Local board priorities

Choose the local board priority your event or activity aligns with: *

Our transport infrastructure keeps pace with the needs of our communities. Our growing townships have the same choices for quality public transport as the rest of Auckland. Communities have access to walkways, bridleways and cycle ways. Our roads are well maintained.

Our communities influence local decision-making. They are empowered and enabled to act and take the lead on community projects and in the planning for their areas. Community

groups and residents partner with the council and others to identify and deliver what is best for them.

- ☑ Our local parks and sports facilities cater to a wide range of sporting and recreational interests. They are easily accessible, connecting our towns, villages and growth areas. Our parks are enjoyable places to visit and relax or be active in.
- ☑ Our harbours and the rivers and streams that feed them are healthy and thriving natural marine environments. Our storm water and wastewater services are reliable, well maintained and environmentally friendly, minimising downstream environmental impacts. There is minimal sediment and silt flowing into our waterways from new developments and earthworks.
- ☐ Local facilities that are the heart of our communities. They are well used and cared for by the communities that manage them. The diverse range of activities run by our communities creates a rich and accessible arts and culture scene.

How will the priorities you have selected be supported by your event or activity? *

'The Gem' ocean swim event will be the catalyst for motivating thousands of Rodney residents to get healthy and active through swimming. It will have a positive impact on the patronage in sports facilities/swimming pools and bring people together from across the district.

The event has been initiated and led by local residents. The event owner, Quantum Events, is based in Rodney (Orewa) and its Director, Scott Rice, resides in Hatfields Beach and Event Operations Manager Lauren Harrod resides in Millwater. Selected community groups from around the Matakana Coast will provide the event up to 25 volunteer event crew. These groups will be remunerated with a cash donation from the event. The experience of working on an event of this scale will provide these groups valuable experience and insights as to how to run events in their own communities. The donation provided will help to fund local initiatives.

The Gem will deliver wide community benefit and encourage community participation at scale. Local families will attend to enjoy the action and festivities on Omaha Beach and reserve spaces, swimmers and swimming enthusiasts from 7 years old will attend to take part or spectate, local Omaha/Matakana Coast residents will attend to enjoy a major event on their door step and local community groups will form a part of the event team.

The Gem will be an annual major event in Omaha that will build local community pride by bring together the towns

and villages of the local board area. The Gem will attract a significant regional and national audience to experience Omaha and the Matakana Coast annually. This will no doubt have a positive impact on people considering the area as a place to live, work and invest.

Quantum Events strives to be an environmentally responsible and sustainable business. Sustainability to us, is meeting the needs of today without adversely impacting on the needs of tomorrow. Beautiful beaches and clean waters are what our event, and participants rely on so we work hard to ensure our events leave them the way we find them. That's why The Gem, Omaha supports Sustainable Coastlines. Sustainable Coastlines mission is to enable people to look after the coastlines and waterways they love and we are right beside them. Participants are encouraged to donate to the charity and to set up local clean up around the Rodney district. All our event vendors have been chosen as a result of their individual attempts to also be environmentally sustainable businesses. We have asked them not to use products such as single use plastic container or straws and to serve their products. We want to ensure that we create the least amount of waste possible at our events and provide opportunities for the waste to be disposed of correctly. Providing landfill waste and recycling bins gives people the ability to be responsible.

Round: 2018/2019 Rodney - Targeted Events Grant Round One

1819 Rodney Targeted Events Grants application

Application TE1916-101 From Quantum Events Ltd

How have you established there is a need for this project? *

With the growing diverse population of the Rodney District there is a strong community desire for more major events and in particular water based events. Staging major events in Rodney develops community pride and makes it more accessible for residents to get involved. With hundreds of kilometres of coastline boarding the Rodney district it is a priority to ensure that residents are confident swimmers. The Gem will give residents a reason to improve their swimming and fitness level, and increase their confidence in and around the ocean. Swimmers, surf clubs and swim clubs in Rodney have been requesting that we consider an event in the district for many years.

Must be no more than 120 words.

What are the community outcomes of your project? *

The Gem will benefit the local community in the following ways;

It will attract thousands of Auckland residents from their home suburbs to to the very top of the city boundaries to explore the beautiful Omaha/Matakana Coast area.

The Gem will deliver an estimated \$500,000 economic benefit to the district.

Creates opportunities for local people to connect with each other and builds local community pride.

Profiles the towns on the Matakana Coast as a great place to live, work and invest.

Gets youth (7-19) and the local community active by providing an exciting event to train for and take part in.

Provides opportunities for a diverse range of residents and community groups to contribute and be involved.

Up skills local community groups on major event management best practices which will benefit the quality and scale of community events. Donations to these community groups can help to fund local initiatives.

Provision of event photos and video content for use by Rodney tourism organisation.

Positively contributing to the local environment through donations to and initiatives with charity partner Sustainable Coastlines.

Must be no more than 200 words.

