### RE: HEALTH RISKS ASSOCIATED WITH 5G TECHNOLOGY

Dear Kris

Earlier this month I received the enclosed memo from the Waiheke Local Board, following a deputation on 31 January from members of the community.

While I understand matters of telecommunications frequencies and managing any associated health risks are central government issues, I have committed to providing any relevant information to the local board.

I would appreciate any information that your office or relevant department holds in response to the issues raised in the memo.

Thank you for your time and assistance.

Kind regards

**Penny Hulse**

Chair, Environment and Community Committee
