

Memo

03/05/2017

To: Chair and Members Strategic Procurement Committee

From: Jazz Singh

Subject: Publishing contract and spend information

Purpose of Memo

1. To inform the Strategic Procurement Committee of the changes being adopted for the reporting and publishing of Auckland Council's awarded contract and supplier spend information.
2. As part of council's drive to increase transparency regarding council spending, council's Chief Executive committed to publishing Auckland Council's awarded contracts and supplier spend in October 2014.
3. The awarded contracts report includes the contract number, contract description, contract type, contract start and end dates, and the successful supplier. This report is published six monthly and only for contracts valued at \$100,000 or more. A copy of the latest published awarded contracts report for the period 1 April to 30 September 2016 is attached to this memo (Attachment A).
4. The exact value of the contract is not included in this report because of the complexity relating to different types of contracts that council awards; including contracts that are "measure and value" or "time and materials" focused. Contracts of this nature require a projected outcome; however, time and resources for the work involved cannot be quantified at the time of contract award. While council may have a budgeted sum, we may not agree a fixed price. A decision was made at the original time of publishing this report that information regarding value or spend with a supplier was better captured using our supplier spend report.
5. The supplier spend report includes a suppliers identification, their legal name and the actual spend with that supplier (either under contract or by way of a Purchase Order (PO) not linked to a contract). This report captures all spend against a supplier from council's SAP ERM system and only includes suppliers with which council has spent \$100,000 or more, in the six month period the report covers. A copy of the latest published supplier spend report for the period 1 April to 30 September 2016 is attached to this memo (Attachment B).
6. Auckland Transport currently publishes an awarded contracts report which includes the contract appointment method and contract award value in their awarded contracts report for contracts valued at \$50,000 or more. A copy of the latest report from Auckland Transport is attached to this memo (Attachment C). They do not publish a separate supplier spend report.
7. Procurement staff will soon have the ability to consolidate contracts and spend information with SAP Ariba, a procurement enabling technology tool. This tool will be implemented in July/August 2017. The business case for this project was approved in December 2016 and is currently in the design and build phase.
8. The reporting capabilities of SAP Ariba will reduce the manual administrative tasks required to produce the awarded contracts and contract spend reports as they will largely be automated.

9. We have considered three options in relation to reporting and publishing awarded contracts and supplier spend information. A description of each option and their benefits and challenges are outlined below.

Option One – Status Quo

10. This option would continue to publish council's awarded contracts report and supplier spend report every six months and only for contracts or supplier spend over \$100,000 during the six month reporting period.

11. The benefits of this option include:

- the ease of production; and
- lower staff time and costs to produce reports.

12. The reports in this option are not in line with the approach taken by Auckland Transport and our communities and ratepayers are asking for greater transparency regarding contracts and spend information from council.

Option Two – Enhanced Reporting with Lower Thresholds

13. This option would increase the frequency of reporting from six monthly to three monthly (quarterly) and include the contract appointment method and contract award value (where applicable) in the awarded contracts report. The same frequency would also apply for the supplier spend report. The awarded contracts and supplier spend reports would also have a lower threshold of \$50,000.

14. The benefits of this option are:

- Increased frequency of published reports provides greater transparency to our communities and ratepayers.
- Aligning our awarded contracts report formatting with Auckland Transport's will increase consistency across the council group.

15. The challenges associated with this option are:

- It may be difficult to capture contract value data for all awarded contracts. Some of these will be "measure and value" type contracts and won't have a fixed value. We will report spend with suppliers within the spend report (over \$50,000).
- This will require the contract value field in the awarded contracts report to be left blank for some contracts.
- Additional staff time and costs when obtaining the data to produce these reports on a quarterly basis.

Option Three – Full Reporting with No Thresholds

16. This option would require council to publish the details of every single spend item with third party suppliers. The benefits and challenges are the same as for Option Two, however we have noted further challenges:

- Not all council spend is on contract. Spend under \$25,000 can be done by raising PO's. There are many PO's raised that are not linked to contracts. It would be administratively challenging to publish all of this data.
- However, if spend with a supplier under multiple PO's exceeds \$50,000 per annum in any period, this spend will be captured in the supplier spend report.

17. This option is too challenging to implement at this point in time but we will look at opportunities to increase our levels of reporting in conjunction with our colleagues at Auckland Transport.

8. Option adopted

18. Procurement staff will proceed with enhanced reporting under option two that includes:

- publishing awarded contracts and supplier spend reports on a quarterly basis rather than every six months;
- lowering the awarded contracts and supplier spend reporting threshold to \$50,000; and
- aligning our report format with Auckland Transport's awarded contracts report.

19. The benefits of doing the above will provide greater transparency to our communities and ratepayers. By aligning our awarded contracts report with Auckland Transport's format, we will increase consistency across the council group.

20. Procurement staff will continue to look for improvements from our technology solutions to increase the level of reported spend and align our reporting with Auckland Transport.
