Hosking Reserve – Ecological Mgmt. Plan (EMP)

Background

- AC is proposing to develop Hosking Reserve as a mixed use public open space
- The feasibility study identified opportunities for ecological restoration and community involvement/engagement.
- Forest and Bird Youth (F& B) has a strong interest in the restoration and conservation of Hosking Reserve in partnership with the local community (Sustainable Paremoremo) and Community Parks.
- In 2018, Forest and Bird completed a basic restoration plan for the site. Their vision: “Restore Hosking Reserve to a state similar to that present before human settlement”
- Over the past year F&B have been working with Community Parks and Wildlands on pest animal monitoring, native fauna and flora surveys and pest animal control (Good Nature Traps) and public events e.g. 5min bird count and guided walk.
- The Community Parks team engaged Wildlands to complete an (EMP) for Hosking Reserve to help guide volunteer restoration and conservation activities going forward in line with the feasibility report.
- The plan identifies key vegetation types that exist within the reserve, the presence of plant and animal pests and recommendations for control as well as potential areas for restoration planting
- We are seeking feedback from the local board on this plan and its key recommendations:

1. Planting (see map on page 22)

- Two broad planting types – gorse and pasture
- Twenty potential planting sites
- Much potential for community and school planting days
- Plantings will require site preparation and maintenance through contractor support and volunteer input

2. Animal pest control (see layout on page 21)

- Target species - possums, rats, mice, mustelids, hedgehogs
- Control techniques – Goodnature traps (possums and rats), bait stations (rats and mice), DOC 200 (mustelids and hedgehogs)
- Volunteers will be able to work with Wildlands and parks on effective control

3. Pest Plant control (see map on page 14)

- 17 species of plant pest identified from the ARPMS
- Several key areas of infestation within the park (Mgmt units 1,2,3,4,5)
- Volunteers will be able to work with parks and wildlands to tackle these over time