Describe three things you want the project to achieve in terms of benefits for participants and/or others

How will you measure these outcomes? *

Event Entry Data and Post Event Attendee Survey.

We conduct this survey to understand their level of satisfaction with their event experience and as well as additional information such as length of stay in the region, additional activities they took part in in the region and spending habits while in the region.

Travel and visitor data is then put through a Tourism NZ metric to determine the estimated economic impact from the event.

Choose the local board priority your event or activity aligns with: *

- Our transport infrastructure keeps pace with the needs of our communities. Our growing townships have the same choices for quality public transport as the rest of Auckland. Communities have access to walkways, bridleways and cycle ways. Our roads are well maintained.
- Our communities influence local decision-making. They are empowered and enabled to act and take the lead on community projects and in the planning for their areas. Community groups and residents partner with the council and others to identify and deliver what is best for them.
- Our local parks and sports facilities cater to a wide range of sporting and recreational interests. They are easily accessible, connecting our towns, villages and growth areas. Our parks are enjoyable places to visit and relax or be active in.
- Our harbours and the rivers and streams that feed them are healthy and thriving natural marine environments. Our storm water and wastewater services are reliable, well maintained and environmentally friendly, minimising downstream environmental impacts. There is minimal sediment and silt flowing into our waterways from new developments and earthworks.
- Local facilities that are the heart of our communities. They are well used and cared for by the communities that manage them. The diverse range of activities run by our communities creates a rich and accessible arts and culture scene.

How will the priorities you have selected be supported by your event or activity? *

The Leigh community has undertaken a number of projects over the last few years to improve the standard of walking tracks along the Rodney coastline. This land is fragile terrain and requires properly formed and engineered tracks. This is a costly exercise, requiring consolidation, compaction, levelling and retaining of the coastal face. Due to the significant water run-off in the area, formed metalised tracks with adequate drainage is required to limit erosion and seepage.

In addition the Leigh & Districts Ex Services & Community Club works closely with environmental agencies who are charged with preserving and enhancing the habit in areas of natural significance. Leigh is the closest settlement to Hauturu (Little Barrier Island) and thus has an increased responsibility in ensuring that the natural fauna and flora is maintained and preserved. It is also a haven for migratory birds that have flown in from Hauturu. With greater care of this coastal fringe there is increased of native birds such as kaka that have been under threat now flourishing in the area.

Part of this work has been to reduce the predator population through regular setting of rodent traps. Locally we are concerned that we do all we can to have tracks formed that will limit any further instances of kauri dieback.

The proposed new initiative is to extend the Leigh coastal walkway by completing a formed track on Kowhai Terrace Reserve, on land owned by Auckland Transport. This new track will formalise arrangements with adjacent landowners. The section of land is 30 metres which requires consolidation, levelling and the formation of a benched accessway.

The Matakana Coast Trail Trust is very happy to support the proposed project is an "Connected Trail" within the Rodney Greenways Trail.

The Leigh Business Community recently discussed the project with Cr Greg Sayers and Local Body Chair Beth Houlbrooke who both support it.

Please describe your project in three to four sentences *

The proposed new initiative is to extend the Leigh coastal walkway by completing a formed track on Kowhai Terrace Reserve, on land owned by Auckland Transport. This new track will formalise arrangements with adjacent landowners. The section of land is 30 metres which requires consolidation, levelling and the formation of a benched accessway.

This accessway is a "Connected Trail" within the Rodney Greenways Trail.

The area of land is owned by Auckland Transport, a Council Controlled Organisation of Auckland Council . This project will improve the amenity value of a piece of land that is presently overgrown and unsightly.

Round: 2018/2019 Rodney - Targeted Events Grant Round One

1819 Rodney Targeted Events Grants application

Application TE1916-103 From Leigh & Districts Ex Services & Community Club Inc

Community benefits

How have you established there is a need for this project? *

Consultation with community at public meetings. Constant inquiries from tourists and visitors keen to explore the Rodney coastline. Engagement with Forest and Bird Community Coast Care Group and Leigh Harbour Valley Society. Feedback from Leigh Business Group members who are constantly asked how visitors may access these areas of beauty..

The Forest and Bird Community Coast Care Group has met with Raewyn Sendles of Auckland Council who has agreed with the plan to re-establish endemic species in the areas where pest plants have been removed. The proposal is to clear pest plants and re-establish natives on the land involved. The Community Club members will assist with this planting.

The accessway will add a further section of the Rodney Greenways Trail.

Must be no more than 120 words.

What are the community outcomes of your project? *

1. Completion of section of Leigh coastal walkway which at present shows on local maps but does not in fact exist.
2. Improved community amenity in an area of high visitor and tourist interest
3. Re-establishment of native habit in an area that is currently overrun with plant and animal pests

Must be no more than 200 words.

