Boomers contribution to "Buddy Benches"

Manurewa High School students came to Boomer with a proposal to assist them in making Buddy Benches that will be supplied to Primary Schools around Auckland. It is their aim to have one of these benches in every school.

The benches teach young children about how important wellbeing and hauora is. It will provide students with a safe space where they will feel accepted and welcome to talk about their emotions.

SENIORS CLUB
Memo

To: Environment and Community Committee, Auckland Council; Ministry of Environment
cc: Lucy Hawcroft, lucy_hawcroft@aucklandcouncil.govt.nz

From: Ōtara-Papatoetoe Local Board

Purpose

1. To provide Ōtara-Papatoetoe Local Board’s feedback on the Ministry of Environment’s Proposed Priority Products and Priority Product Stewardship Scheme Guidelines

Context

2. The Ministry for the Environment is consulting on ‘product stewardship scheme guidelines’. The scheme shifts the main responsibility for recovery, recycling and disposal from local government to private industry, incorporating the costs of disposal into the product price. The overarching aim is to reduce the risk of harm from waste and increase economic and social benefits from more circular use of resources.

3. Auckland Council’s draft submission with response to the consultation questions was available to local boards members and considered by council’s Environment and Community Committee on 10 September.

4. Further local board submissions will be appended to the regional submission, noting the final date for submission to the Ministry is 4 October.

Ōtara-Papatoetoe Local Board feedback

5. That that Ōtara-Papatoetoe Local Board:
   a. appreciates the opportunity to give comments, noting its concern that tight time frames do not allow the board to be fully informed of views of its communities.
   b. support Auckland Council’s submission points noting that the purpose of ‘product stewardship’ aligns closely with the Ōtara-Papatoetoe Local Board Plan outcome - He taiao taketake hauora/ Healthy natural environment. The board supports all action that deliver attractive natural environments that are healthy and free from pests, litter and pollution for all to enjoy.
   c. supports the six priority products that have been selected by the Ministry of the Environment for declaration as suitable for product stewardship schemes, namely:
      i. tyres
      ii. electrical and electronic products
      iii. agrochemicals and their containers
      iv. refrigerants and other synthetic greenhouse gases
      v. packaging (beverage containers and single-use plastic consumer goods packaging)
      vi. farm plastics.
   d. further notes that there is a high burden on the local rate-payer and strategic action through product stewardship can influence issues such as illegal dumping and costs to manage waste.
   e. supported council’s move to targeted rates under the Long-term Plan/ 10-year budget as there are challenges in meeting service levels needs (parks, berms, waste) in growing areas of the city.
   f. supported the mandatory ban on single-use plastic bags and asks for further central government to investigate alternative rubbish disposal methods, e.g. clean burning.
   g. notes its advocacy for Resource recovery provision for South Auckland and urges central government to be involved in investing in areas of need.
   h. supports Auckland Council’s submission recommending to the Ministry for the Environment to undertake ongoing discussions directly with iwi and mana whenua to ensure that Te Ao Māori is incorporated early on in this process and that obligations under Aotearoa’s Te Tiriti o Waitangi are upheld.
