Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Decent feeder buses to the bus stations required. Need to support the local board in advocating for this.
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Affirm delivering Penlink. Traffic management plans around the build of Penlink need careful attention Ecological impact of Penlink needs careful monitoring Minimum disruption during build. Look at best practice e.g. construction of Murrays Bay wharf which enabled continued use of Murrays Bay beach and yachting off it.
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Affirm that central government facilitate the initiation of this project.
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Cyclists should have "bells" which can be sounded on shared walking/cycling paths
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Affirm advocating to Auckland Transport to provide more bicycle parking at public transport hubs, town centres and the ferry
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Confirm advocating to Auckland Transport to install signage for cycleway and walkways to help direct users and make options more obvious Disability access needs attention
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Ferry and terminal facilities at Browns Bay - nice but not needed
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Strongly affirm the major realignment of Lonely Track Road/East Coast Road/Glenvar Road intersection to improve safety and access to Long Bay and adjoining areas
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Strongly affirm advocating for more transport options and improve linkages e.g. seven day ferry sailings and connecting bus services to/from Gulf Harbour.
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Light rail from the North Shore to Silverdale - affirm future focus.
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Pedestrian access in park and ride spaces/venues needs to be assessed for safety purposes Universal design principles applied to enable access
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Enable more cycling
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Consider where mobility scooters will travel as the population ages
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Consider some overhead crossings for pedestrians
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Some roads have footpaths only on one side, consider how to show (visually) the safe linkages
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Consider flexible options to promote bike share
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Consider promoting car pool apps
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Good sports facilities which are enjoyed by all ages.
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Options to include senior exercise/play/fitness equipment should be explored
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Unisex - gender less/trans toilets
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Retention of Archers block as reserve land crucial, especially as Penlink will increase development and intensification along the peninsula
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	More functional playgrounds for all ages i.e. basketball courts needed
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Pergolas/shade sails to protect from sun in all popular reserves needed
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Easy access to sports and playgrounds such as Browns Bay and Long Bay needed
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	High service levels for maintenance in all parks needed
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Recognise, plan and keep up to date with proposed development. Keep RMPs current
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Archers block - what happens to sale funds if sold? Is it kept in the local board area?
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Keep Archers block until confirmation re Penlink
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Agree with multifunction sports areas (due to intense development there will be a lack of green fields for individual sports)
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Retain and future proof reserves and walkways when development is occurring and expected
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Better links specifically for cyclists between towns, beaches and parks needed

Topic	Comment
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Council has control over infrastructure but not power, need a programmed for undergrounding. Council should liaise with Vector and Vector could build it into their work programme
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Local arts centres - are new residents aware of these. Local board does very well in supporting the arts centres
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	No mention of integration of the different cultures. Encourage neighbourhood support groups to help bring people together. Easier with families who do things together.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	To engage young people need to have specific events for them. Need to encourage young people to stand up and organise things - encourage the natural leader
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Density of Maori in Hibiscus and Bays warrants more effort in integrating more cultures.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Rates remission for privately owned facilities providing community benefit is supported e.g. arts centres, maraes
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Support local arts centres are sustainable, inclusive and embrace diversity. Encourage integration of cultures.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Work with local real estate agents and see who new home owners are and send letter of welcome, setting out community facilities etc.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Organisations like the Men's Shed good for bringing the older community together.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Ergonomically designed accessible seating
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Totally agree to the North West Wildlink project - like to see the natural environment and boost our natural economy - making it interesting for our community and visitors to the area.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Agree this is a good initiative but how far would you go on this - would it be like Shakespeare Regional Park with a fence around it - need to make sure its viable and not setting up our volunteers for failure
