project</p> <p>At last year's Hauora (health) Day held at Riverside Community Centre, MCCT surveyed attendees as a preliminary step in sampling current community desires.</p> <p>We asked respondents how far they had come since Dr Foreman's research and what they thought would be important actions/activities of a community worker, if the community had a community project worker. We found that most respondents lived less than 5 km away. Amongst other issues respondents rated the following as important -</p> <ol style="list-style-type: none"> <li>1. Be a support person at appointments with agencies like WINZ, Youth Justice, Housing NZ</li> <li>2. Finding somebody to help me with tasks I find difficult</li> <li>3. Helping us plan our own community projects.</li> <li>4. Guiding us in getting organised</li> </ol> <p>It is reasonable to conclude:</p> <p>A) that this community has a current collective desire for a community worker to operate in this neighbourhood to help residents in numerous ways, and</p> <p>B) that more extensive conversations should take place around the desires of this community for a project worker</p> <p>Alignment with MTLB outcomes</p> <p>This Kia Mahi Tahi community uplift partnership focuses on MTLB's objective of enabling strong and thriving communities to participate, celebrate and contribute.</p> <p>This project would also align with MTLB's priorities concerned with Youth, and Maori – especially through local schools</p> <p>This project also aims to assist:</p> <p>Students to develop learning skills, individual and team sports skills,</p> <p>Students to develop fitness, character discipline, planning, and preparation skills.</p> <p>Students and school staff to increase their ability to cope especially in stressful situations.</p> <p>Students to gain more understanding of themselves, experience in collaboration, a bigger view of life in another community and respect for healthy competition.</p> <p>Students to develop better socialisation skills and improved learning</p> <p>MCCT would be looking to continue its engagement with community stakeholders particularly residents and would be likely to seek informed input from ADHB, CYF, Housing NZ, health agencies, (local) professional counsellors, budgeting services, WINZ, Police, youth justice, church fellowships and schools. The project would seek to complement (not reproduce), their work, and to avoid taking on their strategic positions.</p>

<b>Project Title</b>	St Georges Rowing Club Building Upgrade
<b>Project Location</b>	104 Kings Rd, Panmure
<b>Project Description</b>	<p>St Georges Rowing Club is a community based rowing club with over 160 members ranging from the age of 12 to 80 years old. It has been physically located on the Tamaki River at the end of Kings Rd, Panmure since 1949 (67 years). The Club is one of the oldest sports clubs in New Zealand formed in 1883 (133 years old) .</p> <p>The rowing club attracts people from schools and adult rowers from the surrounding area. The club has experienced significant growth with currently over 160 paid members. On a weekly basis over 250 people (students, masters rowers and parents) use the Club. Much of the current rowing club building is still the original building that was transported from Mechanics Bay to the current site. The wooden floors are rotting, the roof is leaking and the space means we have boats stored on the outside of the club and some boats have to be stored back at the schools. We have well outgrown our current facilities.</p> <p>Our vision is to upgrade the Club buildings so that we can continue to maintain and grow our vibrant club, at least to properly meet current needs, catering for rowers of all cultures from the community and across all ages. St Georges Rowing Club is an example of young and old sports people working together to the betterment of the rowing community in the area. The club wishes to continue to meet the sporting needs of our community.</p> <p>The actual project should cost no more than \$870,000 to replace one end of the existing club rooms with a 2 storey insulated structure (needs based building) and to reroof and rereck the boat storage areas.</p> <p>Part of our draft plans are attached and in order to further this project St Georges Rowing Club is requesting assistance for the purpose of obtaining a Resource Consent. We seek a total of \$31,000 to facilitate a Resource Consent application.</p>

<b>Project Title</b>	Servicing the Growth
<b>Project Location</b>	Panmure
<b>Project Description</b>	<p>For 26 years now Tamaki Outrigger Canoe Club has been operating out of the Panmure Wharf reserve providing the opportunity for youth and adults to learn and participate in the fantastic sport of Wakaama.</p> <p>Over those many years our numbers have fluctuated up and down yet were quite manageable. However the last three years we have to sustain the growth not only in our club paddlers which now sit at 100+ which all attended the National Wakaama Sprints Championships, but also the number Schools we have assisted over the years, this year we our schools program included three Colleges with 50+ students which all attended the Auckland Secondary School Champs, which all three schools made it to plate finals. We now find we need more resources ie Waka, both 6 man and single. We are applying to for funds to purchase 2 x W6 mahi mahi Canoes and 6 x W1 Fai canoes the addition of the 2 W6 canoes will help considerably with being able to get more on the water at a time, so that training isn't broken up with swapping paddlers in an out and with teams getting used to having waka to race against. The Single waka be used to increase the opportunities for our paddlers with in the sport, they will also be used as a training tool which has been shown over the years those teams who's paddlers train on W1 increase there chances in being successful in W6 and we all want the chance to be successful.</p>