Describe three things you want the project to achieve in terms of benefits for participants and/or others

How will you measure these outcomes? *

1. Increased bird count along coastal accessway
2. Reduction in soil erosion and silt run off into Leigh Harbour
3. Improved visitor satisfaction through use of completed accessway

Must be no more than 150 words.

Describe three changes you will see if the expected outcomes of the project occur

How many people are directly involved in the delivery of this project? *

10-30 volunteers

e.g. team members

What is the estimated number of people reached through this project? *

Estimated 300-1000

What expertise does your organisation have in delivering similar projects? *

The Community Club has undertaken several similar projects successfully and to the satisfaction of Auckland Council.

Among the projects recently undertaken has been the upgrade of the track from Wonderview Rd to Kyle Street. This was supervised by Steve Mantle, a long standing construction company director who has considerable experience and expertise in project managing large building projects.

The Leigh & Districts Ex Services & Community Club Inc have provided community amenities including planter boxes at Leigh shopping area, park benches along coastal tracks, improvements to the Leigh "Gateway", local skate park and viewing platform on Rodney Rd.

Organisation objectives / Ngā whaingā me te ripoata ā tau

What are the primary objectives of your organisation? *

Every Body is a Treasure is a group of artists, mothers, grandmothers, and aunties that are all about creative mojo. About helping women to see it again in themselves and girls to never lose it. Body compassion is our gateway. Our belief is that if you are at war with your body, you are wasting precious creative energy, so if you can learn to be compassionate with yourself, you become much more creative. Creative compassionate communities is our aim.

Must be no more than 120 words

What activities or services does your organisation offer to achieve these objectives? *

We use arts and movement based activities to achieve our aims. Specifically the Every Body is a Treasure Travelling Photographic Exhibition that is collecting photographs of women covered from neck to bottom of their belly in golden clay. It is a counterpoint to the 400-600 photoshopped images our daughters see each day. We also put on our activism forum called Generation Mojo. This is full weekend of arts based workshops designed to create the next lot of female socially active leaders. These arts and movement based workshops for mothers and daughters are used as springboards for pay it forward artistic service projects in the community.

Local board priorities

Choose the local board priority your event or activity aligns with: *

- Our transport infrastructure keeps pace with the needs of our communities. Our growing townships have the same choices for quality public transport as the rest of Auckland. Communities have access to walkways, bridleways and cycle ways. Our roads are well maintained.
- Our communities influence local decision-making. They are empowered and enabled to act and take the lead on community projects and in the planning for their areas. Community groups and residents partner with the council and others to identify and deliver what is best for them.
- Our local parks and sports facilities cater to a wide range of sporting and recreational interests. They are easily accessible, connecting our towns, villages and growth areas. Our parks are enjoyable places to visit and relax or be active in.
- Our harbours and the rivers and streams that feed them are healthy and thriving natural marine environments. Our storm water and wastewater services are reliable, well maintained and environmentally friendly, minimising downstream environmental impacts. There is minimal sediment and silt flowing into our waterways from new developments and earthworks.

Application TE1916-104 From Every Body is a Treasure CT

Local facilities that are the heart of our communities. They are well used and cared for by the communities that manage them. The diverse range of activities run by our communities creates a rich and accessible arts and culture scene.

How will the priorities you have selected be supported by your event or activity? *

We are supporting the development of a powerful new generation of female leaders that take personal and social responsibility seriously. Our creative youth-oriented workshops help girls and their mothers to unpack their own creative and body compassion blocks. When a girl is deeply concerned about how her looks vary from what is promoted on social media this becomes a drain on her creative energy. It is demonstrated that depression is closely linked with body shame. And at the same time mothers of tween and teen age girls are the age bracket most likely to be depressed and to be lost to suicide according to Ministry of Health Statistics. Our project uses art as a means of gently opening this can of worms in a safe environment and allowing community to form around discussing how we can protect ourselves from this societal pression.

The event is being developed for the Rodney district by local Alyson Middelgouw Marsden and a group of local mothers and artists supported by the work of Every Body is a Treasure Charitable Trust which has developed the award-winning Generation Mojo program. After learning the skills in the workshop the youth leaders will be challenged to pay it forward back into the Rodney Community through arts based activism. (Artivism). All intermediate and highschoools will receive scholarships to allow a number of their students to attend the event along with their mothers or female guardian. The strongest bit of feedback we have received from the previous workshops has been that there was a deep sense of community developed and new friendships formed by both mothers and daughters from different towns in the regions. It is also a cellphone-free zone allowing people to connect without the barrier of a device between them...especially mothers and daughters.

Mother Daughter forum that uses the subject of developing body compassion as a pathway to develop community leadership skills. We gather together local artists and body positive movement coaches to run creative workshops to help mothers and daughters learn to love and take care of the skin they are in no matter their size, shape, or current level of health. The participants are then challenged to take what they learned and lead various creative projects that share their new knowledge with their neighbors and this work becomes the subject of an episode of a Web series currently in development called Generation Mojo.