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Like to see the rubbish bags are not charged out so that people will not dump their rubbish in our parks - we need to make sure that people have as many opportunities to take away their rubbish or have collection points that are cleared regularly.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Would like to see more of our schools involved in the volunteer programmes - how do we link the schools with the already existing volunteer groups - there are a lot of young people who really want to be involved but not sure how to get involved.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Like to see more kids involved with our streams - aware of Enviroschools but they really would like to see council come and explain what they do and how the kids can contribute and make our space better.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Like to see our kindergartens get more involved and shown how important our streams are to our environment and teaching people about the ecology and fish that are in the water and what is a healthy stream.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	State of Auckland Freshwater Card - ECB graded a C - this is ok grade but the group thinks we need to make this better and the only way is through education and getting people involved.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Totally agree to protecting and making people aware of our coastal walkways - this is so important as it get young and old out there exploring their areas - would like to see wider paths and better quality of paths and dedicated book advising how to get around these coastal areas. Where possible it would be good to incorporate cycling on these paths.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Deliver programmes on pollution prevention and stream care - Auckland Council needs to recycle more objects - we need our recycle plants to take more recyclable options just like overseas to ensure that these recyclable boxes are not found within our streams.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Like to see traps for pests made available for any body who would like to put a trap down within their area - need to advertise that this can be done even if it is through the volunteer groups.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Like to see a museum for not only Maori but pre European artwork, maps and pictures depicting our local board area and the changes that have happened and how important that we learn from our mistakes. We also need to celebrate our history and be good for people who are interested to visit - you could have this where people will ring up if they want a tour etc. not have it manned full time.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Promote discussions on our waterways which works in with the eco tourism and supporting our green economy - we need to work together to promote what is within our local board area - need to engage with all parties including Maori- bring everyone together.

Topic	Comment
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Like to see more education on the importance of our streams and not dumping rubbish and why it is so important to have a better grade of water quality for our streams and the benefits for our community - education is very important
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Napier has signs in their area showcasing the history of the area including Maori/European - this is a great way of learning and low cost initiative that provides great education. Love the idea of working with our prisoners on carving signs that tells the story as well.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Like to see more about our Maori heritage and how it fits in now - explaining the knowledge pf the Maori heritage and why they settled in our areas
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Totally support this initiative - all our stream need trees to provide food for the birds and wildlife - the sound of birds and nature provides a calming experience for everyone.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Concern about people cutting weeds within their stream or even on the road side which then goes into our stream and can cause issues with pest strands coming up in our streams - need to educate people on the noxious weeds and how important not to cut them down and dump them back into the water supply.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Totally support this initiative - our walkways and coastal areas are so important to our areas and a great way to grow eco-tourism - more people will want to come if they have great walkways etc. - need to think about promotion and marketing.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	We need to educate people and what lives in the streams and how important it is to have healthy streams - show the benefits - need to link in why it is beneficial - need to do better marketing - people will buy in if they know it can affect them and their families.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Very important to value our environment by keeping it clean and providing education to our community and visitors the importance of taking your rubbish away or putting it in a bin. If there are no bins or not regularly cleaned then that is when people get lazy - need to get the basics right first.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Totally agrees to working on the effects of development - would like to see filters over the drains and roads where any development is taking place and ensure that they do provide ways of stopping the siltation from getting into our coastal areas.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Concern that the drains are not getting cleaned out which causes flooding - need to make sure that our drains are kept cleaned - it is a cost but a very important cost that relates to our environment.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Important to ensure that growth does not contribute to our Freshwater Report Card on our streams deteriorating - we need to make sure that the developers are aware of how important our stream and ecological areas are to the community and possibility of future eco tourism.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Need to inform schools and any new migrants/people to our area on how they can become involved and what they can contribute to making this a reality - pest free area is quite a daunting task and needs to be broken down. Some people don't like chemicals others do and sometimes there is the need for chemicals. You also have others who don't like the killing of pest animals. Like to see more information about how this would look as a pest free local board area
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Signage is important to show the enhancement of our natural watercourses and to explain to people why they are needed - keep educating people..