<b>Project Title</b>	Dance Therapy
<b>Project Location</b>	Studio and theatre
<b>Project Description</b>	<p>The International Folk Dance Association of New Zealand (IFDA) is a non-profit arts organisation. The Association was formed in 2013 by a group of dance educators, dancers and dance lovers. Membership is drawn equally from the dance professions, and has grown from an initial 12 members to over 100 members at present.</p> <p>The Mission of our association is to foster international arts creative exchange, deepen understanding across cultures, and create ties between New Zealand artists and communities and counterparts abroad. International arts exchange is fundamental because it creates an environment for genuine compromise and conciliation, enhances the education of all citizens. Valuable cultural exchange is mutual and offers the opportunity for deeper and prolonged commitment between artists and encourages responsible global citizenry.</p> <p>One of the goals of IFDA is to concern about community welfare by voluntarily performing for charity events and international cultural exchange, and we think we can use our skills and gifts to help people who are suffering from mental illness. According to a report from Mental Health Foundation Of New Zealand, in the 2012/13 New Zealand Health Survey, one in six New Zealand adults (16%, or an estimated 582,000 adults) had been diagnosed with a common mental disorder at some time in their lives (including depression, bipolar disorder and/or anxiety disorder).Six percent of New Zealand adults, or more than 200,000 adults, experienced psychological distress in the last four weeks. (People experiencing psychological distress are highly likely to have an anxiety or depressive disorder.) In the very recent years, we found that many people have got helped from dance and movement therapy.</p> <p>Dance therapy is based on the empirically supported premise that the body, mind and spirit are interconnected, and as the psychotherapeutic use of movement to further the emotional, cognitive, physical and social integration of the individual. Dance/movement therapy is:</p> <ul style="list-style-type: none"> <li>• Focused on movement behavior as it emerges in the therapeutic relationship. Expressive, communicative, and adaptive behaviors are all considered for group and individual treatment. Body movement, as the core component of dance, simultaneously provides the means of assessment and the mode of intervention for dance/movement therapy.</li> <li>• Is practiced in mental health, rehabilitation, medical, educational and forensic settings, and in nursing homes, day care centers, disease prevention, health promotion programs and in private practice.</li> <li>• Is effective for individuals with developmental, medical, social, physical and psychological impairments.</li> <li>• Is used with people of all ages, races and ethnic backgrounds in individual, couples, family and group therapy formats.</li> </ul> <p>In the past few years, there are many people testimonies for dance and movement therapy, as quoting from Dance Therapy NZ website, “The programme exceeded their hopes. The therapist is very positive and skilled at including my son. We also met lovely parents who understood ASD and its reality which made it a relaxing place. It was therapeutic for me as well.” –mother of 5 year old</p> <p>“My son is on the autistic spectrum, has ADHD and other learning difficulties. The class he attends with DTNZ is teaching him skills he would not learn anywhere else- social</p>

	<p>awareness, appropriate behaviours in different circumstances, how to concentrate, follow instructions and how to self regulate his behaviours in different circumstances in a fun environment where he gets to interact with children similar to him. What he learns in this programme has a follow on affect when he is at school and in his social interactions with his peers which have always been difficult for him“–mother of 8 year old</p> <p>What makes us so wanting to do this? A little story must be told here. On Tuesday 15 March 2016, carrying our curiosity of the tittle “Dance Therapy”, we attended a fraternity of infantile autism family. Unexpectedly, we met an old friend who has been knowing for many years was there too, we were so shocked to see her there. She told us, her 16 year old son is suffering from autism, for theses so long time she never mentioned about it to anyone out of her family and the group. Not because it’s a shame that his son cannot enjoy the life like other teenagers, but since she doesn’t want to show her pitiful circumstances to the outside people. Nobody shares her burden. Maybe it’s a bad habit that Asian families always hide their issues, problems and weakness in front of people, because they feel that’s a bad thing to lose their faces, so that they missed a lot of chance to get helped. This friend told us that her son has been treated by dance therapy for a while, and it works quite well, the son enjoy the connection between his mind and his body through the movements . See from this case, we can’t help ourselves to think there are many people like her and her family have trapped in to this situation, we want to help, to open up a connection for them, because dance brings people together. Therefore, we want to devote ourselves in this field, to help people by art, it’s a great thing for artists to do.</p> <p>We want to use this gift helping people who are suffering from mental disorder. Since we have dance and body language background, we’re confident that we can understand the connection between human body and mind more than other people. However, we still need some professional training of dance therapy, particularly in the side of psychology. Thus we ask for fundings mainly for three purposes, firstly we want to train 6 of our dancers be more professional in the field of dance therapy; Secondly, a more suitable and hazard-less space is needed, as considering of the safety issue; Thirdly, we will make a ticket free show to let more people know about the thing we are doing, to let more families get helped. Further more, at this stage we have contacted Dance Therapy NZ to cooperate doing projects, performances, combine classes in the recent future, so we hope to get supports from Auckland Council and relative communities.</p> <p>So far, we have done some charity performances and activities. In 2015, in association with Foundation of Youth Development and Children’s Autism Foundation, we performed contemporary dance “Open Your Heart” for the fund raising for children with autism. In the Love My Family – Maori Chinese Cultural Exchange Day, we taught Maori artists about Chinese folk dance and we learnt Haka from them in return. We also participated in Chinese Day at University of Auckland childcare centre, and introduced Chinese folk dance to young children. In 2016, IFDA performed at the Eastcliffe Retirement Village, point chevalier library and Avondale library in Auckland.</p> <p>Currently IFDA is a youth ensemble full of energy, happy to collaborate with all people and foreign artists and passionately spreading cultural diversity in the modern open world. We aim to bring inspiration by introducing variety folk arts, folk dances and artists to this country to create a more dynamic artistic environment and harmonious living environment.</p>

