

### Attachment C: Feedback form

Whau Local Board feedback on pest management approaches proposed for the Regional Pest Management Plan.

Issue	Proposed Approach	Supports Y/N	Comment
Cats	<p>To continue management of cats in areas of high biodiversity value as part of integrated pest control but potentially for an increased number of sites.</p> <p>To provide greater certainty cats will be defined as pests in these circumstances if they are not able to be identified by microchip or other means as being owned.</p> <p>Cats will continue to be controlled on areas of public land where threatened species are being protected (regardless of whether they are owned or unowned). Example sites: the open sanctuaries and kokako/kiwi management area in the Hunua Ranges.</p>		
Possums	<p>Landscape scale progressive containment programme to manage possums. Rural management would be integrated with management in high value biodiversity areas. This could be achieved using a targeted rate across rural Auckland.</p>		
Widespread pest plants	<p>Site-led programme for parks with significant ecological areas to manage a suite of up to 30 pest plants per site to an extent that protects the values of the parkland. Includes use of rules in buffer areas around parkland.</p>		
New ban of sale	<p>Phasing out the sale of approximately 50 new plant pests and 13 new animal pests in addition to those currently identified.</p>		

<b>Issue</b>	<b>Proposed Approach</b>	<b>Supports Y/N</b>	<b>Comment</b>
Kauri dieback	Exclusion programme with pathway management rules to prevent the establishment of kauri dieback in high priority kauri dieback-free zones.		
Transport corridors	Road corridor enforcement targeted to buffers around site-led programmes to maximise effectiveness.
