It is unconscionable to still keep using carcinogenic glyphosate - let alone brodifacoum, pindone and 1080.

In 2005 the Red Cross found 287 foreign chemicals in the placentas of 10 newborn babies.

This is a shameful legacy to leave to future generations and we must all do ALL we can to reduce this toxic burden o the unborn child.

Once the realisation is reached that it is unacceptable to keep using these substances - as well as other toxic and polluting substances and practices, such as plastic bags etc - then solutions will be found.

Friends of Sherwood believe the most powerful rescue is being ignored, being the public and community involvement, both voluntary and mandated e.g. keeping neighbourhoods informed of how they can assist