<b>Project Title</b>	Multi-ways to connect Pacific Families of Maungakiekie-Tamaki for Common Good
<b>Project Location</b>	1/14 Waiapu Lane Onehunga, Onehunga Community Centre, Langimalie Community Garden.
<b>Project Description</b>	<p>We would like to reveal the reality and beauty of nature in Maungakiekie-Tamaki by increasing Pacific community cohesion building participation, contribution and celebration with our local project and activities working closely with the Local Board to monitoring performance for improvement and to flourish.</p> <p>We want to connect more organisations to work together for the benefit of Pacific families in our community, at present we connect to the Tongan Health Society with our 4 plots of kumara garden at Langimalie Community Garden. We connect with Tamaki Wrap of Glen Innes in our common goal for waste minimization and the campaigning for no plastic bags, we have sewn 750 bags for Tamaki Wrap to support the plastic bags campaign by giving away free bags. We had a meeting to partnership with Tamaki Wrap and Salvation Army making the availability and accessibility of valuable resources from our resource recovery centre. We are aiming at saving more valuable waste in Maungakiekie-Tamaki region, supporting each group service from this recovery resource centre.</p> <p>We also have a collaboration project 'The exchange Collaborative ' with Auckland Regional Migrant Services, NZ Ethnic Women Inc, Inner City Women's, Positive Women and the Red Cross. "The exchange collaborative is an emerging project that has been incubated by a project group through series of clinics on collaboration provided by Sky City and delivered by Auckland Communities Foundation and the New Zealand Leadership Institute". We agreed to 4 domains of housing, transport, work and neighbourhood to test and refine prototypes and with key underpinning factors to effective communication that enables 2 way understanding and information exchange.</p> <p>We have the skills and space to activate social enterprise through coaching and providing innovate programmes and initiative. We can make the real space available for more sewing needs in Maungakiekie-Tamaki community which and to save a lot treasures and valuables clothes. We can connect the local skills then to update Pacific skills in doing and practicing to exchange language barrier with active participation.</p> <p>We have started a kumara project with more than 20 households supported by the Local Board and found out the love for gardening and volunteering in the community. All we need to do is to educate and inform Pacific people with relevant information ensuring they understood, guide them with gardening information encouraging to show their gardening skills from planting to harvesting. Even though we focused on planting kumara, there are more interests in planting taro, different vegetables and herbs and flowers. We can educate and inform more Pacific families to use bokashi bin to recycle food scrap at home then to use for the garden.</p> <p>When our Pacific community feel strong and confident they participate, contribute and be ready to celebrate. The beauty of a healthy environment is revealing from a healthy community, they enjoy and have fun because they have the right ability to work with the Local Board to fulfill significant plans for Auckland and New Zealand.</p>

<b>Project Title</b>	International Folk Dance Festival
<b>Project Location</b>	ASB Showgrounds or Theatre
<b>Project Description</b>	<p>The International Folkdance Association of New Zealand (IFDA) is a non-profit arts organisation. The Association was formed in 2013 by a group of dance educators, dancers and dance lovers. Membership is drawn equally from the dance professions, and has grown from an initial 12 members to over 100 members at present.</p> <p>The Mission of our association is to foster international arts creative exchange, deepen understanding across cultures, and create ties between New Zealand artists and communities and counterparts abroad. International arts exchange is fundamental because it creates an environment for genuine compromise and conciliation, enhances the education of all citizens. Valuable cultural exchange is mutual and offers the opportunity for deeper and prolonged commitment between artists and encourages responsible global citizenry.</p> <p>The vision of our association is to provide opportunities for self-expression, bringing the inner world into the outer world of concrete reality. They are languages that all people speak that cut across racial, cultural, social, educational, and economic barriers and enhance cultural appreciation and awareness. Folk dance integrates mind, body, and spirit, IFDA wants people to feel the magical power of such dance genres.</p> <p>The first goal of IFDA is to make a restorative confidence and the transforming power of dance for all people. IFDA understand while many of us have the opportunities to participate in dance for performance and recreation, people with disabilities are not have the same chance. Partly because the promotion and resources for integrated dance for disabilities are scarce. IFDA is also going to create a dance programme for people with impairments by considering three main aspects: visible, accessible and viable. Firstly, we will make sure that the dance is suitable for all ages and abilities; Secondly, our dance educators have the knowledge and experiences in teaching people with disabilities, and ongoing training will be supported; Thirdly, the dance spaces will be adequate to fit 20 people and wheelchair access is available; Finally, we will stay connected with organisations and partnership with Dance Aotearoa New Zealand will be developed and utilised.</p> <p>The second goal of IFDA is to concern about community welfare by voluntarily performing for charity events and international cultural exchange. In 2015, in association with Foundation of Youth Development and Children's Autism Foundation, we performed contemporary dance "Open Your Heart" for the fund raising for children with autism. In the Love My Family – Maori Chinese Cultural Exchange Day, we taught Maori artists about Chinese folk dance and we learnt Haka from them in return. We also participated in Chinese Day at University of Auckland childcare centre, and introduced Chinese folk dance to young children. In 2016, IFDA also performed at the Eastcliffe Retirement Village, point chevalier library and Avondale library for promotion of international folk dance in Auckland.</p> <p>We strive to include creative works based on authentic ethnic sources in our repertoire. Our purpose is to spread folk culture to a modern audience in New Zealand and abroad with the help of folk cultures and folk dances. We successfully</p>

