# What did we get feedback on?

# Who did we engage with?

**Early Engagement**  
*May-June*

**Issues with current Plan**

**Key challenges to address over next 30 years**

- Continued high population growth
- Greater environmental pressures
- Uneven distribution of growth benefits

## Feedback from early engagement – common areas of interest and concern

- concerns about population growth and the impacts of growth on infrastructure
- recognition that jobs are being displaced through technological change and the speed of this change will increase
- the special relationship with Māori as tangata whenua should be recognised throughout the plan
- there is a need to acknowledge the current state of the natural environment and cultural heritage, and that effective action is required just to “catch-up” to an acceptable level
- there was acknowledgement that increasing diversity will pose challenges, particularly around cohesion, but also that these challenges will be easier to surmount if communities value diversity

## Feedback from early engagement - common areas of interest and concern

- there is a role for central and local governments in creating systemic change in housing policy through areas such as:
  - regulation/legal incentives in home ownership
  - construction pipelines
  - and other interventions to achieve broader social outcomes (e.g. apprenticeships in the construction market)
- there needs to be greater security of rental tenure and recognition that a large proportion and greater number of Aucklanders will rent over a long term
- need for provision of meeting places such as parks and open spaces, plazas and community and recreation facilities to create “inclusive, resilient and thriving communities”
- focus more on public transport, particularly on: creating a punctual, integrated network that is reliable, affordable and safe; and considering inter-regional connectivity

## Development Strategy

The key considerations in shaping how we grow:

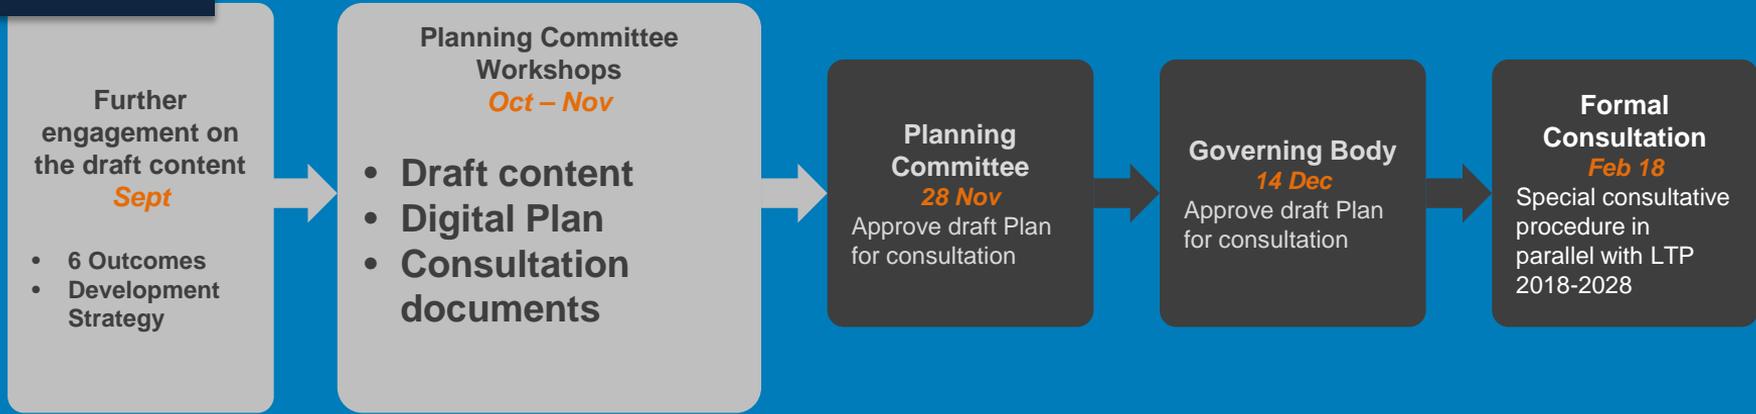

- Urban
- Future Urban
- Rural
- Infrastructure (incl. critical infrastructure)
- Opportunity areas
- Business
- Centres
- Neighbourhoods
- Place based initiatives
- Growth sequence – (incl. location, infrastructure required and outcomes we are trying to achieve)

Inputs from the outcomes influence how we grow – For example:

- Identifying future employment areas
- Identifying education opportunities and accessibility

## Next Steps

**Further  
engagement  
on work to  
date**

## **Key Questions:**

- **Do these strategic directions and focus areas address the issues that are important in achieving each outcome?**
- **Is this framework complementary to the strategic goals of Local Board's Plans?**
