

GirlBoss New Zealand

Legal status:	Limited Liability Company	Activity focus:	Community
Conflicts of interest:	None identified		

Project: GirlBoss LEAD

Location:	Kingsway College and Murrays Bay Intermediate - back up option of Long Bay or Whangaparaoa College		
Summary:	GirlBoss LEAD is our signature two-hour workshop which has been successfully implemented into a number of schools in the Hibiscus and Bays area. For Y11-13 we focus on the development of future ready skills such as personal branding, online profiles, networking, interviewing, confidence, applying for scholarships and leadership development. Our GirlBoss LEAD programme for younger girls Y7-10 is focused on improving confidence and resilience and the development of leadership skills via the development and execution of their own initiatives within their communities. All of our workshops are delivered by 19-year-old GirlBoss CEO Alexia Hilbertidou with support from a NZ registered teacher with 20 years' experience.		
Dates:	01/10/2018 - 15/12/2018	Rain dates:	-
People delivering:	3	People attending:	70
% of participants from Local Board		100%	

Community benefits

Identified community outcomes:

Our 2 key community outcomes are:

1. A more confident, resilient, future ready workforce
2. Community engagement and participation

Part of our programme includes girls working in pairs or small groups to develop their own leadership initiatives. Attendees have started clubs within their schools, created conferences, hosted speakers at their schools, done beach clean-ups, won scholarships to leading universities and in one case, won a major Social Entrepreneur Award for the initiatives she developed with our mentoring.

All participants complete a survey at the end of the workshop.

Results from Westlake Girls - 42 participants: 100% increased confidence to network; 100% increased confidence to apply for work opportunities; 91% increased confidence to lead own project.

Orewa College (Year 7/8) - 41 Participants - 9 Maori - Results: 100% increased confidence to create, problem, solve and lead; 100% inspired to help their community

We ask all attendees: "What was the key message you will take away from today's workshop?"

Sample answers: Y11-13

'You should be confident about yourself and shouldn't be afraid to talk to anyone. I now know how to network, and talk with strangers a lot better than before this workshop'

'How to speak well at interviews'

'Really put yourself out there and stand out. You shouldn't be afraid to say your personal achievements and show how hard you have worked for it. Show your passions and interests'

Alignment with local board priorities:

Youth education and training opportunities

The mission of our education programme is to: improve personal, social and economic outcomes for the young women of Hibiscus and Bays. We offer a future focussed approach which prepares young people for future employment and higher education opportunities

Our 3 key aims are:

- The development of personal capabilities - confidence, resilience, awareness of challenges and strategies to overcome them.
- The development of work and employment capabilities - online presence, networking and interview skills, awareness of the future of work and its impact on careers
- Community participation - workshop attendees are encouraged to develop and execute on their own projects to positively impact their community.

Part of our programme includes girls working in pairs or small groups to develop their own leadership initiatives. Attendees have started clubs within their schools, created conferences, hosted speakers at their schools, done beach clean-ups, won scholarships to leading universities and in one case, won a major Social Entrepreneur Award for the initiatives she developed with our mentoring.

Financial information

Amount requested: **\$1,910**

Requesting grant for: We are requesting funding for the costs to deliver 2 two-hour workshops at 2 schools in the Hibiscus and Bays area. The funding will cover the costs of two facilitators, stickers, badges, photocopying, programme development, mints and chocolates for participants, travel costs and admin costs involved in organising and providing feedback to stakeholders.

If part funded, how would you make up the difference:

We have calculated each workshop to cost us approx. \$950 therefore we would deliver just one workshop if we were to receive only \$950. We would also seek out additional funding from other sources to make up the difference.

Cost of participation: no

Total expenditure	Total income	Other grants approved	Applicant contribution

Browns Bay Taiaotea Kindergarten

Legal status:	Incorporated Society	Activity focus:	Environment
Conflicts of interest:	None identified		

Project: Reusable wet bags for wet clothes

Location:	Browns Bay Taiaotea Kindergarten, 4 Woodlands Crescent, Browns Bay, North Shore, Auckland.		
Summary:	Children at kindergarten have plastic bags that are used to contain dirty and wet clothes. We plan to replace these single use plastic bags with waterproof reusable material zip bags. With each child having a named bag we can then remove the single use plastic bags from our environment entirely. Parents will purchase a bag on enrolment of their child and therefore be active participants in taking care of our environment.		
Focus specific:	<p>Environmental benefits: Fewer plastic bags going into landfill and therefore fewer plastic bags contaminating our local streams and beaches.</p> <p>We understand the power that young children have in influencing their whānau about the decisions they make.</p> <p>Our families know we are an Enviroschools kindergarten and the more we discuss recycling and reusing and reducing the more ownership, responsibility and empowered they feel to make change.</p>		
Dates:	01/09/2018 - 21/12/2018	Rain dates:	-
People delivering:	Teaching staff, 6 team members	People attending:	Currently 60 Children, plus whānau, teaching staff (6)
% of participants from Local Board		50%	

Community benefits

Identified community outcomes:

Community action and behaviour change:

Helps children and families to actively contribute to the reduction of single use plastic bags in our environment. Hopefully insuring families to address their use of single use plastic in other areas of their lives.