	<p>hold a showcase "The Oriental Dream", based on Chinese folk dance, engaged with Indian dance, Middle Asian folk dance, Korean folk dance, Hip-Hop and contemporary dance. We raised our own funds in order to participate more people in the event. Through the effort that dancers, staffs and volunteers made, we eventually had free entry for every audience. It's a big step for us to organize a show independently like that, also it proves that we are on progressing. We have the ability to make it better and more professional, so we're inviting more people from different ethnics, colours, ages and nationalities -- to get involved in our next show.</p> <p>For the International Folk Dance Festival, we are going to make a showcase which from immigrants' point of view about the development of arts in this land of New Zealand. From the ancient Maori art and cultural history, to the Britain colonizing, and all different races gradually came into this land, including, European, Indian, Chinese, Korean, Japanese, Middle East and so on. A timeline story will be told in the theatre and space, mixed with dance, drama, opera and film.</p> <p>Currently IFDA is a youth ensemble full of energy, happy to collaborate with all people and foreign artists and passionately spreading cultural diversity in the modern open world. We aiming to bring inspiration by introducing variety folk arts, folk dances and artists to this country to create a more dynamic artistic environment and harmonious living environment.</p>

<b>Project Title</b>	Mobile Casework and Counselling Clinic
<b>Project Location</b>	All suburbs within the Maungakiekie council district limits
<b>Project Description</b>	<p>The Maungakiekie- Tamaki area houses the most vulnerable women and children from Asian, African, Middle-Eastern communities that we service. The issues we have found over 20 years of community work is around community wellness and the lack of an approach that would enable access to vulnerable families as close to their doorstep as possible. What we hope to achieve through our project, corresponds with Auckland City Councils vision for the area, which is about involving local communities and agencies, building the capacity of the communities we serve and providing a coordinated response to communities at risk.</p> <p>We are keen to set up and operate a mobile casework and counselling clinic. This project is born out of our past working experience with migrant and refugee women within Auckland who we have found are unable to reach us because of being subject to power and control issues and/or abuse within their homes as well as isolation. Through the mobile clinic we hope to enable women to overcome barriers imposed on them and provide services that can be easily accessed directly. Shakti envisions achieving overall community wellness and social change for the Maungakiekie-Tamaki area where families can live in violence free communities. This application is from our Shakti Asian Women's Centre which is based in Onehunga and has been servicing the area from the late 90's.</p> <p>Currently we service 15% of women from the Maungakiekie district from the suburbs of Onehunga, One Tree Hill, Mt Wellington, Panmure, Penrose, Royal Oak and Glen Innes. From our work experience in the area, there are still a significant number of women who are not able to access the critical services we offer.</p> <p>Domestic and Family violence is a growing issue in our society, statistics show that 1 in 3 women are victims of domestic violence. Migrant and refugee women are at a heightened vulnerability as in addition to domestic violence, they are also victim to other forms of culturally sanctioned abuse such as dowry abuse, and honour based violence and underage / forced marriages. Women find it difficult to leave abusive relationship because of isolation, power and control, lack of financial resources, fear and stigmatization. This can also result in inter-generational cycle of violence where children may incorporate abusive behaviour into their daily lives or normalize abusive behaviour. Survivors also experience health problems, physical disabilities, post-traumatic stress disorders and poor ability to create healthy relationships. As a result of abuse and inter-generational cycle of violence, families are not able to live and thrive in the local community.</p> <p>Shakti has been providing culturally specialist family violence intervention and prevention services for over 20 years in New Zealand. Our women's centre based in Onehunga carries out case-management, specialist advocacy (housing, WINZ, medical care, legal representation, immigration), counselling and translation, runs a 24/7 multilingual crisis line (0800 SHAKTI) as well as accommodation support and life skills programmes. The critical point of difference between Shakti and other mainstream provider agencies is that our focus is towards supporting families of Asian, African and Middle-Eastern backgrounds. The migrant and refugee women</p>