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Like to see our local board working with developers to ensure that they protect our waterways and find ways to ensure that our waterways are kept clear of any silt or issues that may arise from the development
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Know that growth is important but it is vitally important that the developers are held to ensure they mitigate any issues that happens within that area and that funding goes towards infrastructure to help that area and keep it clean and green - we have a special area and it is important to ensure that the growth enhances and provided opportunities to keep our area special. It is important to remember that small initiatives that are networked well can go global its how you market it. Need to tap into our community networks more.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Totally agrees with this initiative but are concerned about how many coastal walkways are being shut down and how will the local board manage this - is there enough land to keep pulling back the walkways or the funding to fix these walkways.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Tiritiri Matangi Island is a great initiative and a fantastic showcase within our local board area - we need to promote this more on the eco-tourism front to grow our economy and then link them into other things they can do within our local board area. Would like to see weekend ferries.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Concern that if you have people going to Tiritiri Matangi Island that it looses its appeal - so why not do big events every quarter to showcase Tiritiri Matangi but then also highlight all the other wonderful things happening on the Peninsula.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Really think its important to get weekend ferries going this would really help with the eco-tourism not only with enabling our community to access other areas but you can highlight all the wonderful tourism opportunities up in our local board area - i.e. Logan Dodds video - make it a reality.

Topic	Comment
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Totally support the volunteers - they are so important and provide a huge amount of man power. This is known as the waterfall effect - volunteers are outsourcing their time and energy - it is vitally important that they receive from the local board the support and encouragement to get on with the job. Does the local board provide programmes on training to help them become empowered and deliver these projects.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Volunteers are important but what about tapping into the sponsorship arena more. These big companies like coke a cola can sponsor a river they then provide the manpower/funding/marketing to get the work done in that stream area. You could link it in with the businesses within each of the centre areas i.e. Browns Bay businesses could actually sponsor a beach/river/park - need to think of other ways to get the message out there and these companies have a lot of marketing expertise.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Important to look after our streams and our environment - we are known as clean green NZ - how do we ensure we do not lose this and that the message keeps getting out there.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	What about involving our armed forces (who are not away or doing anything) to do work in our environmental spaces - teaches them about the environment gives them different kind of training which is still physical but has a great outcome not only for the armed forces but for our environment
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	North West Wildlink and our volunteers are really important - need the trees not only to help reduce the carbon footprint, but important to retain the trees for the wildlife - it is great to hear that the local board supports the North West Wildlink.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Like to see companies working to help our environment - the local board should investigate working with these companies on providing sponsorship - these companies often have great marketing skills and can get the message out there.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Totally agree with this initiative - would like to see the knowledge of the area - our history is interesting. In Waipu there is a museum that showcases the areas heritage and has art, pictures and information that tells the story a lot of people visit that museum. Think that sharing our history is important.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Would like to see interpretive signs but in places like walkways - similar to the Te Ara Tahuna Walkway - like to see more artistic ways of telling the story - signs can be boring - need to make it fun and enjoyable.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Kauri Dieback - advised that each of the walkways there would be boxes that held disinfectant so that you wash your shoes when entering/leaving unfortunately the supplies have not been filled up. If this is a resource available then they should make sure that these are always available - this teaches people to use the resource and is educated at the same time.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Need to ensure that our nature/environment is kept clean, green - help our wildlife to flourish the birds to link into the North West Wildlink - make sure the trees are not taken over by pest plants - need to educate people on planting of noxious weeds.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Education should be the number one tool that the local board should be doing with schools/businesses and community groups - look to try and link everyone together - together we can make a difference.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Encouraging what local board is doing involving schools in looking after the natural environment.
Any other comments?	Hibiscus Coast growing rapidly and what was a holiday environment has now grown. Public transport and infrastructure have been neglected. There is a lot of catching up to do.
Any other comments?	Infrastructure should be put in before subdivisions are developed. Good forward planning has not been done.
Any other comments?	Our Auckland could be in several languages or at least have some pages in different languages, especially Mandarin/Chinese/Korean.

Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Town Centre parking (Yes or No)
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Look at partnering with the business sector to put on transport to the business park
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Better signage to show where the business park is
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Signage to show where the footpath is on Silverdale Hill and also where access to the underpass under Tavern Road is
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Revitalisation of town centres, need people living in them encourage apartment style living
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Manly should be a local centre. Will be revitalised when apartments are built
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Large number of unemployed young people
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Any intention to re-establish the visitor information centres?