Community benefits

How have you established there is a need for this project? *

Based on the overwhelming feedback from the 6 events held in other regions of New Zealand. The New Zealand Girl Guides surveyed their members and the front of mind problem facing their members was body shame. Couple that with rising eating disorder diagnosis, increasing social media pressures, increasing rates of suicide among 10-14-year-old girls, and rising depression rates. If the local board(s) is unable to fund the full amount you request, would a smaller grant still be of assistance? *

Yes No

If only part of your project can be funded, which part would you prefer?

Yes, However if it is not very close to this amount then we will probably have to consider shifting the project down to the North Shore. Our preference Rodney region though. Your venue is more picturesque for the webseries side of the house. But we have to go where it is financially feasible to operate. We could get away without the shirts for the volunteers but this would not allow us to honour the local contribution as much as we would like and leave with happy gratitude

Local board priorities

Choose the local board priority your event or activity aligns with: *

Our transport infrastructure keeps pace with the needs of our communities. Our growing townships have the same choices for quality public transport as the rest of Auckland.

Round: 2018/2019 Rodney - Targeted Events Grant Round One

1819 Rodney Targeted Events Grants application

Application TE1916-106 From Rodney Neighbourhood Support Incorporated

Communities have access to walkways, bridleways and cycle ways. Our roads are well maintained.

☑ Our communities influence local decision-making. They are empowered and enabled to act and take the lead on community projects and in the planning for their areas. Community groups and residents partner with the council and others to identify and deliver what is best for them.

☐ Our local parks and sports facilities cater to a wide range of sporting and recreational interests. They are easily accessible, connecting our towns, villages and growth areas. Our parks are enjoyable places to visit and relax or be active in.

☐ Our harbours and the rivers and streams that feed them are healthy and thriving natural marine environments. Our storm water and wastewater services are reliable, well maintained and environmentally friendly, minimising downstream environmental impacts. There is minimal sediment and silt flowing into our waterways from new developments and earthworks.

☐ Local facilities that are the heart of our communities. They are well used and cared for by the communities that manage them. The diverse range of activities run by our communities creates a rich and accessible arts and culture scene.

How will the priorities you have selected be supported by your event or activity? *

How does your project support the selected priority? *

Our Activity is to work with the local Police and Community Patrol to run an Activity called Safer Plates in the Local Area of Kumeu and Helensville. We will also have be present at the Kowhai Festival, Warkworth, Kumeu Show, Kumeu and Warkworth Show Warkworth. We will also provide

support to the already established Neighbourhood Support Street Groups, help them to connect with their neighbours and to hold occasional get Togethers, including taking each year in Neighbours Day. They are made up of people from all age groups and ethnicity of 4302 households, We communicate with all our members and the Street Contacts regularly by Newsletters and provide them with Crime Prevention information. Our Coordinators visit their locally organised meetings. We encourage the formation of Street Groups, Contacts and Local Suburb Coordinator. We provide training to enable them to set up successfuGroups. Our training helps our volunteer Contacts and Coordinators to gain and build self

confidence so as to communicate more easily with their neighbours to help ensure we can help our communities to feel connected safe and secure. Our Members also work closely with the Auckland Emergency Management. If our members have set up local Street / Community Neighbourhood Support Groups, they then have the with knowledge of the needs and requirements of the households in the local area. This is important especially with the unexpected weather emergencies that are appearing more in recent times. The local neighbours are more aware and observant of any suspicious activities happening there area and can take action if required by advising the Police immediately at the time.

Application TE1916-106 From Rodney Neighbourhood Support Incorporated

How have you established there is a need for this project? *

The Activity is for the Safer Plates is indicated to be required because of how easy it is for Number Plates attached with regular screws are stolen. This is a Police, Community Patrol and Neighbourhood Support initiative. There is a lack of active Neighbourhood Support Groups in some parts of Rodney and some new housing areas do not have a connection with Auckland Emergency Management with whom we also work closely.

Must be no more than 120 words.

What are the community outcomes of your project? *

The outcome we hope for are for many cars to have number plates made hard to remove. That we many more streets in the Rodney area with Neighbourhood Support Groups who have met with each other and are able look after each other in an emergency

Must be no more than 200 words.

Describe three things you want the project to achieve in terms of benefits for participants and/or others

How will you measure these outcomes? *

We will have a total of how people have new screws in the number plates on their cars.

We measure the outcomes by the number of new members we are able to distribute our

Information Packs to and who sign up to our Organisation. Which can include both our Data

Base as well as our closed Facebook Group

Must be no more than 150 words.

Describe three changes you will see if the expected outcomes of the project occur

How many people are directly involved in the delivery of this project? *

At Least twelve, but could be more volunteers

e.g. team members

What is the estimated number of people reached through this project? *

Unknown

What expertise does your organisation have in delivering similar projects? *

The Police, Community Patrol, and the Emergency Management Groups of East Rodney have all been involved in similar Activities previously.

