Table of contents

This presentation outlines the key findings and insights from **the aquatic network review** to assist the agenda report to the Policy and Planning Committee.

This presentation covers the following:

Part A: Purpose of the review

Part B: Key findings and insights

Part C: Detailed findings:

- 1 Auckland's aquatic network now
- 2 Current network performance
- 3 Current demand
- 4 Anticipated future demand

Part D: Appendix

Part A: Purpose of the review

Item 8

Attachment A

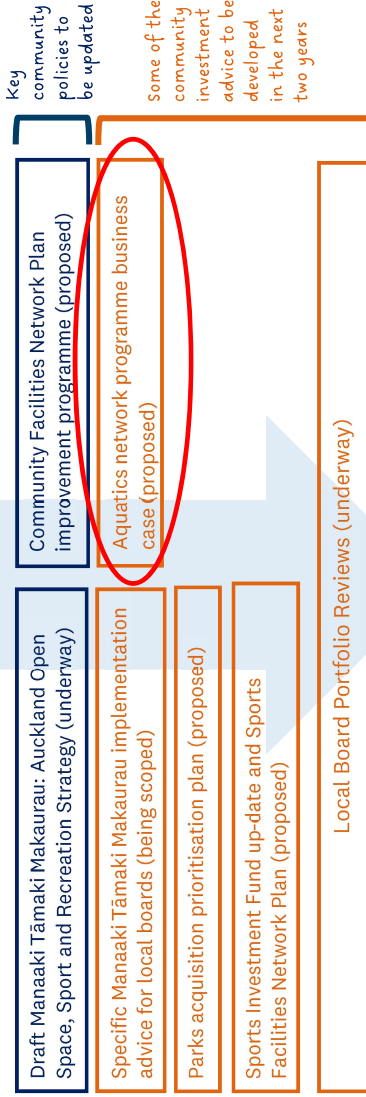

Context

This piece of work is part of a broader suite of improvements we are undertaking to better align community policy and investment advice to Council's strategic and operating environment ahead of the next LTP.

Council's strategic and operational environment...

...needs to be better reflected in community policy and investment advice...

...to inform local board plans and Long-term Plan decision-making.

Triggers for the review

The **Community Facilities Network Plan 2015** is the policy that guides council's planning and investment in community services and spaces.

This aquatic network review responds to **two actions** in the Community Facilities Network Plan Action Plan 2022:

- **Action 13:** “Undertake a regional review of Auckland’s aquatic network to understand the impacts of growth, assess future gaps in relation to services and the lifespan of existing facilities. This should include the whole pool network (indoor, outdoor, non-council, council, learn to swim, school, etc)”
- **Action 89:** “Investigate the demand for regional competition facility to serve aquatic sports including deep-water, based on the findings of the national pools strategy. Consult with relevant regional sports organisations and recognise any regional sport code plans. Assess demand being met by the Millennium Centre and consider opportunities to improve existing facilities.”

Problem definition

Auckland’s public aquatic network is highly used and much valued by our communities. But it is ageing and requires significant budget to run and maintain.

Despite Auckland Council's significant investment in the aquatic network to provide health and social benefits to Aucklanders, investment is not keeping up with the provision guidelines set in the *Community Facilities Network Plan*. Some Aucklanders are missing out.

This review offers an opportunity to explore what demand looks like now and in the future, taking a whole-of-network view to aquatic services provision.

Policy response

The review seeks to answer:

KEY QUESTION

What aquatic services are Aucklanders likely to need over the next 30 years, and what does this mean for Auckland Council and how it invests in the aquatic network now and in the future.

This requires taking a **long-term, strategic view** to investment in the aquatic network, considering key drivers such as: growth, community needs, equity, affordability, value for money and environmental sustainability.

**Komiti mō te Kaupapa Here me te Whakamahere / Policy and Planning Committee
Forward Work Programme 2025**

This committee deals with setting the direction for the physical development and growth of Auckland through a focus on land use and policies relating to planning, growth, infrastructure, housing (as well as programmes and strategic projects associated with these activities). It also deals with the development and monitoring of policy associated with community, social, cultural and environment matters (including climate change activities). The full terms of reference can be found here: [Auckland Council Governing Body Terms of Reference](#)

Note: Annual Budget decisions may affect the work programme.
