Q4 If you are proposing something new or extra, what should it replace (i.e. what project or key initiative should come out of the plan)	UH Efficient and effective transport links: Support	Local board plan feedback. I like in outcome 2 that you have identified the bottleneck at the bottom of the Avenue and Albany expressway. Though the intersection is a major issue, the root cause is actually the narrow bridge immediately south of the intersection. That is the bottleneck that causes all the traffic to back up, up the Albany hill and the Avenue in the mornings, and along the Albany expressway towards Grenville road in the afternoon and evening. I suggest that widening the bridge should happen instead of addressing the intersection.
	Our environment is valued, protected and enhanced: Support	Local board plan feedback. Yes please as a priority. Consider blocking off areas like Paremoremo which have large native bush areas and large sea boundaries. I would even get rid of my much loved cats to see the job done properly.
		Local board plan feedback. A pest free target of 2026 or sooner for possums rats, hedgehogs, mice, stouts, weasels and ferrets for the Upper Harbour and ideally the whole North Shore. Also a plan stopping developers from silting up and killing our waterways in our community and inner harbour.
		"Local Board Plan Feedback" yes we want a plan for Upper harbour to become Pest Free of possums, rats, mice, hedgehogs, weasels, stoats and ferrets by 2026 or sooner.

Q5 Do you have any further comments about our proposed local board plan	Transport	'Local Board plan feedback' can someone tell me how Upper Harbour Dr became no parking?? Can this be rectified at any stage???
		Local Board Plan Feedback: Would like to see train loop coming to shore through West. Also as the crime rate is increasing, safety and security is concern for the families. No wastage of tax payers money so projects should be completed fast and efficiently.
	Environment	Local board plan feedback - i would to live in a country which cares for its future. I want non chemical vegetation management.
		Stop spraying chemical herbicides in our streets and parks.
Governance and support	The plan is really broad - there doesn't seem to be many specifics in there. There's a lot of "advocating" as in "advocating for an affordable and reliable public transport network with better links to and within Upper Harbour". What does that actually mean? Is it just people sitting in a meeting talking about all the nice-to-have things (like a direct bus route between Hobsonville Point and the city centre - which has been removed under the new network) and then deciding that there isn't actually enough money to do it? Do you want people to give feedback on the specific things they want in their area i.e. a public pool, a skatepark, increased ferry times? "Local Board Plan Feedback"
