Te Whakapuaki a te Mema

Ko au ko, Gary Holmes

Ko tuku oati tēnei i runga i te Paipera Tapu. Ka tutuki i a au, ki tāku e pono nei, e tōtika nei, e mātātu nei ngā kawenga katoa hei painga mō te rohe o Hibiscus and Bays Local Board i runga i te mana kua riro mai i a au hei mema o te Poari ā-Rohe o Hibiscus and Bays Local Board i raro anō i te Ture Kāwanatanga ā-Rohe o te tau rua mano mā rua, te Ture Pārongo, Huīnga Ōkawa ā-Kāwanatanga o te tau kotahi mano iwa rau waru te kau mā whitu, i raro rānei i tētahi atu ture.

I whakaritea i Orewa Service Centre i tēnei, te rā 21 o Noema 2019

I, Gary Holmes

swear on the Holy Bible and I declare that I will faithfully and impartially, and according to the best of my skill and judgment, execute and perform, in the best interests of Hibiscus and Bays Local Board area, the powers, authorities, and duties vested in, or imposed upon, me as a member of the Hibiscus and Bays Local Board by virtue of the Local Government Act 2002, the Local Government Official Information and Meetings Act 1987, or any other Act.

Dated at Orewa Service Centre this 21st of November 2019

On behalf of the Chief Executive
Silverdale Village Signs 18.9.19

There is a lot of unhappiness and anger in the Village due to the fact that the Village signs were changed.

Nov 2018 During 2 market days in the Village, 782 signatures were obtained, asking for the Village signs to be reinstated.

Businesses in the Village area signed that they were NOT consulted about the Silverdale Centre sign:

Sep 2019 About a month and half ago the signs were changed to read Village. Obviously someone felt very strongly about this. This move was given many positive comments both by Businesses and locals.

The signs were then changed back again after 1 month.

The Local Board was told that Business had dropped by one third when the signs read Village.

Where did the local Board get their information from as it is obviously NOT true.

From 62 Businesses in the Village they have said this is NOT TRUE They have again signed they were NOT consulted.

It is the preference from Businesses that if an action is being taken on their behalf, an Independent Survey Company should be used. Something that affects these people should not be actioned on the word of one or two.

2 Albany Village
Why should We be Concerned about 5G WirelessTech?

Wireless communications are being sold to the public for the purpose of faster ‘Internet of Things’ that connects everything in homes and workplaces to a ‘smart device’ (driverless cars etc) However, the convenience of wireless technology can only be achieved by irradiating the community with ultralow harmful pulsed 5G microwave radiation. Are we willing to accept this?

As a growing number of citizens are concerned about 5G ElectroMagnetic Frequencies planned for Roll-out in NZ in 2020 and around the world, including from 20,000 satellites orbiting in space.

https://www.nz.co.nz/national/programmes/first-up/audio/2018698157/spacex-chain-of-60-satellites-visible-from-this-morning

5G will be in addition to the 2G, 3G,4G and fibreglass networks which are sufficient for the majority of needs but the telecommunication industry is manufacturing a future which will make us all totally dependent on technology for every part of our lives, under its surveillance and control.

The public are unlikely to learn the truth about dangers of 5G from the mainstream media, which is highly dependent on advertising revenue from telecommunication companies Spark, Vodafone and 2 Degrees.

Community education initiatives are urgently needed to help people become informed.

Icons are hyping the 5G ‘revolution’ to populations and governments worldwide without heeding warnings from independent scientists and doctors* who present clear evidence that 5G poses a serious threat to all living organisms, at a time when our diversity and populations of flora and fauna are already declining at an alarming rate.

Medical studies show electromagnetic radiation is carcinogenic and contributes to Neurological, endocrine, cardiovascular and reproductive damage as well as cardiac, diabetes, and immune system disruption.

Some are already being installed in places where citizens are unaware of the dangers. Mature trees have been felled because they impede 5G transmission, while birds and insects are perishing from this microwave diation and property values are threatened by the proliferation of the “small cell” antennas used in 5G stems, placed every 100-300 meters close to homes and schools.

https://www.5g.org.nz/2019/10/09/like-trees-enjoy-breathing-oxygen-you-should-oppose-5g/

Independent media outlets report that moratoriums on 5G deployment are being achieved by determined citizens in counties and regions by lobbying politicians at local and central government level. The momentum for safe5G tech is building. https://shetrust.org/international-actions-to-halt-and-delay-5g/

e good news is that there is a fast-growing campaign to keep New Zealand 5G Free and reliable information can be accessed at the site www.5G.org.nz.

tere is also a Facebook page www.facebook.com/5GFreeNewZealand

Read the 5G Space Appeal at https://www.5gspaceappeal.org/ to the United Nations and verments of the world, by Scientists, Doctors, Environmental Organizations calling for a 5G Moratorium.

states: "5G—the 5th generation of wireless technology—must not be built on Earth or in Space. The lion that radio frequency non-ionising radiation, commonly known as radio waves...is harmless is staked. 'If 5G is built, radiation levels will increase 10- to 100-fold, virtually overnight. There I literally be no place on Earth to hide from it.' Please halt this dangerous untested technology.

Strongly oppose 5G being imposed throughout the land without public consent. We call on verments to invoke the precautionary principle for a Moratorium on 5G until robust, independent scientific investigation is done on the longterm biological effects on humans, animals, insects, ants and microorganisms to ensure protection of our health and the environment.
