

Quarterly Ship Speed Report

Q2 - April to June 2016

Speeds this quarter continue to hold well under 11 knots on average. In June, we recorded the lowest ever monthly average of 10.44 knots and also the first month with no vessels above 18 knots. For comparison, in June 2015 the average speed was 11.35 knots. We continue to have good co-operation from shipping lines.