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Lot of small businesses in the area, need a community business place where people can come together and share ideas, hot desk etc. Maybe use space at the Plaza in Whangaparaoa
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Ferry Service from Arkles Bay
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Cycleway to Gulf Harbour (didn't say where from !)
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Bridge / Boardwalk at Weiti to connect to Silverdale
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Better bus connectivity - mini feeder buses, bus journeys complete in both directions
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Better signage on how to get places via public transport
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Penlink - need United Front
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Faster network of bus system along Whangaparaoa Road
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Higher frequency of bus network in Whangaparaoa
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Review of bus stop spaces
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	NEX direct to Silverdale Shops
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Progress North Shore Rail Project
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Northern Corridor extension
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Need a push on lights at Silverdale intersection
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Silverdale Business Park - no bus link, access difficult . Loss of productivity through lack of access. Advocate for Penlink
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Multi-sport reference would like to see word changed to Exclusive Sport Use
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Lots of residential development, important to acquire extra reserves
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Development contributions to be spent within a reasonable distance to where they are collected from

Topic	Comment
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	New SHA Wainui - will this eventually be part of the Hibiscus and Bays Local Board Area rather than Rodney?
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Concerned with amount of building in areas limiting parking availability near coastline. What can we do to gain more access to coastline (beaches) in cars
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	More portable BBQ's at Orewa Beach
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Stair or walkway at Silverdale Intersection
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Bridge / Boardwalk at Weiti to connect to Silverdale
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Dividing local bins into compost/recycling/rubbish
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Approved of the Greenways plan but would like to see the prioritised actions of the greenways plan to understand what are the priority areas and why they have been identified as a priority
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Would like to understand what the strategic vision is of the local board - like to see the local board having more influence on walkways/cycleway including promoting the Crimson Walkway.
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Like to see the greenway connection from Weiti to Arkles and then having a ferry connection from Arkles - this would provide great tourism opportunities.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Estuary Arts Centre - art piece "ring of poles" like to see companies enable sponsorship of these poles and provide a gateway initiative that will bring people in but also enable sponsorship for companies and not all funding required by local board. This initiative would make people feel welcome and create talking point.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Community spirit is good in Whangaparaoa and the local board needs to continue to foster this spirit to ensure that this is not lost and people continue to feel like they belong.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Silverdale Hall is fully booked facility - like to see other hall (by the Pioneer Village) run as a similar model to the Silverdale Hall - providing opportunities for the community to use this facility. This hall is smaller and offers better use for smaller groups - provides good community spirit
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Weiti River Walk - LB promoted this new walkway had volunteers go in create space - not being well maintained - grass is over grown and there is no signage to advise of this walkway or the benefits that this walkway has created.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Need to protect our coastline and streams - issues with SILT and rubbish going into our waterways - action needs to be taken to keep them clear and need to make sure developers are working harder to prevent this in high growth areas
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Water quality is very important - there is a lot of development happening and a lot more scheduled to happen in the future. Need to ensure that we have good monitoring and enforcement in place. It is not well monitored now and would like to see improvements on this to ensure our coastlines and rivers are kept clean.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Stanmore Bay has recently had inundation of SILT red seaweed and would like to see the local board take action on preventing this in the future. Recommended that the local board speak to Northland Council as they are working proactively to stop this red seaweed forming.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	NW Wildlink is very important - like to know what the local board thoughts are on the Todd Development at Okura development as important to retain our environmental qualities.
Any other comments?	Civil Defence - the local part is missing within our area - no longer supported locally but has a big presence in town - concern that there will be no support for outer areas when disaster hits locally. Would like to see local boards to take more leadership in Civil Defence making it about local needs. Need to build community resilience
Any other comments?	Need signage for where Citizens Advice Bureau is - Orewa requires better signage to showcase where our community facilities and community spaces are.
Any other comments?	Community gardens - would like to see these within our public reserves - provides huge benefits for the community but also provides trees but have a purpose for providing fruit/vegetables for the community.