	<p>that we service from the Maungakiekie region, are often in positions where either they are either unsafe, trying to break away from situations of domestic violence, or experiencing cases of severe isolation with no personal support networks. In addition to this, the women we support often have difficulties in seeking our help without eluding their abuser; there is great fear and anxiety in making this initial contact for help. Even venturing outside or too far from home can put a client at risk, so they are unable in these circumstances, to seek our services. These services are vital in breaking the cycle of family violence and building on the process of creating safer and healthier families and communities.</p> <p>Our Mobile Casework and Counselling clinic, will deliver an outreach service, to the most vulnerable by travelling directly to them, or an alternative safe location within close proximity of where they live. By providing these services, we would be working together with the council to improve the wellbeing, wellness and safety of families within the Maungakiekie suburbs. We would like to add that if men require counselling services, we would make appropriate referrals to our Family Centre.</p> <p>The counselling will be carried out by a volunteer counsellor who will carry out weekly counselling sessions and casework sessions will be carried out by a caseworker/social worker at an appointment basis. This initiative also includes caseworker volunteer expenses for our crisis line, our first point of contact for the women survivors of violence that we service. The crisis line does risk assessment and subsequently will refer the clients as needed to the mobile clinic. Volunteer caseworkers who manage crisis line are drawn from the local communities, as is our volunteer counsellor with Shaktis work being primarily centred around the community development model. Partnerships and services will be maintained with CAB, medical centres and local community agencies in an effort to collaborate with local communities. In aid of this, we will be printing and distributing promotional material about the mobile clinic, to assist with referrals and outreach through these agencies. We would also like to showcase the support of the Council by including the Auckland City Council logo in these publications.</p> <p>We believe that through this project, the capacity in our communities will be strengthened to sustain a Maungakiekie-Tamaki area free of violence.</p>

<b>Project Title</b>	Tamaki Empowerment
<b>Project Location</b>	Various, by agreement with the Local Board
<b>Project Description</b>	<p>We envisage a Maungakiekie-Tāmaki area where residents are empowered to contribute, participate and celebrate their communities through improved financial literacy for low income people and families.</p> <p>There are a number of social issues within the Local Board’s operational area that impact negatively on the residents. These issues are primarily driven by poverty and deprivation.</p> <p>We would like to address some key issues by educating and empowering community members to make better choices. We therefore propose providing several half day events on a Saturday or Sunday with a number of small workshops around specific life skills issues for those living with low incomes for example:-</p> <ul style="list-style-type: none"> <li>• Clothing trucks and buying on credit (consumer rights)</li> <li>• Borrowing Money (CCCFA and hardship)</li> <li>• Buying vehicles on hire purchase (consumer rights and risk management)</li> <li>• Making ends meet (budgeting with East Auckland Budgeting service and G-FIT)</li> <li>• Adult Literacy (with English Language Partners and Adult Literacy Tamaki)</li> </ul> <p>These areas focus on our experience of the most common issues and align quite well with the Tamaki Regeneration work on the need for improvements to consumer’s financial literacy in Tamaki.</p> <p>To deliver this adult learning to the Tamaki community we will need to provide inducement for community members to attend the proposed events. For low-income residents we are mindful that their day-to-day activities may be governed by their immediate needs of feeding and clothing themselves and their families.</p> <p>We believe that the key to success would be a “Free Hot Lunch” for all attendees and their families as well as providing activities for children to allow parents to participate in the workshops, these would also be the major part of the cost.</p> <p>This formula has been used successfully in the past. Josephine Bartley ran a similar successful event in Otahuhu a few years ago and the team would be keen to emulate her success.</p>

<b>Project Title</b>	Have a Go at Netball
<b>Project Location</b>	Te Papapa School, Oranga Primary School, Onehunga School, Sylvia Park School, Panama Rd School
<b>Project Description</b>	<p>We would like to roll out a 'Have a Go at Netball' programme into low income communities to increase child participation in Netball.</p> <p>These programmes would be run at various schools listed below, making it easily accessible to children in that community. We want to offer this programme for free so there are no boundaries for children to attend. They will be run on a weekend day for 3 hours, opening up the opportunity for children in that community to have a go at Netball. These schools currently have little or no participation in Netball.</p> <p>At Auckland Netball we are the leader in netball development in the Northern Netball Zone having delivered programmes in schools and at our centres since 2003. We work with Sport Auckland delivering programmes at schools in different clusters around Auckland. The communities we would like to offer these programmes to are different to the schools we deliver Kiwisport in, leading to us wanting to give them equal opportunity to participate in netball. Schools have been very open to us delivering programmes as children have really benefited from them.</p> <p>Once children have had the chance to participate we are able to support the growth of netball in their communities through our Auckland St Johns Club held at both St Johns and Windmill Rd. We also offer ongoing skills workshops at our venues and can continue to offer these at their schools.</p> <p>We would like to see every child have the chance to play Netball and by running this programme, it will introduce more children to the sport, especially Migrants and those of Maori and Pacific Island ethnicity.</p> <p>The areas we will be targeting have high ethnicity groups which we are encouraging to participate in sport and have a healthy lifestyle from a young age. We recognise obesity and diabetes numbers are rising and by giving these individuals the opportunity to be active will help long term with these problems.</p> <p>We believe this project would be beneficial to these children as it is getting them participating in physical activity while showing them that playing sport and being active can be fun.</p>