Local board priorities

Choose the local board priority your event or activity aligns with: *

- Our transport infrastructure keeps pace with the needs of our communities. Our growing townships have the same choices for quality public transport as the rest of Auckland. Communities have access to walkways, bridleways and cycle ways. Our roads are well maintained.
- Our communities influence local decision-making. They are empowered and enabled to act and take the lead on community projects and in the planning for their areas. Community groups and residents partner with the council and others to identify and deliver what is best for them.
- Our local parks and sports facilities cater to a wide range of sporting and recreational interests. They are easily accessible, connecting our towns, villages and growth areas. Our parks are enjoyable places to visit and relax or be active in.
- Our harbours and the rivers and streams that feed them are healthy and thriving natural marine environments. Our storm water and wastewater services are reliable, well maintained and environmentally friendly, minimising downstream environmental impacts. There is minimal sediment and silt flowing into our waterways from new developments and earthworks.
- Local facilities that are the heart of our communities. They are well used and cared for by the communities that manage them. The diverse range of activities run by our communities creates a rich and accessible arts and culture scene.

How will the priorities you have selected be supported by your event or activity? *

Community influencing local decision making - project focused on empowering community to future-proof through replanting and managing land to not only minimise storm damage but also promote localised, resilient food forests on available and suitable land (public and private). This project can assess levels of community engagement with initiatives like this in Rodney, thus influencing future council (and wider government) decision making and policy (see MPI 1 billion trees initiative talking about community engagement to fulfil objectives.)

Healthy waterways - project focuses on sustainability and replanting of land to stabilise and fortify natural environment. At Waitakere school (as an example) areas surrounding waste water pipes can be better replanted with NZ natives to safely deal with unwanted effluent leakage into water system while adding to the environment and mitigating some emissions effects. Food forest comprises multiple level canopies of productive planting with a degree of re-wilding thus encouraging less run-off from exposed soils and positively impacting upon poorly drained low lying areas through permaculture design.

Local facilities at the heart of the community - communities would use this space. Food is something that links everyone and there is a growing interest in gardening, growing your own food and being proactive to solve the problems of food transport in the age of climate change. This comes at a time when many people find themselves unable to own their own homes and therefore explore any desires to create gardens of their own. Many people

are also time poor but would find it easier (and more socially beneficial) to share a space that could be used and looked after within the community (across all ages, genders and ethnicities). This kind of landshare approach could be encouraged on private land in addition to school owned/public land projects.

Yes No

Please describe your project in three to four sentences *

Community empowerment to reforest New Zealand.

Replanting of marginal, public and private land with NZ native species and food forests to encourage diverse, healthy environments and communities, localise food, promote good health and wellbeing through getting out into nature, enhancing the experience of community and connection, exercise and eating well through education in action. This project focuses on young people from primary school to university age with an understanding that they can be key influencers in family decision making across multiple generations.

Event - planning a food forest	March 2019	Community engagement for food forest + additional resources
Event - plant a food forest	March 2019	Local food forest, reducing future food poverty and increasing community health and wellbeing

Community benefits

How have you established there is a need for this project? *

Having recently worked as a medical practice manager in Huapai I was struck by how little time there is to get out and impact on our natural environment (although an avid gardener and lucky to live next to covenanted natives) in this time of changing climate. Have spoken with doctors, nurses and parents of Waitakere school who all agree that a project of this would be valid in actively improving people's general sense of connection, community health and wellbeing and promote healthy living and eating while positively impacting on the natural environment and encouraging more people to take action in replanting and exercise where they can.

Must be no more than 120 words.

What are the community outcomes of your project? *

Improved community resilience, well being, health and connection.

Access to space to grow things and harvest the produce (decrease food poverty and create centre for localised food)

Healthy, diverse natural environment having an impact on resilience to floods, storms and healthy waterways.

Must be no more than 200 words.

Describe three things you want the project to achieve in terms of benefits for participants and/or others

How will you measure these outcomes? *

Survey participants (before to gauge what they want/expect from involvement and after to gauge project effectiveness)

Visual measurement of trees and food forests planted (+6 months, +1 year, +2 years)

What is the estimated number of people reached through this project? *

10000+

What expertise does your organisation have in delivering similar projects? *

My background is in medical practice management and supporting people with intellectual disabilities and I've spent 10 years+ organising people and logistics of businesses to achieve sustainability. Have researched and experimented personally for the last 5 years in regenerating and replanting of land to produce diversity therefore have a strong network of highly experienced horticulturists and permaculture experts to draw upon who are expected to join the project if we can get some funding to get the ball rolling. Expert in planning sustainable projects with an MBA majoring in Sustainability (Distinctions in Social Entrepreneurship, High Performing Teams, Sustainability Leadership in the 1st Century & Climate Change strategies)

Māori Outcomes

Is your organisation Māori or are you a Māori individual? *

Yes No

Auckland Council provides funding for Māori and wider organisations to uplift Māori well-being and achieve better outcomes with Māori.

