

Attachment B
Manurewa Local Board specific issues

Issue	Current approach	Proposed approach relevant to local board area	Rationale
A desire for more education around pests	Provision of information and advice on pest identification, impacts and control, and communications around pathway management for a suite of species.	Provision of information and advice on pest identification, impacts and control, and increased communications around pathway management for a suite of species.	To encourage community, landowner and household action and behaviour change to control pests, create natural habitats and prevent environmental degradation.
The importance of community pest control	Provision of advice and support to community groups undertaking pest control, with priority given to activity in or around biodiversity focus areas and taking advantage of defensible landscape features such as islands and peninsulas.	Provision of advice and support to community groups undertaking pest control, with priority given to activity in or around biodiversity focus areas and taking advantage of defensible landscape features such as islands and peninsulas. The plan will support the Pest Free Auckland initiative, which focuses on community empowerment.	To amplify, recognise and support community activity around biodiversity focus areas and provide community empowerment, upskilling and networking opportunities through the Pest Free Auckland initiative.
Wasps	Provision of advice and information on currently available techniques for wasp control. Facilitating the development of improved wasp control methods that can be used by the public.	Sustained control programme for the whole region. Provision of information and advice on pest animal identification, impacts, control and prevention of spread. Continue facilitating the development of improved wasp control methods that can be used by the public.	Similar management approach to current.