Any other comments?	Concern that Penlink will stop the community feeling spirit as it will allow further growth and move away from the community spirit
Any other comments?	Te Ara Tahuna Walkway/Cycleway is a great achievement and the local board should look at creating more spaces like this - where it brings the community and others together
Any other comments?	Stormwater drains from Titan Place through the Hibiscus Coast Highway are completely silted up and need to be cleaned on a regular basis in case of severe weather events which can cause major flooding.
Any other comments?	Stormwater drains from Titan Place through the Hibiscus Coast Highway are completely silted up and need to be cleaned on a regular basis in case of severe weather events which can cause major flooding.
Any other comments?	Like to see more cycle network opportunities within the Hibiscus and Bays Local Board area
Any other comments?	Storage depot at Silverdale War Memorial park needs to be tidied up and made to look visually better with planting around the area.

No of Attendees	Event
17	Wednesday, 14th June 2017 - HBLB HYSE - Browns Bay Service Centre (6pm-8pm)
Topic	Comment
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	LBP - strong local economy - town centre plans - Kurt has provided feedback on 3 centre plans over the years and the only actions he has seen completed is the beachfront boardwalk and some cleaning up of areas the rest has never come to fruition. Like to see the old plans done rather than looking at new centre plans - waste of money.
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	BB parking is becoming critical and a lot of businesses are now saying you cannot park or they will tow you. If we loose parking at Anzac Road this would be disaster. They are building more apartments with limited parking - public transport does not work well as it should - (although the hospital bus does work well).
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	We are interested in developing employment opportunities for locals to meet our needs, particularly in the context of our increasingly diverse community (eg drawing on the experience of overseas born residents, dealing with diverse languages etc). Further MAC can work to develop the creative capabilities of locals (not necessarily young) in terms of domain-relevant skills, and (most importantly) intrinsic motivation so that participants are more adaptable and resilient. This need not be limited to training in 'the arts'. Creativity skills have broad applicability and we can partner with local training providers to offer hybrid programmes.
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Arts based methods are based on experimentation and adaptability as well as sensitivity to culture and a feeling for place. We would love to be involved in creating unique and creative facilities which, due to being created by and with residents, have a sense of care and attachment.
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Pedestrian friendly spaces are accessible, safe, and welcoming and can be humorous, playful and thought-provoking. They can foster care and attachment to place. We believe there is the potential for art and creative activities to contribute to the development and ongoing activation of spaces which have unique local flavours and seek opportunities to work to provide such.
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Like to see the Greenways plan number 22 part of Te Araroa trail (which would go through the Todds Developments). Like to see bridge from Stillwater over the Weiti River (that can be opened to allow boats through) then be able to catch a ferry from Arkles Bay. This would be a great tourist idea - can do kayaking along Weiti river as well as providing a walking/cycling route. Would like to see this promoted as one of the top priorities and see it as a great tourism activity. A very long-term vision. Would like to see the LB request a feasibility study for future planning.
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	One of the main issues in Browns Bay is parking - seen two large developments go up and another one is going up soon and the unitary plan is for more infill of housing for this area for the future. The UP also does not provide for parking within these buildings and often most households have more than one car - which means that there will be more people parking on the streets. Have had people parking in his driveway and going off to pay a bill.
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Strong local economy is one of the outcomes in the local board plan, to have vibrant town centres. Concern that there are more pubs and bars and restaurants going into Browns Bay - is this what the local board means when saying vibrant town - concern that BB will turn into K'Road. does this show a vibrant centre?
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Concern about Browns Bay Centre Plan and the idea of turning Inverness Road to pedestrian access only - there are at least 70 carparks that would be taken out if this was to happen. If people cannot get parking they will go somewhere else. The other businesses are actually making it harder for people to park by getting clamping vehicles.
Q1 We think revitalising our local town centres will attract people to shop locally and contribute to a strong local economy. Do you	Browns Bay is known for its beach and more and more people are coming to this area - but there is no parking and often find that people are parking on the beach.
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Cycleways - connected communities - when putting in cycleways often there is not enough room to create these cycleways and they take up the space that was used to allow people to turn safely or take out the median line - need to think about more clearly on how these cycleways can be completed but also ensure that the users of the road have good access as well and does not cause hold ups to the traffic. Need to ensure there is enough room for cycling lanes only if there is the space.