Will your project/activity target Maori or Maori outcomes?

Yes No

Maori outcomes include Maori events, Maori sculpture and public art or protection of Maori cultural heritage eg waahi tapu. Improving Maori social, economic, and cultural well-being. Uses matauranga and tikanga Maori and works with mana whenua or Maori organisations to produce shared outcomes.

Please select which Māori outcome applies to your project? *

Māori led - either a Māori organisation that is applying or Māori directed (came about as a request from Māori).

Māori involvement in the design/concept

Māori focus - tikanga (practises), mātauranga (knowledge), reo (language)

Māori participation - Māori priority group, target group, high representation or Māori staff delivering

Please explain how your project/activity will achieve the above Māori outcomes *

How will the priorities you have selected be supported by your event or activity? *

By encouraging each area to work together in an area where this doesn't happen, this will bring the communities together and enable them to look at issues from a regional perspective rather than just their town. The goal is to build this event into one that runs over 1/2 weeks and to have people from each community supporting the events happening in the other towns. The goal is to have in the future a wide range of community events that engage the local community and attract visitors in to the different parts of the Mahurangi. We hope that over time this event can grow to be a one to two week event with numerous events taking place throughout the Mahurangi region. There is nothing that happens over the winter months and visitor numbers dwindle, accomodation providers and cafes and in fact most businesses struggle over these months so the more we can do to encourage people to visit, stay, spend money the better it will be for the area. Also because it is so quiet over the winter there is not a lot to smile about and the hope is that we can bring some joy back into the region. We also hope over time that this will become the winter version of the Kowhai Festival which has been running for 49 years and will become something that people in Warkworth, Matakana, Leigh and Snells Beach will look forward to and that schools and community.

This event was a huge success in July of 2018 with locals saying it was one of the best family events ever held in and around Warkworth.

A conflict of interest could arise where you (the applicant) have a responsibility as a result of receiving council grant monies. This could affect another responsibility, duty or relationship you may also have.

For example

- If you are an Auckland Council employee/local board member or a councillor
- If your organisations committee or board member is an Auckland Council employee/ local board member.
- Personal or family relationships that you have
 - with council employees
 - with council contractors
 - organisations or persons that you will procure services from with the grant monies
- Financial relationships
 - e.g. investments that you have in entities that you will procure services from with the grant monies
- Employment relationships or membership of clubs
 - e.g. you intend to procure services with the grant monies from your employer or a club you are a member of - who will benefit financially from the arrangement.

Organisation objectives / Ngā whaingā me te ripoata ā tau

What are the primary objectives of your organisation? *

Our mission at Waimauku Tennis is to provide the best tennis experience for the NorWest community. Our vision is to be the hub of NorWest tennis, providing the community with quality, affordable tennis for players of all ages and abilities.

Our club has four values which guide us, all members are asked to abide by these values.

Inclusive - welcoming everyone and providing appropriate opportunities for everyone to play and enjoy tennis

Respectful - respectful of all of our people, our property and our reputation

Responsible - responsible for our history and the future of the club

Fair - fair both on and off the court

Must be no more than 120 words

What activities or services does your organisation offer to achieve these objectives? *

Our club provides the local community with year round opportunities to participate in sport. Participating in sport helps build strong communities and improves physical health and well-being. The junior and senior program supports players from their first pre-school hit, through the peak of their performance and in the sunset of their tennis careers. We are a fast growing club with members aged from 4 through to 80+. We also run club sessions four times a week which are open to the general public who wish to participate and easy tennis courses and pump tennis sessions which appeal to a broader range of participants

Must be no more than 120 words

1819 Rodney Targeted Events Grants application

Application TE1916-109 From Waimauku Tennis Club

Local board priorities

Choose the local board priority your event or activity aligns with: *

- Our transport infrastructure keeps pace with the needs of our communities. Our growing townships have the same choices for quality public transport as the rest of Auckland. Communities have access to walkways, bridleways and cycle ways. Our roads are well maintained.
- Our communities influence local decision-making. They are empowered and enabled to act and take the lead on community projects and in the planning for their areas. Community groups and residents partner with the council and others to identify and deliver what is best for them.
- Our local parks and sports facilities cater to a wide range of sporting and recreational interests. They are easily accessible, connecting our towns, villages and growth areas. Our parks are enjoyable places to visit and relax or be active in.
- Our harbours and the rivers and streams that feed them are healthy and thriving natural marine environments. Our storm water and wastewater services are reliable, well maintained and environmentally friendly, minimising downstream environmental impacts. There is minimal sediment and silt flowing into our waterways from new developments and earthworks.
- Local facilities that are the heart of our communities. They are well used and cared for by the communities that manage them. The diverse range of activities run by our communities creates a rich and accessible arts and culture scene.

