

Actions required to Strategically Plan for Recovery [DGL 20/17]

| Key Considerations | |
|--|--|
| <p>To improve Group understanding of community values & priorities for recovery</p> <p>When developing a recovery vision and outcomes</p> | <p>→ Recovery vision and outcomes</p> <p>Develop an understanding of the sensitivities, values and priorities of Auckland’s communities through engaging with local boards and communities (both directly and indirectly) to better establish a recovery vision and outcomes.</p> |
| <p>Understand consequences and opportunities from specific hazards and risks / for hazards and risk management</p> | <p>→ Understand hazards and risks</p> <p>Contribute to discussion on risk and tolerance of risk under Action 9 “Develop an effective and comprehensive hazards and risk awareness campaign”</p> <p>Explore recovery scenarios based on the impacts associated with Auckland’s hazards and risks to identify and better understand the kinds of recovery activities potentially required</p> |
| <p>When identifying capability and capacity for recovery / establishing collaboration and leadership for recovery</p> | <p>→ Enabling recovery</p> <p>Proactively create opportunities to increase recovery competency and capability through formal training, exercises and knowledge sharing within Auckland Emergency Management, its volunteers, across the CDEM Group and the wider CDEM sector.</p> |
| <p>For a recovery preparedness performance framework / managing a recovery performance framework</p> | <p>→ Monitor and evaluate</p> <p>Identify a core set of indicators for successful recovery outcomes over the short, medium and long term.</p> |