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	The development of the art walkway which attempts to link MAC with Mairangi Village is a good step but the centre is still disconnected from the daily life of the shopping and cafe district. We seek opportunities and resources to develop ways (physical and activity-based) to connect the public resources at and around MAC with the nearby village.
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Penlink project - NZTA good to hear moving forward - this is the most important transport issue for the HBLB and that the local board continues to advocate for this project.
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Curly Avenue is important too. Silverdale Lights proposals are important - will help the community get around and provide linkages for business park and retail area
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Like to see further bus connections.
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Concern that if the local board does go ahead with Ferry terminal at BB in front of the Manly Esplanade this will also take out more parking - need to think about the future - there is not enough parking in BB.
Q2 We want to continue our efforts to influence an earlier delivery of Penlink, improved travel times and public transport options. Do you:	Silverdale - need roundabout to join the two areas, real segregation at present.. If Curley Avenue extended then danger to puriri trees. The society would like to be involved in any consultation re the Curley Avenue extension to ensure puriris aren't damaged or lost.
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	Open space - need to retain our green space due to all the new growth anticipated in our areas especially if they are creating apartment blocks. Would like to see more campgrounds created in our areas - campervans etc. people need access to our greenspaces - need to grow the space for people to enjoy our open space.
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	As the local centre for art and creativity we believe MAC seeks more of an opportunity to contribute to this process, project implementation, and placemaking and activation activities after construction.

Topic	Comment
Q3 We want to enhance access and activities on our coastlines, park and reserves. Do you:	We are interested in developing art and creativity programmes which activate the creativity of the body, mind and soul - individually and collectively. This can include dance, contact improvisation, yoga and walking projects. Our recent work with Touch Compass (NZ's only professional inclusive dance company) is one concrete example. Access to, and input into, the development of multi-sport and recreation projects would enable us to further this work.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Would like to see community gardens in our reserves and how to grow these spaces in the local board area.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Arts based approaches are common in placemaking and citizen led development practices. Our recent projects illustrate the steps that we are taking in developing such capability and we would love to have more input in this area.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	MAC continues to work for this objective. Our ability to improve in this area depends on the extent to which we are able to allocate staff time. This is very difficult, as our increasing number of users is resulting in more time required for administrative tasks
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Arts based approaches are common in placemaking and citizen led development practices. Our recent projects illustrate the steps that we are taking in developing such capability and we would love to have more input in this area. MAC continues to work for this objective. Our ability to improve in this area depends on the extent to which we are able to allocate staff time. This is very difficult as our increasing number of users is resulting in more time required for administrative tasks.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Our new strategic plan emphasises our desire to work with mana whenua and our newly re-defined value statement highlights our commitment to value honour and embrace the principles of the Treaty of Waitangi. We need support to dig out opportunities and devote resources to this very important aspect.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Estuary Arts Centre is fantastic facility and thankful to the local board for their continued support. Arts funding is different in other parts of Auckland - its important across AC to ensure that funding is given out fairly across the whole area. Like to see local board to lobby for fairer subsidies across the Auckland area for Art Centres.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Supports working with groups such as Future Whangaparaoa (Whangaparaoa 2030) to provide great community outcomes
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	MAC supports the draft local board plan and is already engaging and empowering our community. MAC under staffed and have to manage 320 programmes 40,000 people - have wonderful volunteers - concern about h&s and burning people out.
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Concern about equity issues versus what other arts centres gets versus MAC and the programmes they deliver
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	The Mairangi Bay food and wine festival is getting bigger and better. Mission to promote Mairangi Bay as community village and premier Auckland destination. Important to make people belong which is an outcome of the LBP. Objectives to promote Mairangi as the place to visit within the North Shore area and would like to work positively with the local board..
