

Franklin Performance Measure Results

1. Introduction

1. The local board agreements include level of service statements and associated performance measures to guide and monitor the delivery of local services. This report provides interim performance results and outlook information for Franklin Local Board's measures, showing how we are tracking for the third quarter of FY17.
2. The year-end outlook is for 50 per cent of measures to not achieve target.
3. All measures for local planning and development, and local environmental management are on track to be achieved, while there are some measures in local parks, sports and recreation, and local community services that need to be addressed.
4. Measures that are not on track to be achieved include:
 - Percentage of residents satisfied with the provision (quality, location and distribution) of sports fields. Due to the wet ground conditions over the winter period, it is necessary to restrict the use of all sports fields to avoid significant damage to the playing surface, which may result in dissatisfaction with the provision of sports fields in the area.
 - Percentage of funding/grant applicants satisfied with information, assistance and advice provided. To help improve this result, a series of community workshops is planned for FY17 to build community groups' capacity to submit quality applications and to provide further advice to applicants.
 - Percentage of Aucklanders that feel their local town centre is safe at night. This measure is influenced by a number of elements such as crime rates, the built environment, and socioeconomic and other similar factors. The council has advised Waiuku Business Association on ways to make effective use of their current public safety camera system and enable future connection to Pukekohe's system.

How we measure performance

The following symbols are used to indicate our progress against targets set in the Long-term Plan 2015-2025 (LTP).

				
				
Achieved Target has been met or exceeded	Substantially achieved Target has not been met by a slim margin	Not achieved but progress made Target has not been met but the result is an improvement from the prior year	Not achieved Target not achieved and prior-year result has not been improved	No result The measure was not surveyed or no result was available

Other considerations

Target setting

Targets were set by considering service expectations as well as previous performance results.

As new performance measures were introduced in the Long-term Plan 2015-2025, some of the measures had no previous performance results. This made it challenging to set some of the targets. We will continue to refine future performance targets in the next long-term plan (for 2018-2028).

Results timeframe

We collect results at various frequencies, based on the nature of each performance measure. Customer satisfaction is currently measured by annual surveys, so we cannot provide a quarterly result.

The six performance measures in this report that have Q3 results are based on the actual results for January and February, and an estimate of March results. This was done to ensure timely information could be provided.

Year-end outlook

Each performance measure has been given a year-end outlook. This is our best estimate of what the result will be at year end, based on prior-year results and work that is underway.

2. Detailed Performance Measure Results

Local Parks, Sport and Recreation

1. Percentage of residents satisfied with the provision (quality, location and distribution) of local parks and reserves

This is a large local board area, and ensuring each township has adequate reserves is not always possible within the funding envelope. It is often difficult to carry out maintenance work on parks and reserves during the winter months without causing damage to the ground surface. Maintenance contractors are still required to do as much work as possible such as mowing frontages, berms and path edges without damaging the turf but in some sites it is just not possible to do much more. For this reason some members of the public may feel dissatisfied with the provision of parks and reserves in their area. Comments were also received in FY16 regarding managing antisocial behaviour.

2. Percentage of residents who visited a local park or reserve in the last 12 months

A recent change to the survey question provided a way for participants to easily identify which parks belong to their specific local board area. This may help to explain the decline in performance, as many residents live near the fringes of their local board area and use parks in other areas. In FY17, promoting our parks and facilities is one strategy being used to help increase the proportion of the population who visit local parks.

3. Percentage of residents satisfied with the provision (quality, location and distribution) of sports fields

Due to the wet ground conditions over the winter period, it is necessary to restrict the use of all sports fields to avoid significant damage to the playing surface. In Franklin, there are high numbers of soil fields and these restrictions have had an impact on the number of games that were able to be played in the season. This may result in dissatisfaction with the provision of sports fields in the area. We have a programme of work to address quantity of sports fields, but we are looking at ways to also improve the quality of surfaces and playing conditions.

4. Customers Net Promoter Score for Pool and Leisure Centres

As this is measured annually the FY17 YE outlook is based on FY16 results. Feedback received from customers indicated maintenance of facilities at Franklin Pool and Leisure Centre was a factor in the low Net Promoter Score.

Local Community Services

5. Percentage of funding/grant applicants satisfied with information, assistance and advice provided

FY16 was the first year of implementing the new community funding policy, which also saw the establishment of a dedicated funding hub. Funding hub members also worked closely with subject matter experts to reach relevant communities. A series of community workshops is planned for FY17 to build community groups' capacity to submit quality applications and to provide further advice to applicants.

6. Percentage of Aucklanders that feel connected to their neighbourhood and local community

People may not be feeling connected for a variety of reasons, including being new to the area, being too busy or preferring not to be connected. To a lesser extent there may also be lack of awareness about how to access activities that could contribute to feeling connected, and language and cultural barriers. A number of our activities, such as arts programmes, community facility programmes and events, seek to connect Aucklanders to their local communities. The empowered communities approach being implemented across these activities in FY17 aims to increase this.

7. Percentage of Aucklanders that feel their local town centre is safe (night)

This measure is influenced by a number of elements such as crime rates, the built environment, and socioeconomic and other similar factors. The council undertakes projects and initiatives to improve perceptions of safety. The council has advised Waiuku Business Association on ways to make effective use of their current public safety camera system and enable future connection to Pukekohe’s system.

8. Facility utilisation at off-peak times for council managed community centres and venues for hire

The FY17 Q3 result is based on eight months of actual data and one month of estimates. Off-peak utilisation has remained steady compared to the same period last year. From July 2017 the local board has subsidised off-peak rates. The digital booking system, which began recording bookings in FY17 Q1, is expected to improve customer experience and utilisation, along with a marketing campaign in Q3

9. Percentage of community facilities bookings used for health and wellbeing related activity

This is a new measure to establish our understanding of community facility activities that contribute to health and wellbeing outcomes. This data will be used by staff when considering facility work programmes for FY17 – staff now have a baseline figure and will aim to improve this by looking at the mix of activities being conducted at community facilities.

10. Number of visitors to community centres and venues for hire

The FY17 Q3 result is based on eight months of actual data and one month of estimates. Visits are down on the same period last year due to improvements in recording attendance.

Performance measure	YE Outlook	YE Target	FY17 Q3 Result	FY17 Q3 Target	FY16 Result
11. Use of libraries as digital community hubs: Number of internet sessions per capita (PC & WiFi)		1.0	1.5	0.8	2.0
12. Number of visits to library facilities per capita		4.5	3.3	3.3	4.7
13. Percentage of customers satisfied with the quality of library service delivery		85%	Measured Annually		87%
14. Percentage of visitors satisfied with the library environment		85%	Measured Annually		88%
15. Percentage of participants satisfied with council delivered local arts activities		85%	Measured Annually		No result
16. Percentage of attendees satisfied with council delivered and funded local events		85%	Measured Annually		89%
17. Percentage of Aucklanders that feel their local town centre is safe (day)		79%	Measured Annually		87%
18. Facility utilisation at peak times for council managed community centres and venues for hire		14%	17%	14%	18%

Local Planning and Development

Performance measure	YE Outlook	YE Target	FY17 Q3 Result	FY17 Q3 Target	FY16 Result
19. Percentage of Business Associations meeting their Business Improvement District (BID) Partnership Programme obligations		100%	Measured Annually		50%

Local Environmental Management

Performance measure	YE Outlook	YE Target	FY17 Q3 Result	FY17 Q3 Target	FY16 Result
20. Proportion of local programmes that deliver intended environmental actions and/or outcomes		85%	Measured Annually		80%