<b>Project Title</b>	Langimalie Jordan Avenue Community Garden – Onehunga (Phase 2)
<b>Project Location</b>	Jordan Avenue, Onehunga, Auckland
<b>Project Description</b>	<p>Mission Statement</p> <p>Our mission is to develop a hub for the local community, whereby they are empowered to strengthen their relationships through the use of the community hall and gardens for the production of vegetables and fruit.</p> <p>Overview – Vision and Goals</p> <p>The Langimalie Jordan Avenue Community Garden provides an opportunity and space where local communities in the Maungakiekie-Tamaki Local Board are able to create healthy natural environment for the local communities to enjoy, an environment that supports and strengthens community relationships and culture, encourages participation and contribution to stronger and active community, and creating recreational facilities and activities to promote healthy lifestyles and enhance well-being.</p> <p>In contributing to the local board outcomes above, the Langimalie Jordan Avenue Community Garden vision and goals plan to build a greenhouse to distribute vegetable seedlings and fruit plants to the community, build a veranda next to the community hall, and increase the number of vegetable plots.</p> <p>This project involves:</p> <ol style="list-style-type: none"> <li>1) Building a portable greenhouse of the property will enable vegetable seedlings and fruit trees to be distributed to members and the local community.</li> <li>2) Building a covered but open plan veranda joining to the community hall will help bring the local community together and create a friendly environment. It will provide protection for families from the sun or rain while gardening. It will have chairs and tables for families to sit on. The community hall will also have heat pumps to warm it up during the winter season.</li> <li>3) Increasing the number of vegetable plots will allow those families who do not have any section to be able to plant vegetables onsite. Vegetables are essential in developing healthy communities.</li> </ol> <p>Creating a healthy environment and providing a facility allows the local community to foster, empower, and strengthen relationships, and in the long term it helps achieve the local board outcomes.</p>

<b>Project Title</b>	Dress for Success' Professional Women's Group ( PWG)
<b>Project Location</b>	4 Boston Rd Mt Eden
<b>Project Description</b>	<p>Our Professional Women's Group Programme ( PWG) is one of three community programmes we run. It provides valuable community support resources and leadership skills for women who have been through our dressing programme and have successfully secured employment. The group meets monthly in our Mt Eden premises. We provide speakers, workshops and training and support. The primary focus of the programme is to ensure women are empowered, are leaders and role models and are able to fully participate and celebrate their role while contributing to a strong healthy community.</p> <p>This project meets the Local board outcome around creating strong and thriving communities that are enabled to participate, celebrate and contribute.</p> <p>One of the aims of the PWG is to foster leadership skills, enabling the women to become leaders within the community, thus developing and encouraging community participation. We know that many families within the community are struggling financially and our aim is to not only empower them into financial independence but to 'give back' to the community. We do this by leading a</p> <p>CAP (community action project) each year which means women engage and collaborate with other organisations within the community to address a community identified need. Our clients become strong role models encouraging other women to be self-sufficient and to participate positively within the community. Many of our clients are mothers, and we support these women to provide for their families which strengthens family well-being, promotes wellness and develops strong communities.</p> <p>With over 300 referring organisations across Auckland, Maungakiekie -Tamaki is one of our top 5 local board referral areas producing up to 68% of our clients and their families.</p> <p>Our volunteers are largely centrally based and on average would comprise of up to 43% from the Maungakiekie-Tamaki area, we access the community and encourage participation with our large pool of over 120 active volunteers who roster on every day, six days a week further building the capacity of the community.</p>

<b>Project Title</b>	Resource recovery group to empower Glen Innes community
<b>Project Location</b>	Glen Innes
<b>Project Description</b>	<p>Founded in 2013 as a result of community discussion in Mt Roskill for 3 years, Earth Action Trust is working towards realising an environmentally and economically sustainable local community.</p> <p>We are now part of the Community Recycling Network Aotearoa and building our capacity to operate a community recycling centre in partnership with other community groups, aligning with the Auckland Council's "zero waste by 2040" vision. Our current and upcoming programmes include garage sale, sewing group, repair shed, and educational presentation, all of which focus on waste minimisation. While doing so, however, we are also trying to address our economic, social, cultural, physical and mental issues in the community. Our programmes are directed at empowering the marginalised by increasing connectedness, developing unutilised skills and talent, and creating the opportunity to earn additional income.</p> <p>Our unique strength as a migrant-led organisation is that we are highly experienced in dealing with people from migrant and former refugee backgrounds. Agnes Granada, Coordinator, and Tatsuo Nishimura, Project Officer, were former staff of Migrant Action Trust and have a close relationship with the ethnic migrant community.</p> <p>Now we are looking for the opportunity to have a wider reach to promote environmental awareness more at the community level. Thus we would like to set up our sewing group (we call it "Resource Recovery Sewing" programme) in Glen Innes, an area comparable to Mt Roskill in terms of socio-economic situation, in partnership with local groups.</p> <p>At the moment, a programme coordinator who runs a pre-school education programme at a primary school in Glen Innes is interested in our sewing programme. Also, we have got in touch with the Glen Innes Business Association and a marae in the area, asking them to refer to us a potential collaborator.</p> <p>Our "Resource Recovery Sewing" programme is a social enterprise that uses unwanted fabric and sewing resources and diverts them from going to the landfill. The members make eco-friendly fabric products (e.g. printed shopping bags) to replace artificial, synthetic products including plastic bags that are potentially harmful to the environment.</p> <p>We would like to see local people, including mothers with young children, solo-mothers and the retired people from diverse cultural backgrounds, come together and work together. Group members will receive instructions and aim to produce fabric products that can sell.</p> <p>Trainer/mentor from Earth Action Trust will explain our environmental cause, share our experience, and provide sewing resources to facilitate members' activity at the initial stage. Then we will gradually leave the operation in Glen Innes to the collaborators' discretion, while monitoring the progress of the programme.</p>