Q4 We are keen to support communities influencing the look, feel and function of local spaces and places and to be actively involved in improving them. Do you:	Like to get local neighbourhoods to come together about growing food in our communities and provide opportunities for this to happen in our reserves or even people's back yards. Rather than put into lawns to be mowed create gardens for food - which helps bring the community together but also provides food for our community. Share ideas, learn new skills, planting.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	MAC continues to work for this objective. Our ability to improve in this area depends on the extent to which we are able to allocate staff time. This is very difficult, as our increasing number of users is resulting in more time required for administrative tasks
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Our ability to improve in this area depends on the extent to which we are able to allocate staff time. This is very difficult, as our increasing number of users is resulting in more time required for administrative tasks
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Nature based all ages play and exploration, arts and crafts using natural resources and arts based techniques of observation foster a connection with and deeper appreciation for the natural environment MAC can expand current activities in these areas, in collaboration with local groups such as schools (eg enviroschools programmes) and new arrivals to the area. We have also been discussing art-nature projects which encourage eco/art tourism in collaboration with local residents with connection to schools and art groups overseas.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Our new strategic plan emphasises our desire to work with mana whenua and our newly re-defined value statement highlights our commitment to value honour and embrace the principles of the Treaty of Waitangi. We need support to dig out opportunities and devote resources to this very important aspect.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Artistic methods are very effective in the creation of stories where shared experience and wisdom, beliefs, knowledge and values are passed on. Such stories can also provoke or foster imaginations of alternate realities. We are keen to work on intergenerational storytelling projects which can contribute to the development of physical and digital signage in our community.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Would like for the Silverdale & Districts Historical Society to take over the lease of the Red Cross building - will make it available to all community groups. Would like to be on the HBLB mailing lists/email. Silverdale Districts Historical Society fits well with outcome on telling the early stories.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Okura Bushwalk - through Stillwater - under funded with boardwalks - like to see more boardwalks along this area to provide better connections
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Wildlands report for Deep Creek restoration has been adopted and supported by the local board. Continued frustrations due to changes in officers. Plan clearly states to remove the macrocapa trees but arborist are now stating that tree should not be removed. Would like to move forward on the Wildlands report and actually start to deliver this project.

Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Environment is all good but how do you monitor what is happening with regards to people taking the fish from the beaches - need to ensure this is monitored and make sure the community are aware of the laws on what can be taken. LB pointed out this is a fisheries role.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Need to highlight the importance in the LBP about businesses not polluting our drains - just recently there was a blockage in the pipe from fat that had been poured down the drain which then caused blockage. Need more \$\$ spend on monitoring of this and education and also advise of the fines for polluting our drains.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Moths are important to the forests eco-system for pollination, important food for seed distributors, feed other insects such as bats and keep plants under control. In new developments especially those close to native bush 2200 kalvin lights (amber shade) should be used. These are more expensive. In the new roadway going into the Okura development we would like to see lights lower to the ground and using sensor technology.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Envirofill has a lot of run off in heavy rain and this is polluitng Karepiro Bay
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Wants to see boardwalk over sensitive areas and Stillwater/Wade river walk and the Karepiro Bay flood area. This would give dotterels and godwits their beach back.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Need financial support to continue with their Northwest Wildlink corridor restoration including engaging landowners, creating pest plans and rat knockdown programme.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Envirofill have increased truck movements to 300 a day. There is a lot of sediment going into Karepiro Bay during heavy rainfall.
Q5 You have told us that a protected an enhanced natural environment is a priority. We would like to continue working with partners to educate and care for our unique natural heritage. Do you:	Education centre when Weiti block is consented, café & shop, boot clenaing station with flora and fauna information centre, plant nursery, biosecurity room and encourage the use of it by school groups. Would also like to see a skywalk in the bush area to get an appreciation of the expanse.
Any other comments?	Thinks that the local board plan is good and covers all the areas for our community within the identified outcomes.
Any other comments?	There is a concern when AT mow the road berms in Stillwater as they cut anything in the path (weeds and plants).
Any other comments?	Stillwater local community doing its bit for million trees, the community shows their willingness to get stuck in and do the weeding within the park areas.
Any other comments?	Like to see the speed reduction on the main road in Stillwater reduced as the road cannot cope with this speed.