Removing single use plastic from our environment:

Remove commercial single use plastic from our environment and ultimately remove this waste from the rubbish collection and the physical environment

Educating and empowering children and future generations:

Children will gain better understanding of the importance of protecting their environment and will be able to share their knowledge and understanding with their families. We will be helping to equip the children to pass on this knowledge and understanding to future generations.

There will be no single use plastic bags in our environment.

Children will be empowered and in turn their families to be kaitiaki, guardians of the environment and part of the solution to reduce waste.

As our child rolls are continually changing as children turn five and move on to school, they will take their knowledge with them to the next learning environment, and likewise new children starting will have the tools to start their learning journey with us.

Alignment with local board priorities:

Educate our wider community on pollution prevention and stream care or undertake further stream enhancement projects

The children at kindergarten have plastic bags that are used to contain their wet clothes. Our plan is to replace these with waterproof material bags therefore eliminating the need for single use plastic bags. This will help to educate our children and their whānau and the wider community about the danger that single use plastic bags cause to the environment, our streams beaches and its inhabitants. It will also reduce plastic that fill our rubbish dumps and can flow into our local stream and beaches.

Collaborating organisation/individual	Role
No	

Demographics

Maori outcomes: *Māori focus - tikanga (practises), mātauranga (knowledge), reo (language)*
 Kaitiakitanga and stewardship represent the obligation of current generations to protect the environment for present and future generations. This project will empower our children to guardians and also teach their families of the benefits. This is underpinned by Mauri as a key concept for indigenous resource management and waste so that the land, water and food gathering sources are protected from an inappropriate use of single use plastic bags. This is inkeeping with Tikanga and mātauranga, with children and families being guardians of Papatūānuku and children being active participants as protectors of the environment.

Target ethnic groups: All/everyone

Promoting SmokeFree: n/a

Zero waste minimisation Removing 60 plastic bags from children's bags based on the number of children we currently have attending. This number would be larger but hard to quantify as parents replace plastic bags as they are use on a daily basis. With a wet bag for each child the need for these plastic bags would be removed as they can be use over and over again.

Percentage of males targeted	Percentage of females targeted	All - not targeted male/female
%	%	100%

0-5 years	< 15 years	15-24 years	25-44 years	45-64 years	>65 years	All ages
100%	%	%	%	%	%	%

Financial information

Amount requested: \$690

Requesting grant for: For the purchase of 120 wet bags.

If part funded, how would you make up the difference:

It would still go ahead, but at a greater expense for families. They would be required to play the full cost of the bags. If we receive the grant we can remove expense from current families (60) and remove expense from future families who are joining our service, to make participating in this venture more appealing.

Cost of participation: No

Forest & Bird Hibiscus Coast

Legal status:	Incorporated Society	Activity focus:	Environment
Conflicts of interest:	None identified		

Project: Welcome to the Godwits

Location:	Orewa Estuary Arts Centre, 2148 Hibiscus Coast Highway, Orewa & Orewa Estuary Walkway		
Summary:	We wish to highlight to our community our migratory waders that visit the estuary, their journey and the importance that we as a community ensure they have a safe, clean and healthy habitat while here. In the annual placement of 'The Flock' of plywood cut out birds at a key point on the estuary, a public presentation about the migratory birds and a guided walk we will promote the estuary and also increase awareness of the 53 species of waders and migratory birds that visit the Estuary, a key focus of the Orewa Estuary Restoration Plan.		
Focus specific:	Environmental benefits: To create an awareness of the habitats required to encourage migratory birds to use the Orewa Estuary. Public understanding and participation in caring for the surrounding areas of the Estuary.		
Dates:	01/10/2018 - 31/10/2018	Rain dates:	-
People delivering:	Approx 10	People attending:	500+
% of participants from Local Board		100%	

Community benefits

Identified community outcomes:

With involvement comes awareness. We hope the community becomes aware of the importance of the estuary's environment and compassion and enthusiasm to care for it for the wildlife that uses it. Through participation of the project and discussion and feedback from the community.