How will the priorities you have selected be supported by your event or activity? *

The Waimauku Tennis Club summer season promotional activities will support the local board in providing a wide range of sporting and recreational interests by increasing awareness of the Waimauku Tennis Club and its activities. The existing signage requires replacement, the new signage will include contact details ie. the club website and facebook details. Once people connect with the club via either the website or facebook they will be able to see how they can join the club or participate as non-members. Having these contact details on the signs makes information more accessible and the facilities more accessible to the community. The investment of upgraded signage will also ensure the community also knows the location of the club.

The new signage will also allow special events such as open days to be promoted via double sided banners that can be attached to the sign.

The club has grown 50% over the last two years, the increased membership has allowed the club to offer a wider range of activities, it continues to offer traditional lessons, club tennis sessions and inter club competitions and has introduced community play sessions after school on Wednesdays which allows younger children to play and cardio tennis which combines fitness with basic tennis skills. Making the club more accessible to the community will increase participation and allow the club to further diversify activities.

Investing in improved signage will ensure everyone in the community knows and can participate in club activities both this coming season and in the future.

Is your project on council owned property/land?

Yes No

Please describe your project in three to four sentences *

Aligned to the club value to be inclusive welcoming everyone and providing appropriate opportunities for everyone to play and enjoy tennis we wish to renew the club signage. The Waimauku roundabout project required changes to the RSA carpark, resulting in the RSA asking for the club sign to be moved. A new triangular sign frame has been erected by club volunteers and the old club sign temporarily used. The move damaged the old sign so it needs replacing. A new sign gives the opportunity to include more information such as the website and email address and a stand for flag banners to promote special events such as open days. Renewing the sign is part of the overall 2018/19 club promotion

Local board priorities

Choose the local board priority your event or activity aligns with: *

- Our transport infrastructure keeps pace with the needs of our communities. Our growing townships have the same choices for quality public transport as the rest of Auckland. Communities have access to walkways, bridleways and cycle ways. Our roads are well maintained.
- Our communities influence local decision-making. They are empowered and enabled to act and take the lead on community projects and in the planning for their areas. Community groups and residents partner with the council and others to identify and deliver what is best for them.
- Our local parks and sports facilities cater to a wide range of sporting and recreational interests. They are easily accessible, connecting our towns, villages and growth areas. Our parks are enjoyable places to visit and relax or be active in.
- Our harbours and the rivers and streams that feed them are healthy and thriving natural marine environments. Our storm water and wastewater services are reliable, well maintained and environmentally friendly, minimising downstream environmental impacts. There is minimal sediment and silt flowing into our waterways from new developments and earthworks.
- Local facilities that are the heart of our communities. They are well used and cared for by the communities that manage them. The diverse range of activities run by our communities creates a rich and accessible arts and culture scene.

How will the priorities you have selected be supported by your event or activity? *

of people within not only the hockey community, but also within the multi-sport complex as a whole, impacting other users of the facility. It will also showcase the showgrounds as an area not only to be active, but also a safe place to bring children and complete the loop track, or complete personal fitness requirements on the sportsfields. We hope to generate a large amount of conversation about hockey around this event, driving youth into our Junior Club, and encouraging seniors into playing social hockey, and in time being able to deliver a competitive Warkworth based team competition in Warkworth. We will show all participants to the event how well our hockey turf is cared for and administered by the Warkworth Hockey Turf Charitable Trust, and also how the other sporting codes generate a multi-sport complex that is diverse, allowing for many sports/arts and cultures to be completed at one location for the benefit of the surrounding community. This event will show that the Warkworth Showgrounds Multisport Complex is a heart of our community, fostering sport, play, recreation, friendships and fun.

Local board priorities

Choose the local board priority your event or activity aligns with: *

Our transport infrastructure keeps pace with the needs of our communities. Our growing townships have the same choices for quality public transport as the rest of Auckland. Communities have access to walkways, bridleways and cycle ways. Our roads are well maintained.

Round: 2018/2019 Rodney - Targeted Events Grant Round One

1819 Rodney Targeted Events Grants application

Application TE1916-113 From HIBISCUS COAST RADIO SOCIETY

- ☑ Our communities influence local decision-making. They are empowered and enabled to act and take the lead on community projects and in the planning for their areas. Community groups and residents partner with the council and others to identify and deliver what is best for them.
- ☐ Our local parks and sports facilities cater to a wide range of sporting and recreational interests. They are easily accessible, connecting our towns, villages and growth areas. Our parks are enjoyable places to visit and relax or be active in.
- ☐ Our harbours and the rivers and streams that feed them are healthy and thriving natural marine environments. Our storm water and wastewater services are reliable, well maintained and environmentally friendly, minimising downstream environmental impacts. There is minimal sediment and silt flowing into our waterways from new developments and earthworks.
- ☑ Local facilities that are the heart of our communities. They are well used and cared for by the communities that manage them. The diverse range of activities run by our communities creates a rich and accessible arts and culture scene.