Any other comments?	Like to see local board put on the agenda to actively lobby on getting the 2nd harbour bridge - if the current one fall down then north of the bridge are going to have a few problems - need to understand the lifespan of the current harbour bridge.
Any other comments?	Silverdale Rugby - lighting on number one field needs to be upgraded - provided two documents. Silverdale Rugby is one of the highest using clubs in the HBC. Due to H&S requirements they need the lighting to be upgraded. Previously consented for lighting upgrade. Agreed that Silverdale Rugby would contribute to the upgrade of the lights if required.
Any other comments?	Ex Silverdale Bowling building and associated land. On behalf of the user interest groups they would like to see this rebuilt as a community facility and be part of the 2017 local board plan. Requested their interest be noted in the LBP
Any other comments?	Ex Silverdale Bowling building. The parks depot area is looking really bad and needs to be tidied up - maybe provide planting to block of space.
Any other comments?	Neville Brothers is the largest trucking firm in the area - concern about how the trucks get across to the business park area - permitted to use Tavern Road if they use another route they can be fined. Need to provide the lights at this intersection - to enable safe passage not only for this employees but for all the businesses in this business park area - there are 320 businesses - need to provide connection from the Silverdale Business Park into the Silverdale Retail area. There are a lot of roads that have hills with lights (no different to Hibiscus Coast Highway) and the lights can be phased to ensure they work as same as PNS lights.
Any other comments?	Support the need for the lights at Silverdale to provide connections from Silverdale Business Park into the Silverdale Retail area. Trucks and heavy vehicles require the controlled intersection- this will help the whole of Silverdale - not opposed to Penlink or Curley Ave but need something now to make Silverdale connect better and safely. This is causing major problems for businesses to move out because of not having easy and safe connectivity. HBC Highway is no longer a rural road any more. A major employer is looking to move out (huge employer who brings a lot of employees and business to the area). The 2017draft LBP states that employment is main focus - if we to provide good business opportunities for this area then businesses will stay. Traffic lights are going in with other developed areas within Silverdale area but this has not been included although promised by ex RDC. Like the local board to understand what a detrimental effect it is to not put these lights in. Lights can be coordinated with PNS lights to ensure they work in coordination.
Any other comments?	Received letter from Atlas Concrete concerned about exiting Titan Place as people are doing U turns to circumvent the loop - this is a health and safety concern.
Any other comments?	Thinks that the LBP does a lot of advocating and not a lot of delivering - like to see more deliverables happening rather than advocating.
Any other comments?	MAC are concerned about the building and lack of maintenance - rain flood through 3D studio. Concern about the outdoor poor lighting at night and pot holes in the carpark.
Any other comments?	MAC are concerned about Hasting Road and speed of vehicles coming down that road and people exiting or coming into the MAC and visibility of the driveway
Any other comments?	Gone through draft local board plan and key initiatives and have identified how MAC can support to help the local board achieve these key initiatives - have notes to pass around and how they can enhance the community outcomes.

Any other comments?	Thank you for the grants and support for the BID. The LBP summary is excellent and mirrors the BID plan and most important fits our community needs.
Any other comments?	Footpaths in business area of Mairangi Bay are very slippery due to wet weather. This has become a real h&s issue and needs to be addressed.
Any other comments?	Like to see CCTV cameras operating in the Mairangi Bay Village area to provide a safe environment.
Any other comments?	LBP - is very high level document. There are a lot of retired people out there in the HBLB community - CAB is important to providing the contact for the seniors. Concern that a lot of the connections are to do with mobiles and computers whereas the CAB provide face to face connection. Would like LBP to concentrate on the importance of providing this face to face connection and how important CAB is to our community. Realise limited dollars - often looks at bottom line and doesn't look at what these community groups provide in regards to community benefit and social outcomes. Important that LB advocates for the CAB's within their areas.
Any other comments?	Infrastructure maintenance is not in the LBP. Have had two major storms recently and because the drains are not cleared (especially when the leaves are falling from the trees) this causes flooding. Maintenance is important and this should be highlighted within the LBP.
