Update on the city centre public amenity project

Michael Brown – Programme Analyst, Development Programme Office
Quanita Khan – Principal Policy Analyst, Community, and Social Policy
Context

- The City Centre Public Amenities report was published by the Community Empowerment Unit in March 2018.

- The report noted public amenities as fundamental to a vibrant and inclusive city centre.

- The report concluded that there is an absence of strategic direction regarding the provision of public amenities.
Discussion

- A cross council working group has been established to support the project. Auckland Transport, Panuku and Regional Facilities Auckland are participants.

- The working group are considering toilets, showers and storage lockers as priority infrastructure.
Discussion

- The working group will perform a gap analysis on the current amenity provision. The group will compare the results with Australasian and international provision standards.

- Members of the working group are contributing to projects which support public amenities, such as the development of ProjectAKL.
Discussion
Next Steps

- Gap analysis to be completed, with considerations made for operational decisions.

- Results to inform policy on public amenity provision in the city centre.
Next Steps

- Policy development process will:
  - Determine the feasibility and need for a policy to guide investment.
  - Scope the potential need for policy or investment plan for public amenities in the city centre.
  - Support discussion on the level and standard of public amenity provision in the city centre.