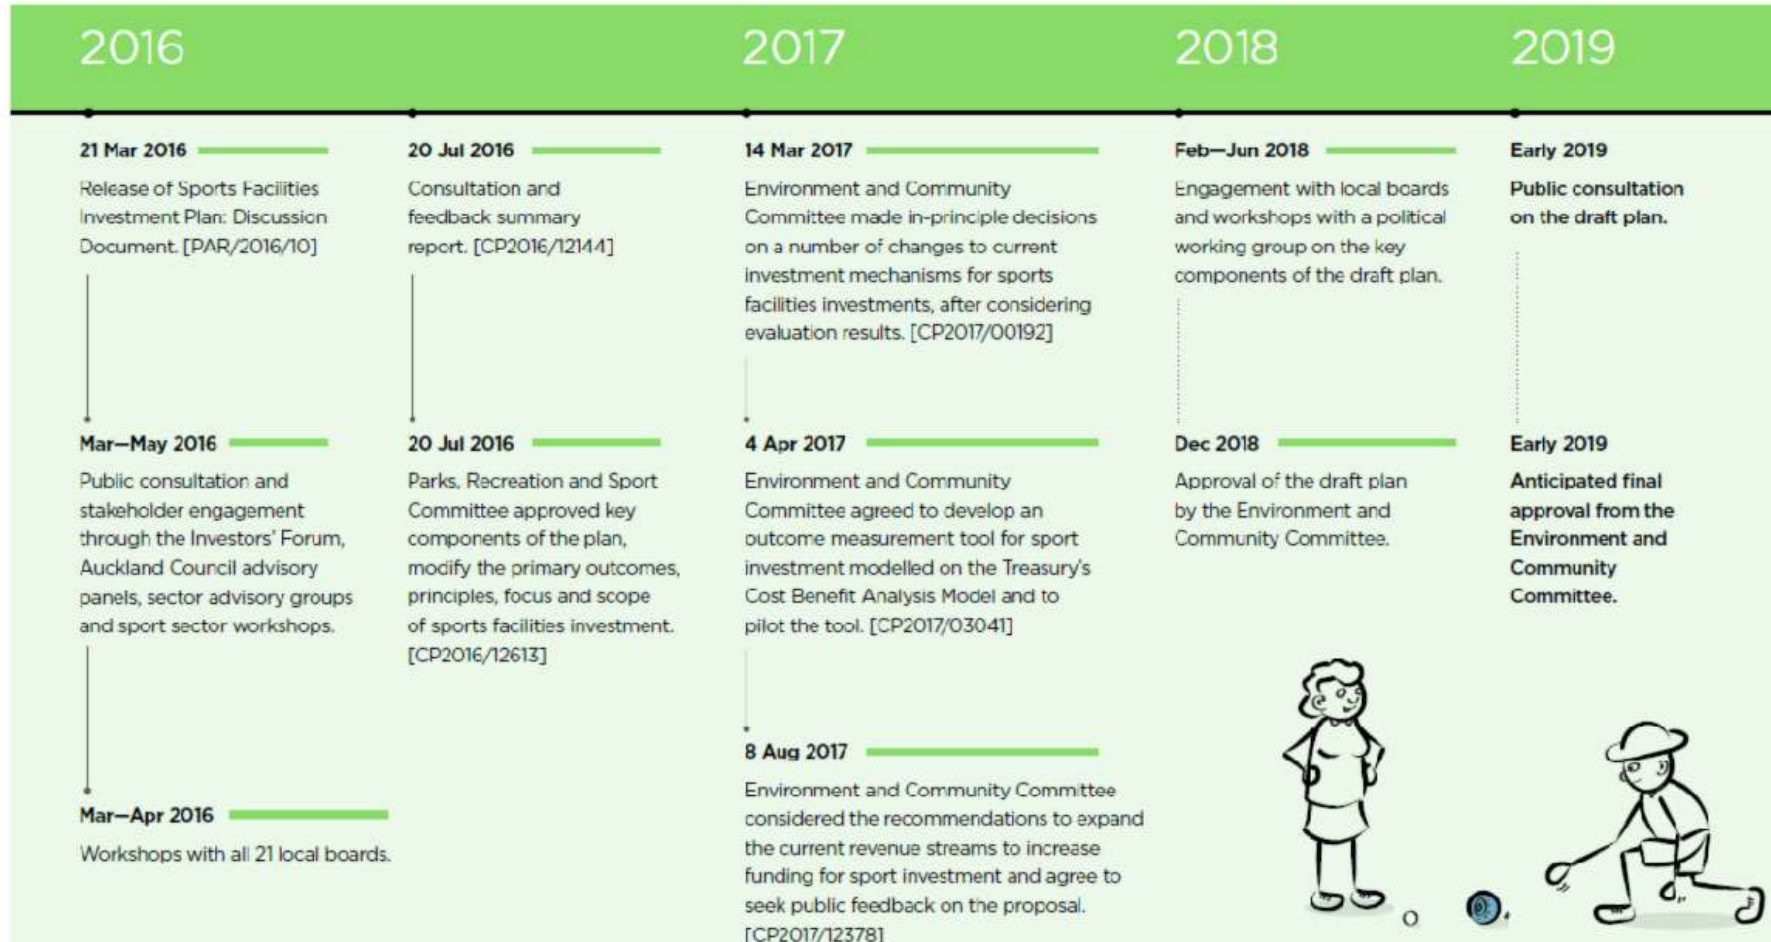

These actions will help enhance and protect the ecological values of the site by re-establishing vegetation, improving habitat and providing opportunities for community engagement and kaitiakitanga (stewardship)

Draft Sport Investment Plan – *Increasing Aucklanders' Participation in Sport: Investment Plan 2019-2029*

Public consultation February-March 2019

Development of the plan

Why do we need a new plan?

Auckland's population is rapidly growing and changing

Research and evidence shows people have different needs and are participating in different sport and recreation activities

(Source: Sport NZ)

Young Adults

Adults

Why do we need a new plan?

The current investment does not align with sport participation patterns

(Source: PwC)

Investment by sport from 2011-2017 (totaling \$268 million)

Auckland sport participation

A plan that caters for diverse community needs

The goal remains to make 'Aucklanders more active, more often'

(Vision set in *Auckland Sport & Recreation Strategic Action Plan*)

Future sport investment will focus on meeting the needs of three distinct groups of people:

- 1** People who already play sport

There will be more fit-for-purpose facilities and programmes to keep them actively involved in sport

