Ōtara-Papatoetoe Performance Measure Results

1. Introduction

- The year-end outlook is for 60 per cent of targets to be achieved.
- The year-end outlooks show that three of the four measures for Parks, sport and recreation are unlikely to be achieved. Promoting our parks and facilities, and our programme of work to address quantity and quality of sports fields should help to lift our performance in this area.
- Percentage of visitors satisfied with the library environment, is expected to meet target.
 Daytime town centre safety is tracking below target. The Work and Income Ambassador programme in Hunters Corner, Ōtara and Old Papatoetoe town centres provides a great high-profile presence around town centres and works closely with the camera monitoring centres.
 Facility utilisation is on track to achieve target.

How we measure performance

The following symbols are used to indicate our progress against targets set in the Long-term Plan 2015-2015 (LTP).

	V	7	×	_
Achieved Target has been	Substantially achieved	Not achieved but progress made	Not achieved Target not	No result The measure was
met or exceeded	Target has not been met by a slim margin	Target has not been met but the result is an improvement from the prior year	achieved and prior-year result has not been improved	not surveyed or no result was available

Other considerations

Target setting

Performance measure targets are different for each local board. It is important to remember this when comparing results presented in the summary performance results table. Targets were set by considering service expectations as well as previous performance results.

As new performance measures were introduced in the Long-term Plan 2015-2025, some of the measures had no previous performance results. This made it challenging to set some of the targets. We will continue to refine future performance targets in the next long-term plan (for 2018-2028).

Results timeframe

We collect results at various frequencies, based on the nature of each performance measure. Customer satisfaction is currently measured by annual surveys, so we cannot provide a quarterly result.

The six performance measures in this report that have Q1 results are based on the actual results for July and August, and an estimate of September results. This was done to ensure timely information could be provided.

Year-end outlook

Each performance measure has been given a year-end outlook. This is our best estimate of what the result will be at year end, based on prior-year results and work that is underway.

2. Summary of FY16 performance results for each local board

3. Detailed Q1 performance measure results

Local Parks, Sport and Recreation

1. Percentage of residents satisfied with the provision (quality, location and distribution) of local parks and reserves

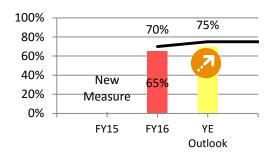

It is often difficult to carry out maintenance work on parks and reserves during the winter months without causing damage to the ground surface. Maintenance contractors are still required to do as much work as possible such as mowing frontages, berms and path edges without damaging the turf but in some sites it is just not possible to do much more. For this reason some members of the public may feel dissatisfied with the provision of parks and reserves in their area.

2. Percentage of residents who visited a local park or reserve in the last 12 months

A recent change to the survey question provided a way for participants to easily identify which parks belong to their specific local board area. This may help to explain the decline in performance, as many residents live near the fringes of their local board area and use parks in other areas. In FY17, promoting our parks and facilities is one strategy being used to help increase the proportion of the population who visit local parks.

3. Percentage of residents satisfied with the provision (quality, location and distribution) of sports fields

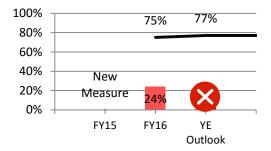

Due to the wet ground conditions over the winter period, it is necessary to restrict the use of all sports fields to avoid significant damage to the playing surface. In Otara-Papatoetoe, there are a high numbers of soil fields these restrictions have had an impact on the number of games that were able to be played in the season. This may result in dissatisfaction with the provision of sports fields in the area. We have a programme of work to address quantity of sports fields, but we are looking at ways to also improve the quality of surfaces and playing conditions.

Performance measure	YE	YE	FY17 Q1	FY17 Q1	FY16
	Outlook	Target	Result	Target	Result
Customers Net Promoter Score for Pool and Leisure Centres		+ 15	Measured	Annually	+ 53

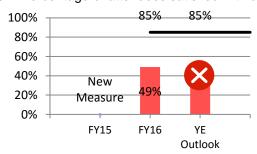

Local Community Services

5. Percentage of Aucklanders that feel connected to their neighbourhood and local community

People may not be feeling connected for a variety of reasons, including being new to the area, being too busy or preferring not to be connected. To a lesser extent there may also be lack of awareness about how to access activities that could contribute to feeling connected, and language and cultural barriers. A number of our activities such as arts programmes, community facility programmes and events seek to connect Aucklanders to their local communities. The empowered communities approach being implemented across these activities in FY17 aims to increase this.

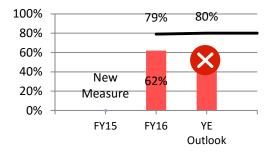

6. Percentage of attendees satisfied with council delivered and funded local events

This measure aims to survey at least two events annually for each local board area to assess attendees' views on a sample of events provided or funded by the council. Each year different events are selected to be surveyed, and as this decision has not been made yet, it makes it difficult to establish a forecast. However, if performance remains consistent with the previous year then the target will not be met. Feedback received from the previous year will be used to improve this result.

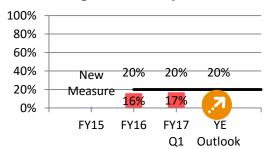

The outlook has been based on last year's result. This year's result will depend on what events are delivered, what events are selected for survey, the weather conditions, turn out and facilitation.

7. Percentage of Aucklanders that feel their local town centre is safe (day)

This measure is influenced by a number of elements such as crime rates, the built environment, and socioeconomic and other similar factors. The council undertakes projects and initiatives at a community and social development level to improve perceptions of safety. Ōtara Business Association has taken over the monitoring of Papatoetoe's public safety cameras to ensure a continuous service is maintained. The Work and Income Ambassador programme in Hunters Corner, Ōtara and Old Papatoetoe town centres provides a great high-profile presence around town centres and works closely with the camera monitoring centres.

8. Percentage of community facilities bookings used for health and wellbeing related activity

This is a new measure to establish our understanding of community facility activities that contribute to health and wellbeing outcomes. This data will be used by staff when considering facility work programmes for FY17 – staff now have a baseline figure and will aim to improve this by looking at the mix of activities being conducted at community facilities.

Performance measure	YE Outlook	YE Target	FY17 Q1 Result	FY17 Q1 Target	FY16 Result
9. Use of libraries as digital community hubs: Number of internet sessions per capita (PC & WiFi)		4.5	1.8	1.1	6.5

Number of visitors to community centres and venues for hire	✓	106,884	52,545	26,721	267,723

Local Planning and Development

19. Percentage of Business Associations meeting their Business Improvement District (BID) Partnership Programme obligations

Manukau Central BID, Ōtara BID, Old Papatoetoe BID and Greater East Tāmaki BID currently meet all of their accountability requirements under the BID Policy. Hunters Corner BID currently fulfils four out of five requirements and has received funding for a strategic plan to be developed.

Local Environmental Management
