2	Shape Auckland	1	Reduce the cost to ratepayers (council) of the plans for the Park.	This is an opportunity to reduce the cost to ratepayers of council expenditure.	Maori are not more special than any other ethnic group. We have a special relationship with the land, and we are not Maori. Objective 1 Policy 1.1-1.2 is racist.	Reduce the cost of this.	Objective 3 and Policies 3.1 - 3.4: Working with mana whenua = racism.	Reduce the cost of this.	Sounds like nonsense, council is not a moral or value installation organisation. Especially if there's a racist element.	Reduce the cost of this.	Reduce the cost of this.	Giving special privileges and rights to one group, based on the race of that group, is racism, and only instils racist views and creates social disharmony.  Also please reduce the cost of everything, it's hard enough to pay the bills as it is.  Also please get Maori and other elitist race-based privileged groups to pay their fair share in rates, etc.	Giving special privileges and rights to one group, based on the race of that group, is racism, and only instils racist views and creates social disharmony. 3	Shape Auckland	4	I mostly agree with the updated long term vision, but not raising the profile of the park to a wider Auckland audience. It is far too small to cater to more than the local community and we value it as a tranquil retreat. That said, with a playground and a cafe it can serve as a way point to connect the Gardens and Manurewa town centre.	The "risks associated with compromising the very values that make this park unique" cannot be overstated.  There is still a lot of work to be done to improve pedestrian and eventually also cycle connections to the Gardens and Manurewa town centre, but in the long term the carpark should be removed from the site entirely.	Agreed.	Pedestrian access along Hill Road needs further improvements.  Do not remove the playground. In fact, it needs a swing set.  Aim to remove the carpark in the long term.	Agreed.	Agreed.	Agreed.	Agreed.	Agreed, especially "improved connections to the Auckland Botanic Gardens, Manurewa Town Centre and train station" are essential.	Do not remove the playground. Add a swing set.  Improve pedestrian, cycle, and public transport connections to the Gardens and Manurewa town centre and aim to remove the carpark in the long term.  Traffic lights should be installed at the intersections of Hill Road and Claude Road and Hill Road and Grand Vue Road to allow pedestrians to cross safely on their way to and from the Gardens. The slip lane at the motorway off-ramp needs a zebra crossing at least. There also need to be cycle lanes along all of Hill Road in the longer term.	Agreed, but there must be community consultation at every step of the way.	David Nathan Park must continue to "provides a place where communities enjoy a sense of respite and tranquillity" and is already close to perfect, so any drastic changes risk "compromising the very values that make this park unique."
4	Shape Auckland	5	I feel strongly that this is an important piece of local history that needs to be protected, not just for Maori cultural values but for all New Zealanders, especially NZ European who can connect to their own sense of history and belonging to this place.	I think an example of a historic building that connects well to the community is Alberton House. The monthly market day attracts a great many locals. The cafe holds Devonshire teas and their is a sense of stepping back into that time period.  I agree that a rotunda or small stage area in the Gardens may allow for small gatherings, local musicians as well as small concert bands that would attract families and picnic enthusiasts.	I think the special relationship should be linked to the bush area. The homestead and surrounding gardens should remain linked to the period that it was built and have a more NZ European feel.	Maintaining The historical significance must be the priority.	I am uncertain as to why mana whenua feel they have a strong claim to this land. As a local family and NZ European I feel this connects generations of New Zealanders such as myself, who have been here for generations, to this place. I think this too must be protected. Mana whenua should not be an over idling entity on this site however I do believe the surrounding bush and native trees may have strong connections for them.	I would like to see events such as organised market days (such as Alberton House) bands playing in the garden, an improved cafe that flows out to garden seating and opens in the weekends.	Local school visits and Probus club visits etc where an expert on the history of Nathan Homestead was given, activities provided, lunch on site etc. This would promote opportunities for discussion about why this place is valued.	The classes provided currently could be expanded upon.	Although the entrance way is unattractive it would be difficult and costly to address this. A billboard outside with a photograph of the homestead would enlighten passerby of the Homestead.			
5	Email													I have reviewed the draft management/development plan for David Nathan Park. It appears to be an innovative plan that will highlight the special character of the park and will encourage visitors to the area. It is a hidden highlight of Manurewa and needs to be more visible to the public. I support the plan.
