CIF-MD19-08	Te Motu a Hiaroa Charitable Trust	Feasibility Study / Concept Design	64%	\$150,000	\$0.00	This application seeks to move from marae concept through to consent application. Council is in the initial stages of work on an archaeological assessment of the island's geological and ecological values. This is the first step in a planning process for the public space on the island including access to the land designated for a marae. It is important that sequencing occurs to ensure the right outcomes are achieved with the support of public finance. Assessors are supportive of the initiative but do not recommend supporting the present application until the early assessment and planning works are complete. Staff recommend that the Trust apply again in the future."