	<p>As a social enterprise, we will sell sewing products at different channels. They include community events around Auckland, pre-orders from our associate group, and online retail store. Group members will be paid based on the sales made or hourly rate.</p> <p>Beside environmental benefits, the activity can bring benefits to the community in different ways. It can increase member's sense of purpose and belonging, boost their creativity and wellbeing, and create self-employment for those interested.</p> <p>Apart from our sewing programme, we are also hoping to introduce the following programmes to the Glen Innes area in partnership with the same groups.</p> <p>1) Zero Waste Home</p> <p>Our coordinator Agnes Granada delivers an awareness raising presentation with a focus on sorting rubbish from source. This programme includes practical training and waste audit of participants to promote the habit of reduce, reuse and recycle, which can lead to waste minimisation in the community. She is always prepared to speak in a culturally appropriate manner that respects the audience's cultural values. This programme can also be modified to fit children.</p> <p>2) Bike 4 Refugees</p> <p>This is our upcoming programme in partnership with Refugee as Survivors. We will supply unwanted bicycles for reuse to people from former refugee backgrounds (mainly to the newly arrived). This programme also promotes cycling as an alternative to driving, which provides a more eco-friendly way for fun, fitness and commuting.</p>

<b>Project Title</b>	Oranga School Holiday Programme
<b>Project Location</b>	Oranga Community Centre, Waitangi Road, Oranga, Auckland
<b>Project Description</b>	<p>We would like to facilitate a school holiday programme at the Oranga Community Centre during the school holidays. At present there is no such programmes in the area to cater for the increasing numbers of kids and their families surrounding the Community Centre. There are also two primary schools (Oranga Primary &amp; Te Papa Primary &amp; One Tree Hill College) within walking distance and all don't offer any programmes for the students during the holidays. So there is a great need to provide a place where they can be more productive, learn, keep fit and be part of workshops to encourage them to be proud and take ownership of their community and its facilities.</p> <p>We would like to run a free weekly (Monday to Friday) 4 hour programme that offers Arts &amp; Crafts, Sports, Educational, Food and Fun activities for the kids. The programme will run from 10am to 2pm daily. Also outdoor activities which promotes team play, wellness and safety in outdoor environments. We will also be offering lunch for every kid that attends.</p> <p>We would like to run this programme at every holiday period of the school calendar for the next two years at least.</p>

<b>Project Title</b>	Club Signage and Information Board
<b>Project Location</b>	St Heliers
<b>Project Description</b>	<p>The St Heliers Tennis Club (SHTC) has a long and proud history. It has recently celebrated 100 years of tennis and is protected by a special Act of Parliament; the Auckland City (St Heliers Bay Reserve) Act 1995, which vests certain reserve management responsibilities with the Auckland Council. The SHTC was incorporated in 1958.</p> <p>The Council in turn has adopted the “St Heliers Bay Reserve/ Vellenoweth Green Management Plan” after consultation with, among others, the St Heliers Tennis Club and this plan provides a framework for management of the reserve.</p> <p>The Club has seven well maintained synthetic grass courts with lights and well-appointed Club rooms built in 1998 which are admired by all visiting tennis players and supporters.</p> <p>The Club facilities are maintained to a very high standard through the voluntary efforts of club members. Club members regularly participate in Inter-club tennis programmes and there are currently more than 12 teams participating in 2016.</p> <p>The Club is very proud of the fact that it has two excellent professional coaches, Amanda Trail and Rachel Clarke who won the Tennis Auckland Club Coaches of the Year award in 2014.</p> <p>Agreement with Auckland Council:</p> <p>The Auckland Council's long-term lease arrangement, inter-alia, obliges the SHTC to obtain approval for any development of the Club facilities and this is currently being initiated. The hours the Clubhouse and court lighting may operate are also restricted. The Club's Public Liability policy is a joint Policy which also indemnifies the Council.</p> <p>Club Vision 2020:</p> <p>The club's current long-term Vision or Objective is to maintain the Club's well-earned reputation as the Eastern Bay's friendliest Tennis Club and to develop and maintain even better facilities and achieve much wider membership and a dynamic linkage to the St Heliers community.</p> <p>The stated Objectives of the St Heliers Tennis Club are to: “Encourage the growth and spread of the game of tennis and any other game or athletic sport which may conveniently be carried on in conjunction with”.</p> <p>The new Information Board will provide the ability to improve the Club's communication with both members and the wider community with regards upcoming sporting and social events. This will give the Club the ability to strengthen our ties to the local St Heliers community.</p>