We have dedicated annual bird counts around the area local to the Orewa Estuary that will in the coming years measure the effectiveness of the Orewa Estuary Restoration Plan and also we hope to see an increase in volunteer numbers through the awareness we provide.

Alignment with local board priorities:

Provide benefit to or support the North-West Wildlink project

Hibiscus Coast Forest & Bird Branch fully support the North-West Wildlink Project through our Pest Free Peninsular Project and Auckland Council funded Orewa Estuary Restoration Plan. Through the awareness for conservation, we encourage through our "Welcome the Godwits' events, pest control and plant management we are working providing a safe habitat for birds migrating from Tiritiri Matangi through to Arc in the Park.

Brake (New Zealand)

Legal status:	Charitable Trust	Activity focus:	Events
Conflicts of interest:	None identified		

Project: World Day of Remembrance for Road Traffic Victims

Location:	Orewa Beach Reserve, Orewa		
Summary:	<p>This is an opportunity for families affected by road crashes, support organisations, emergency services and community groups to come together to remember those killed and injured on our roads and to thank those professionals who work to save lives. This event is part of the World Day of Remembrance, coordinated by FEVR. It will involve a short memorial service involving speeches and poems, creating small remembrance tokens to take away, and an opportunity to meet with other families, support orgs and emergency services. We will continue the tradition of lighting the Norfolk Pine tree on the reserve. This event has been held for several years and was kindly supported by the local board in 2017.</p>		
Dates:	18/11/2018 - 18/11/2018	Rain dates:	-
People delivering:	2	People attending:	We expect around 25 attendees, though there may be more, plus wider community awareness with organisations, community groups and the public
% of participants from Local Board		90%	

Community benefits

Identified community outcomes:

The event aims to:

- provide an opportunity for families affected by crashes to come together and remember loved ones
- provide an opportunity to thank emergency services for the work they do to try and save lives
- raise awareness with attendees and the wider community of the impact that road crashes have, where to access support if you're affected by a crash, and of local organisations that work with the community in this way.

We will measure:

- quantitative. We will hold the event and measure the number of attendees on the day and number of organisations involved in the event, taking part on the day, and supporting the event through marketing. We will also measure any media coverage from press releases, and social media impact.
- qualitative - we will gain feedback from support organisations and other community groups involved about what worked and what could be improved for future. We'll also gain feedback from bereaved and injured families who are willing to provide feedback.

- We will have succeeded if there is a desire within the community to continue holding a World Day of Remembrance event in 2019 and beyond.

Alignment with local board priorities:

Provide opportunities for place-shaping and identify what contribution you are making to the project within the local board area

This event provides an opportunity for local families and groups to continue the tradition of the World Day of Remembrance for Road Traffic Victims in Orewa, including the lighting up of the Norfolk Pine tree on Orewa Beach Reserve for the summer.

It will again involve local people, local businesses, local community groups and local emergency services coming together to remember those killed and injured on roads.

It is open to everyone.

Collaborating organisation/individual	Role
Victim Support	Helping to organise, inviting families and others to attend, involved in providing support to families on the day if needed.
The Grief Centre	Involved in providing support to families on the day if needed and inviting families and others
Other local groups TBC	

Demographics

Maori outcomes: n/a

Target ethnic groups: All/everyone

Promoting SmokeFree: Event will be advertised as smoke-free on posters and flyers

Zero waste minimisation No, but we will minimise waste ourselves through using items that can be reused and/or recycled.

Percentage of males targeted	Percentage of females targeted	All - not targeted male/female
%	%	100%

0-5 years	< 15 years	15-24 years	25-44 years	45-64 years	>65 years	All ages
%	%	%	%	%	%	100%

Financial information

Amount requested: \$705

Requesting grant for: We are requesting funding for:

- Hire of a marquee with walls, to enable the event to go ahead in wet or dry weather
- Production of posters and flyers for publicising the event
- Refreshments for the attendees
- Event permit

We have also requested a small amount of funding towards staff costs for organisation of the event, and contingency to cover any unforeseen resource needs.

If part funded, how would you make up the difference:

The event would still go ahead. If only partial funding was available we would like the event permit and marquee hire covered if possible, as this is key to enabling the event to go ahead in wet or dry weather. We would apply for other funding to cover other aspects of the project, and if that was unsuccessful then we would be unable to provide certain aspects of the event such as refreshments.

Cost of participation: No cost
