<p><b>Q3 Do you think we have missed anything? If yes, please explain what it is and why it's important</b></p>	<p><b>Community services</b></p>	<p>Local Board Feedback. Please stop the latest evisceration of our libraries and the dislocation of our irreplaceable librarians who are valuable as locals rather than the ridiculous idea of making them transient from different library to library.</p>
		<p>Too many homeless begging in the streets of Onrhunga need a soup kitchen somewhere and community garden in Oneunga. Local board plan feedback.</p>
		<p>Totally agree with Ataahua. 'Cleaner, safe areas for youth to congregate and be healthy and fit'.</p>

	<p><b>Parks, sport and recreation</b></p>	<p>There is a huge appetite for volleyball in central Auckland. Our club's twice-weekly indoor volleyball events are oversubscribed, and when we or our friends run pick-up/ad hoc sessions of beach volleyball at Mission Bay weekdays after work hours or on weekends, it's guaranteed that there will be groups of at least 15 people in fine weather - necessitating at least 2-3 nets to accommodate all who are interested. There are invariably passers-by who see us play and ask how they can join. When we schedule summertime tournaments we routinely organise for over 16 teams of pairs or 4s. These are people who commit their whole day or weekend to play in the sand! Mission Bay is of course a great spot for volleyball to be seen, but has limited parking and transport options, and unfortunately the sand contains numerous dangers to players - coral, shells, and lots of rubbish like bottle caps, wires, cutlery (you'd be amazed!). There is a significant desire for indoor volleyball in central Auckland, too. Our club's twice-weekly indoor volleyball events are oversubscribed, and we often have 60+ people keen to play volleyball for just two hours after work or school. If additional indoor gym space were made available for volleyball courts, our club alone (and we are one of several always looking for facilities) could easily fill it with social events and leagues for university student and school groups and adults. And any centrally located gym space is going to be highly desirable as all quality school and YMCA gyms are booked out for a whole year in advance for futsal, basketball and volleyball - this is the case for St Peter's school, Epsom Girls Grammar, and Diocesan School, which easily have the best facilities in the central city. The council's goal of increasing the range of sport and recreation options in the city's centre aligns perfectly with our club's goals. We fully support the development of additional recreational facilities, particularly for volleyball, as we know we have the membership that is desperate for more options, and this type of facility makes the city more vibrant and liveable. A centrally located beach volleyball facility would offer more possibilities for local and international events and increase the liveability and appeal of Auckland city through popular sport and recreation. At the recent opening ceremonies for the World Masters Games, the 25,000 participants were told that this could have been the biggest WMG of all time and set new records -- the interest was there -- but the facilities in Auckland were lacking. There is an unmet desire and need for more facilities on the Auckland isthmus and our club, run entirely by volunteers who love the sport, fully supports the development of additional space into recreational areas suitable for sand and indoor volleyball. cc Volleyball New Zealand.</p>

		<p>Local board plan feedback. I think a running/cycle way should be made, connecting MT wellington, panmure basin, along the Tamaki estuary and main roads leading to the panmure public transport hub and other neighbouring suburbs. I've lived in panmure for 28years and am active person and believe this running/cycle way would increase foot traffic for the shops and encourage the public transport idea. I have proposed ideas working around the current street map if you want material to add or work from. And I would love to be involved with a project of this description.</p>
		<p>We need more basketball hoops and skateboard parks, clean safe areas for the youth to congregate and be healthy and fit together. Less booze being sold in our community. More investment in our kids, our future 'local board plan feedback'</p>
		<p>Community gardens and orchards where people can learn to grow food sustainably and share food with people that need it. 'Local board plan feedback'.</p>
		<p>Get more greenways running through connecting the community so we can get around enjoyably by bike or foot? Pathways that is enticing like pump tracks or our version of the pink bridge. 'Local board plan feedback'</p>
	<p><b>Transport</b></p>	<p>Can we built motocross tracks in Glen Innes area with secured fence so we can ride it legally instead of riding on the reserve, and can we have exercise machine around reserve or by playground area</p>
	<p><b>Other comments</b></p>	<p>Local broad band feedback need community gardens Onrhunga has nothing. Need everyday stalls in front of library.</p>
