

Attachment B
Māngere-Ōtāhuhu Local Board specific issues

Issue	Current approach	Proposed approach relevant to local board area	Rationale
<p>Important sites for widespread pest plant control; Ōtuataua Stonefields, Māngere Mountain and the Portage Esplanade Reserve</p>	<p>Region-wide approach to pest plant management, including enforcement of selected widespread pest plants in response to complaints. Māngere Mountain governed by Maunga Authority.</p>	<p>Site-led programme for parks with significant ecological areas including Ōtuataua Stonefields to manage a suite of up to 30 pest plants to an extent that protects the values of the parkland. Support for community pest plant control initiatives for the remaining sites. Māngere Mountain governed by Maunga Authority.</p>	<p>Council to lead by example on own land. Site-focused approach will enable more intensive management of pest plants to better protect priority ecosystems and threatened species, and ensure coordination of effort across agencies and communities. Support for community pest plant control initiatives.</p>