- 2** People who play a new sport

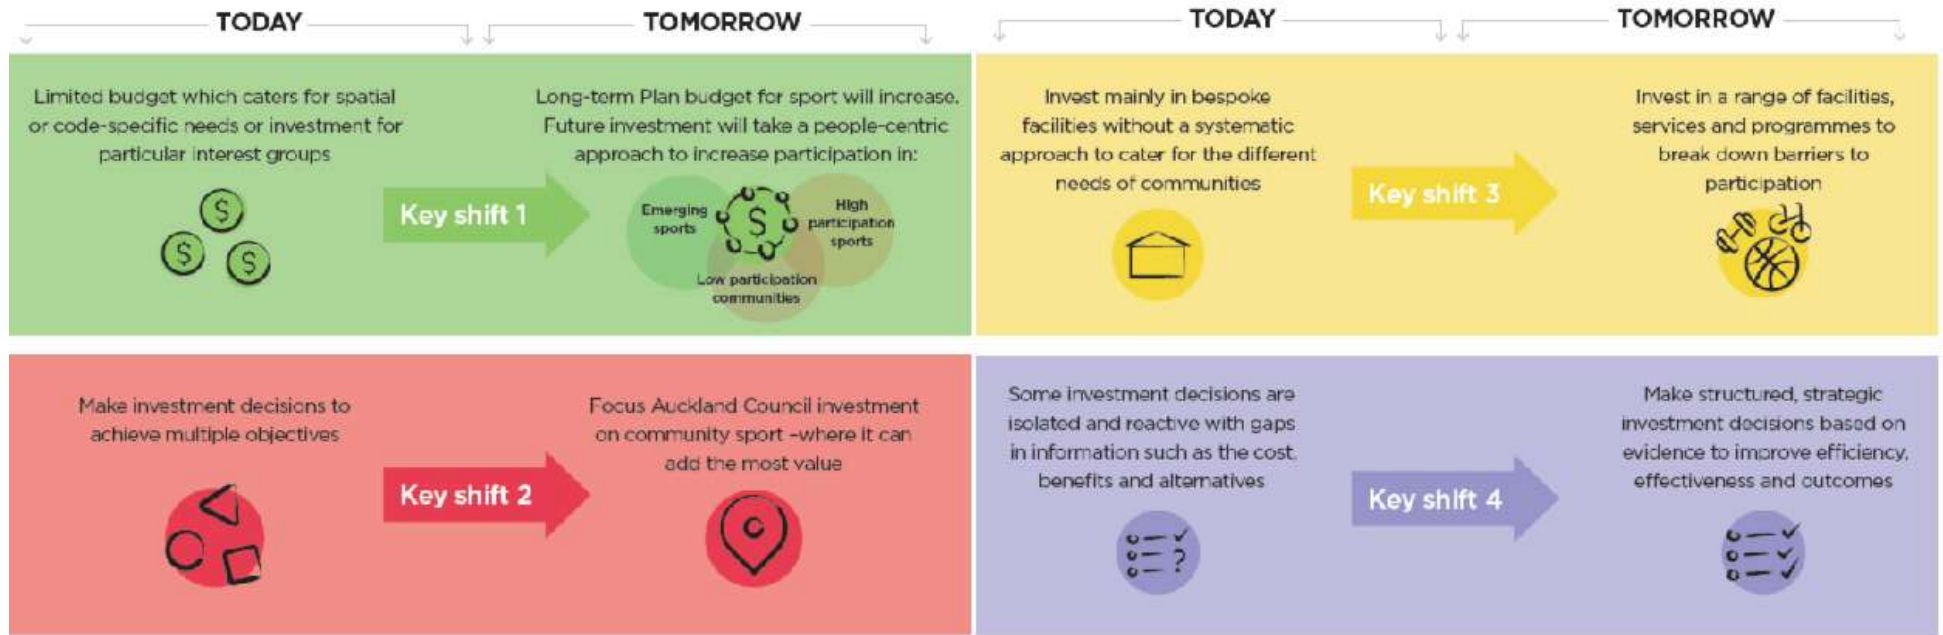

Currently there are limited opportunities to play but, in the future, there will be more fit-for-purpose facilities and programmes that cater to new and emerging sports

- 3** People who do not currently participate in sport

Auckland Council will create more opportunities and make it easier for them to take up sport

