Why this petition matters

Started by [James S](#)

Our community volunteer group has been planting native trees and korora penguin habitats on a small piece of neglected public land at 89b Great Barrier Rd, Oneroa, Waiheke Island for the past 3 years. Unfortunately Auckland Council have not maintained this land and it has become a home to rats, weeds, and without sufficient tree cover it has suffered a significant land slip.

We have planted hundreds of native trees and shrubs, but there are still hundreds more needed to stabilise the land and create effective habitats for bird life. Auckland Council will not grant us permission to continue this work without the support of the public. Please lend us your support by signing this petition today.

Through this initiative, we aim to achieve two crucial goals:

1. Supporting our local biodiversity, by removing pests and creating habitats for native plants and animals such as tui, ruru, kaka and the korora (little blue penguin).

2. Reducing erosion, which affects the biodiversity and also neighbouring properties, as well as the overall landscape aesthetic of Waiheke Island.

Our community group is working closely with Waiheke Native bird Rescue and together we have already rehabilitated 5 malnourished penguins from this area. Korora are considered 'at risk' by the New Zealand Department of Conservation, and activities enhancing their habitats can significantly help their conservation (Source: New Zealand Department of Conservation).

For more information, you can view our full planting plan [here](#).