How will the priorities you have selected be supported by your event or activity? *

In today's day and age we believe it is important that our community members gather a good knowledge of technology, learn to use it, become familiar with it. Unfortunately it is sometimes a daunting experience if you are trying to do this by yourself.

Our Club covers all age groups and because of the spirit of Amateur Radio operators, we are perceived as knowledgeable by the community and engaged everyday either individually or as a club in helping people understand and use technology.

With this project we bring a unique opportunity for Young and Old to work together and learn basic technology skills (Electronics, Computer programming) and a fun and exciting practical example on which they can apply those skills.

With this funding assistance we will provide an educational opportunity to local Youth but also adults who are interested to come and build a Radio Telescope and Earth Satellite Radio Station. It's not everyday that such an opportunity arise.

For those who are interested in Astronomy, Electronics, Radio, who want to understand how to use Arduino electronic boards to build their own applications, we will have the example of a lifetime. A real life size Radio Telescope, right here in your backyard.

We have been gifted the actual antennas one of 3m and one of 5m. There is not much left but mechanical, electronic control gear and some radio supplies that are required to make this dream a reality.

If we can secure the funding we will then crowd source a team of interested parties to join us and will provide them a Class to learn all the necessary skills to bring this project to life. Our premises can host classes of 20 people at one time. We can easily run 3 classes a week if the numbers are high. We have members ready to dedicate their time to do this.

We believe it is a fantastic youth educational opportunity for everyone and for us it is a chance to actually open our doors and engage our communities with this amazing hobby (some like to call it experimental science) of ours.

Community benefits

How have you established there is a need for this project? *

The Maker's movement is a real phenomenon. Youth is more and more looking to build technology solutions. We see it as the number of Startup projects grows, we saw the uptake with the opening of a Jaycar store in Silverdale not far from our club (one of our member works there).

There is interest in 3D printing in the community as we know there is another club outfit offering 3D printing classes, and so we believe strongly that Arduino electronic and

Computer classes will be hugely successful, particularly as we will offer a unique opportunity to build a Radio Telescope.

Must be no more than 120 words.

What are the community outcomes of your project? *

Our vision is for our club house to become a Technology hub.

As Amateur Radio Operators we want to connect with our community and educate young and old about technology.

The Universe fascinate people, Radio Telescopes aren't easy to come by, We believe having one at our disposal on the Hibiscus Coast will become the Talking point for many and will help us drive the educational motive forward.

Must be no more than 200 words.

Describe three things you want the project to achieve in terms of benefits for participants and/or others

How will you measure these outcomes? *

Simple:

1. Build a working Earth Moon Earth Communication Station and Radio Telescope
2. Attendance numbers to our free classes.
3. Membership numbers

Must be no more than 150 words.

Describe three changes you will see if the expected outcomes of the project occur

How many people are directly involved in the delivery of this project? *

6

e.g. team members

What is the estimated number of people reached through this project? *

40+

What expertise does your organisation have in delivering similar projects? *

As Amateur radio operators we have already built and operated similar projects. One of our member has helped build an Earth Moon Earth radio Station before. We have access to the wider community of Amateur Radio operators in New Zealand but also overseas who have built such projects before.

We have approached and been invited to visit the AUT Warkworth Radio Telescope and have discussed with them about this project.

1819 Rodney Targeted Events Grants application

Application TE1916-113 From HIBISCUS COAST RADIO SOCIETY

I/We confirm that to the best of our/my knowledge I/we have no perceived , potential or actual conflict of interest in applying for or using any grant funding *

Yes No

For guidance on whether you have a perceived, potential or actual conflict as a result of applying for and using grant funding you should consider the following matters - if in doubt you should declare the conflict.

A conflict of interest could arise where you (the applicant) have a responsibility as a result of receiving council grant monies. This could affect another responsibility, duty or relationship you may also have.

For example

- If you are an Auckland Council employee/local board member or a councillor
- If your organisations committee or board member is an Auckland Council employee/ local board member.
- Personal or family relationships that you have
 - with council employees
 - with council contractors
 - organisations or persons that you will procure services from with the grant monies
- Financial relationships
 - e.g. investments that you have in entities that you will procure services from with the grant monies
- Employment relationships or membership of clubs
 - e.g. you intend to procure services with the grant monies from your employer or a club you are a member of - who will benefit financially from the arrangement.

If you have answered no to any of the above, please provide details below:

I am not sure about something here.

Providing free classes may result in more people becoming Club members in the end.

This is not the primary objective but as a club we wouldn't turn down someone who would want to join.

Must be no more than 100 words

- **I/We understand that Auckland Council is bound by the Local Government Official Information and Meetings Act 1987**
- **I/We understand that my/our name and brief details about the project may be released to the media or appear in publicity material**
- **I/We understand that I/we have the right to have access to this information**
- **I/We undertake that I/we have obtained the consent of all people involved to provide these details.**