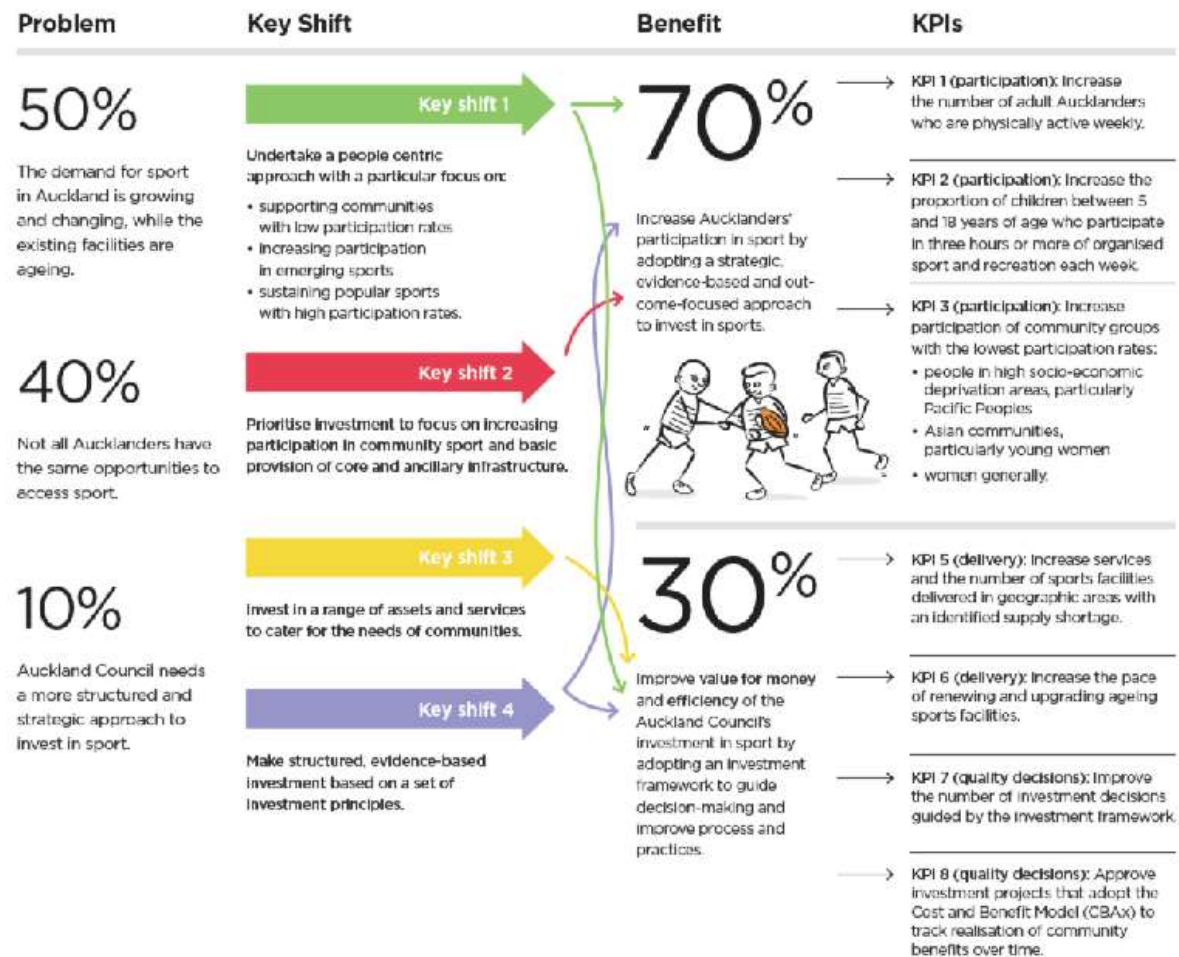

There will be changes to the current way we invest

The logic behind the changes

The changes will help the council respond to the challenges currently facing sport provisions in Auckland

A list of key performance indicators will be used to track progress over time

Investment framework

The framework will help the council make strategic, structured investment, based on evidence.

Auckland Council will answer a set of critical questions before investing:

Whether to invest?

1. What are the community needs?
2. Does it align with Auckland Council's strategic priorities?
3. Does it have Better Business Cases?

How to invest?

4. Is there a partnership opportunity?
5. What investment mechanisms should be used?
6. Who makes decisions?
7. How to report and monitor outcomes?

Delivering community benefits and the Auckland Plan

The next steps