<b>Project Title</b>	Dance and Arts Therapy Groups 2016-2018
<b>Project Location</b>	Dunkirk, Oranga, Riverside, Panmure and Onehunga Community Centres
<b>Project Description</b>	<p>Dance Therapy NZ has been running dance and arts workshops in the Maungakiekie-Tamaki Local Board area since 2013. In the financial year ending June 2015 we had 3,587 individuals attend our programs across Auckland, 62% of which were in the Maungakiekie-Tamaki area. Since then our programmes have grown and we anticipate this number being considerably higher in the year ending June '16.</p> <p>It is our vision to continue offering our existing workshops in this area, including STARS, Dance 4 Us and Arts 4 Us, and to expand on these by adding in additional programmes particularly in the Tamaki area where there seems to be considerable need. We aim to cater specifically for different ages and make the workshops more attend-able in terms of hours and convenience for low-income families.</p> <p>We currently offer three different programs in this local board area, with 5 group sessions being held each week during the school term and led by experienced, qualified dance and arts therapists. We envisage this expanding to 8-10 group sessions per week during the next two year period, based on current and projected community need.</p> <p>Our STARS dance program is designed for children and teens with disabilities including Autism, ADHD and other developmental disorders. The program offers children not only an outlet for creative expression and social inclusion, but is an ideal way for them to participate in the community in a safe, fun environment that caters for their unique needs. We currently have one group per week at Onehunga Community Centre.</p> <p>Our Dance 4 Us drop-in program is based on the same principles of creativity and social inclusion but is designed for adults with disabilities who may otherwise find it difficult to find meaningful ways to get out and about and join their local communities. We currently have one group per week at Pearce Hall, Onehunga Community Centre with 20+ adults attending weekly. There is a need to expand this to 2 sessions per week as the numbers sometimes reach 30+ and we are looking at Panmure Hall or Dunkirk as a possible venue to support communities in that area.</p> <p>Our Arts 4 Us drop-in art program is slightly different in that it targets school age children who may be at-risk or in low-income areas with few other purposeful, fun after school activities that allow them to express themselves creatively, build their confidence and to develop a healthy self identity. We have three groups per week at Dunkirk, Oranga and Riverside, with an average of 60 children total across the 3 groups each week. The Oranga group last term had over 30 children attending some weeks, and there is scope for a second session at Oranga.</p> <p>From helping children and adults with disabilities to access rewarding participation in their community, to providing a safe and creative space for children and youth in low-income areas to find their voice through art instead of violence, our organisation is committed to advancing the long-term needs of the local board area.</p> <p>Our programs have already become an integral part of the community centres they run out of, including the Dunkirk, Onehunga, Oranga and Riverside centres. Based</p>

	<p>on high demand for our programs, we are looking to expand to Panmure Hall and to increase the number of sessions offered each week.</p> <p>A partnership with the Maungakiekie-Tamaki Local Board would allow us the opportunity to expand our presence in the area and would help even more children and adults access our services, ultimately broadening the range of people we can support and empower through creative expression and community involvement.</p> <p>PLEASE NOTE: the total estimated running cost below is based on our funding plan which aims to raise funds from other funders not just the local board, in order to successfully deliver these programmes. The attached budget projection includes two additional group programmes per week in addition to the current programmes we are offering so allows for some expansion as our vision outlines.</p>

<b>Project Title</b>	celebration Chinese National Day and middle August Festival, 2016 Christmas Parade, and Chinese New Year Celebration festival
<b>Project Location</b>	Glen Innes, Panmure
<b>Project Description</b>	<p>Our aims will support Maungakiekie-Tamaki L/B plan: strong and thriving communities that are enabled to participate celebrate and contribute. Strong, healthy, and safe neighbourhoods where people are connected and know each other.</p> <p>There are 200 members in our Glen Innes Chinese Friendship Group which located in Maungakiekie-Tamaki area. Most of our members are from 65 to 85 years. We will organize Celebration Chinese National Day and middle August festival, and participate 2016 Panmure Christmas Parade, Glen Innes Christmas events, and 2017 Chinese New Year Celebration Festival.</p> <p>All of above projects/activities are over two-year partnership with Maungakiekie-Tamaki Local Board, We will invite other ethnic people to join in together with us who live in this area. We will invite Local Board members to join together with us in our festival.</p> <p>We will enhance people health, happiness, and connected together through our projects/activities. Our activities are twice a week regularly.</p> <p>So, the place to rehearse for our projects/activities are indispensable where is TE HURUHI trust (Grace International) in Glen Innes.</p> <p>Not only our activities regularly are strong and thriving communities but also our organization festival to contribution to communities in L/B area.</p>

<b>Project Title</b>	Stage 2B of the upgrade of the venue; installation of lights covering 5 courts including two futsal pitches & one pop-tennis court
<b>Project Location</b>	MWTC venue at 50 Dunkirk Road in Panmure (Mount Wellington War Memorial Reserve Area)
<b>Project Description</b>	With the addition of artificial lights to the existing venue, we will be able to offer year round facilities to the various user groups in the Maungakiekie-Tamaki area. The stage 2A renewal program finalised December 2015, has resulted in an increased usage from both individual members of MWTC as well as user groups from the community such as the Tamaki Community Development Trust and Sommerville Special School. We already know, there is a demand to be able to continue the activities once winter kicks in as expressed by Marist Rugby who wish to be able to plan dedicated skill training on the astro turf surface, our futsal academy which will be able to continue during winter months, as well as the adult futsal competition that's run on Wednesday nights. We also have been approached by several hockey groups about availability and AFF (Auckland Football Federation) has endorsed MWTC as a AFF Futsal center which will have year round, training and tournaments. The opportunity to provide the local community with all these options to enjoy the various sports (tennis, futsal, netball, basketball and pop-tennis) in a family orientated structure and at very affordable rates, is unique in Auckland and a great opportunity to aspire to a greater community feeling and healthier life-style.
