

ATTACHMENT A:
Overview of Kaipātiki local parks and recommended high-level mitigation measures

Park Group	Park	Prioritisation Category	Comment	Recommendations
1	Leigh Scenic Reserve	A	No infection detected to date. All tracks are temporarily closed. The park contains the oldest (800 years) tree in Kaipatiki. Its root system is exposed and there is high risk of infection.	Upgrade the boardwalk with high priority as this is a regular commuter trail and key destination. Re-open when works are completed.
	Lynn Reserve	A	No infection detected to date. The track from Leigh Scenic reserve to the first intersection is temporarily closed.	Undertake works to maintain the connection to Leigh Scenic Reserve (specific nature of the works to be determined). Re-open when works are completed.
2	Eskdale Reserve	A	No infection detected to date. The reserve contains numerous tracks and some mountain biking tracks, both formed and unformed, currently in poor state.	Rationalise tracks and/or make minor realignments. Keep the Glenfield to Eskdale route open. Upgrade tracks to protect kauri.
	Francis Kendall Reserve	C	No information on KDD status Connected to Eskdale Reserve.	Install hygiene station(s) at key locations.
	Inwards Reserve	D	No infection detected to date. Connected to Eskdale Reserve. There are no tracks in this reserve.	No action.
	Kelmar Scenic Reserve	D	No information on KDD status Connected to Eskdale Reserve. There are no tracks in this reserve.	No action.
	Lauderdale Reserve	D	No information on KDD status Connected to Eskdale Reserve.	No action.

Park Group	Park	Prioritisation Category	Comment	Recommendations
3	Kauri Glen Reserve	A	Possible infection detected. Due to the high recreational and commuter value, mitigation option must consider the track network as a whole. Partial upgrades are already under way, including rerouting of one track.	Upgrade the school route. Undertake detailed investigation to determine specific solutions (track upgrade, re-routing or other, including partial closure) for other tracks.
	City View Reserve	D	No information on KDD status. Connected to Kauri Glen Reserve. There are no tracks in this reserve. The reserve is closed.	Indefinite closure.
4	Dudding Park Sportsfield	A	No infection detected to date.	Re-align track to protect large kauri.
	Le Roys Bush Reserve	A	Possible infection detected. A section of track is temporarily closed to protect high value kauri.	Upgrade and/or re-align track to protect kauri. Undertake detailed investigation to determine specific solutions (track upgrade, re-routing or other, including partial closure) for other tracks. Install hygiene stations.
	Little Shoal Bay Reserve	C	No infection detected to date. Upgrades are currently under way as part of the renewals programme.	No action.
5	Birkenhead War Memorial Park	A	No infection detected to date. Track from Birkenhead Ave (cemetery end) to the next two intersections is temporarily closed.	Close northern horseshoe track indefinitely to protect kauri. Upgrade other tracks to protect kauri.

Park Group	Park	Prioritisation Category	Comment	Recommendations
6	Chatswood Reserve	A	Possible infection detected. The reserve has 17 entrances, mostly commuter routes, and is linked to Chelsea Estate Heritage Park.	Rationalise entrances. Upgrade track(s) to protect kauri. Close some tracks indefinitely to protect high value kauri but keep commuter route open. Maintain connectivity between Chatswood Reserve and Chelsea Estate Heritage Park. Install hygiene stations.
	Chelsea Estate Heritage Park	A	Possible infection detected. The park does not contain kauri (apart from the Blundell kauri, which is infected with <i>P. cinnamomi</i>).	Mitigate the risk of mud being transported into Chatswood Reserve by installing hygiene stations <u>or</u> upgrade tracks to 'kauri-safe' standard.
	Kauri Point Centennial Park	A	No infection detected to date.	Undertake detailed investigation to determine specific solutions (track upgrade, re-routing or other, including partial closure) for other tracks.
7	Fernglen Reserve	A	No infection detected to date. The southern connection/entrance is linked to Kauri Park, which is temporarily closed. Tracks near the entrance with large kauri are temporarily closed.	Upgrade tracks to retain access to botanic gardens and Ben's Ridge. Upgrade hygiene stations.
	Kauri Park	A	Infection confirmed. Park has unofficial tracks only that are in very poor condition and is temporarily closed.	Indefinite closure (to prevent spread of infection). Upgrade track to Soldier's Bay (temporarily closed) to maintain connection.
	Muriel Fisher Reserve	D	Infection confirmed. Tracks are in poor condition and temporarily closed.	Indefinite closure (to prevent spread of infection).
8	Hadfield Street Reserve	B	Possible infection detected. Kauri are located in the eastern inaccessible part of this reserve.	Prevent access to eastern part of the reserve (no official tracks) through planting and/or signage.

Park Group	Park	Prioritisation Category	Comment	Recommendations
	Odin Place Reserve	B	Possible infection detected. There are no official tracks in this park.	Indefinite closure.
9	Rangatira Reserve	A	No information on KDD status. The park contains a mature stand of kauri, and the track is temporarily closed.	Indefinite closure of track in the vicinity of kauri. Keep commuter routes open.
